CRESSI CARES

Cressi was founded, and still lives, just steps from the sea in **Genoa**. We breathe sea air in everything we do, and every one of our products is inspired by the incredible beauty of the waters we see before us.

The only way to fight pollution in the sea is to be aware and active, first hand.

Cressi decided to take some concrete actions

01

CRESSI HEADQUARTERS IN GENOA SUPPLIED BY RENEWABLE ENERGY

Cressi is proud to announce that its Genoa factory is operating with 100% renewable energy. Alternative and renewable energy sources are crucial for the environmental health of the world's seas and for our future. The only way to fight ocean pollution and to conserve the beauty and health of the planet's oceans is to be aware and proactive. At Cressi, we decided to take action: 100% of the energy used in our Genoa factory is clean and completely green.

02 CRESSI'S PACKAGING

We live by the sea, we work with the sea and we love the sea, so it's our responsibility to give it care and respect. Our goal is to replace all plastic packaging with alternative sustainable solutions following our policy.

"In Cressi we have always focused on sustainability by orienting ourselves to the protection of the environment and especially of our seas. Since 2019 production and offices are powered by renewable energy and today we can proudly say that our establishment is zero impact. We follow the sustainable direction on many fronts, such as in the choice of packaging materials, where we are reducing plastic and replacing it with recycled or recyclable materials. We are also very active in sponsoring events related to cleaning up the seas to ensure that future generations have our same opportunities."

Diving, Snorkeling and Water Sports are not 3%, 5% or 10% of our business. They are 100% of our business. We are focused only on water related sports.

We have been doing this, in the bay of Portofino, since 1946 and **this is what makes Cressi different.**

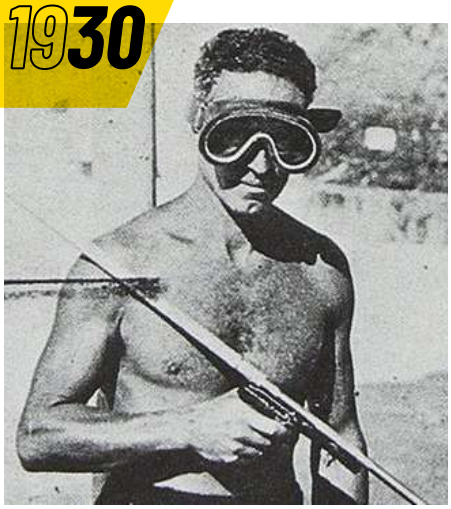
SINCE 1946

ANTONIO CRESSI ***& MARCO*** CRESSI

WE USE & TEST OUR PRODUCTS OURSELVES

WE ARE FAMILY

1930



1938
Brothers Egidio and Nanni Cressi start to handcraft the first masks and spearfishing guns. These are the origins of Cressi, the oldest scuba diving equipment company worldwide.

1940

1943
The first Cressi mask, The Sirena, was hand crafted in 1943. It remained in the catalogue, with various updates, for more than 30 years.

1946
The Cressi company is officially founded in Genova, Italy.

1947
In 1947 the first oxygen rebreather was produced; Aro AR47. It was already highly advanced and fitted with sophisticated technical solutions, like the condensation receptacle.

1950

1952
Pinocchio Mask, which makes equalization possible. It is a major innovation in the early'50s. It is the most famous and most sold mask in the world's history, and it is still included in the catalogue.

1953
Rondine Fins - Also in the field of fins, Cressi invented the model that has inspired all other manufacturers, the first floating model in the world.

1957
Cressi athlete Mario Catalani wins the first spearfishing World championship and get the gold medal in Jugoslavia.

1960

1965
Cressi opened one of the first workshops that specialized in producing optical masks. Thanks to Cressi, even people with visual defects could now get full enjoyment of the underwater universe.

1970

1970
Equi-vest - In 1970, Cressi was the first manufacturer in the world to produce Equi-Vest, a futuristic jacket that became one with the scuba tank, supplied by a hose that drew air directly from the first stage. This was the first incarnation of the modern BC.

1970
Rondine L long fins - The world leader of molding rubber fins, Cressi developed the Rondine L long fins, which enabled Jacques Mayol to go onto achieve his astonishing freediving records.

1979
Fins range - Alongside the various rubber fin models, a futuristic model was presented with a reinforced nylon blade, called the Rondine Gara, a fin that thirty years down the line is still going strong, and has been adopted by world class freedivers and spearfishermen the world over.

1980

1983

Jacques Mayol, the first man in the world to challenge the 100m barrier. He reached a depth of 105 meters. The episode has gone down in history, the record was obtained in the waters of the island of Elba in 1983.

1988

Apache Arbalète - Cressi produced a complete range of Arbalete spearguns to join the pneumatic guns, called the Apache, which very soon became the Champion speargun in the world.

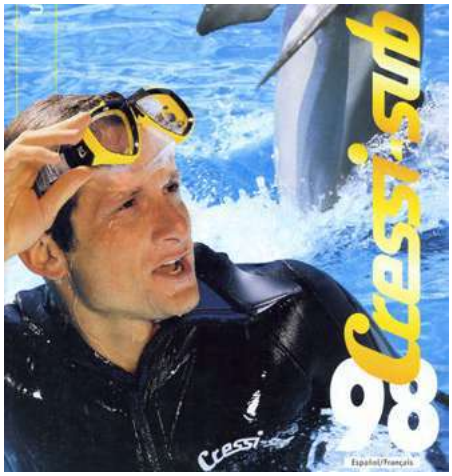
1989

Cressi athlete Renzo Mazzarri wins the spearfishing world title in Italy.

1990

1990

Cressi continues its international expansion and the products are by now distributed in over 90 countries world wide.



1999

Cressi Athlete Umberto Pelizzari sets the freediving "No Limits Absolute Variable Weight" World Record in Portofino (Italy) reaching the depth of 150 meters.

2000

2000

Big Eyes was the first mask in the world with raked lenses in an upside-down teardrop shape, an innovative form that gives the diver a complete view of all the equipment worn. They became the most widely copied and imitated mask in the world, a gratifying appreciation of how far ahead Cressi is in the design of its products.

2010

2011

The Leonardo dive computer watch is introduced, the first of the products designed in-house by Cressi Elettronica in order to guarantee optimum quality, safety and reliability.

2013

The French freediving champion Guillaume Néry becomes a Cressi product endorser. The Giotto dive computer watch is introduced; it processes the data from repeat multi-day dives and dives with gas mixtures and also benefits from the Cressi RGBM algorithm. The Tracina wetsuit for spearfishing is introduced in a new and exclusive camouflage Dark Digital Specter Pat Cressi.

2020

2021

Hydrosports is the result of Cressi's experience, consisting of tradition, innovation and quality, since 1946. With its close relationship to the sea environment, the Cressi team has been able to develop this new collection in response to the direct needs it encountered in practice and through water tests on its products.

TODAY

The Cressi company is still entirely owned by the Cressi family, which carries on with the same passion, the work started by brothers Nanni and Egidio Cressi. Its spirit lies in the manufacturing tradition, with a clear preference for the conception and realization of its products in-house, from the initial design through to the smallest details. Cressi focuses on those who love all facets of the aquatic world. The company has never exaggerated with successful products on the market, but has instead always invested in research and development to the benefit of quality and reliability, the evolution of materials.

UNIQUE STYLE

LIGURIA. OUR LAND, OUR SEA

It was to fish in the depths of Portofino and San Fruttuoso that, just before the Second World War, a group of friends thought of new equipment. Situated between the French border and Tuscany, Liguria is one of the smallest regions in Italy. The Italian riviera is reflected in the blue Mediterranean Sea, but is also surrounded by mountains that drop sheer into the sea. Vegetation forms the backdrop to some of the country's most popular and well-known seaside resorts.

The coasts are generally high, rocky, jagged, especially in the Riviera di Levante, while in the Ponente there is an almost perfect alternation between sheer cliffs and sandy beaches.

It couldn't be any other way, the strong passion for the sea finds its place in a unique setting with depths to explore.

"THE SEA IN LIGURIA, ESPECIALLY AROUND THE PORTOFINO PROMONTORY, IS EXTRAORDINARILY BEAUTIFUL AND, WHAT'S MORE, ACCESSIBLE WITHOUT TOO MANY PROBLEMS. THIS HAS PLAYED AN IMPORTANT ROLE IN THE BIRTH AND GROWTH OF A DIVING EQUIPMENT CENTRE IN THESE PARTS."

Antonio Cressi

" I'M PROUD TO HAVE ALWAYS MANUFACTURED OUR MOST STRATEGIC PRODUCTS AT OUR HEADQUARTERS IN GENOVA, ITALY."

ANTONIO CRESSI

THE CRESSI HEADQUARTERS

In 1989, the company was enlarged, moving it to Via Adamoli, along the Bisagno valley in Genoa. And then came the electronics department. Since 2008 we have created a research and development department for this sector and so we produce directly the many control instruments that are now used during diving. With 150 employees and seven branches, Cressi is a world leader in the production of diving equipment, innovation, and development with exports accounting for 80% of turnover.

BUT THE ONLY ONE STILL RUN BY A FAMILY

/ NET

WHERE WE ARE

WORLDWIDE

Our headquarters is based in Genoa, and we also have eight branches: USA, Mexico, Brazil, France, Spain, China, Thailand and Australia. 70% of our products are made in Italy in our own factory, in Genoa. 10% of our products are made in our own production facility in Hungary and the remaining 20% is sourced from selected high-quality suppliers from Asia.

We have around 10,000 shops all over the world, and our products are sold in over 100 countries.

CRESSI BUYER'S GUIDE
2023 COLLECTION

Cressi's legacy of innovation began in 1939 with two brothers who shared a passion for the sea and a gift for technical design and working with their hands. Egidio and Nanni Cressi began by crafting masks and spearguns that would allow them to move and hunt more efficiently in the waters near their home. By 1946 their designs and products had become so popular they founded the Cressi company in Genoa, Italy. Today, although Cressi is a worldwide leader in water sports manufacturing, it is still wholly owned by the Cressi family, and the commitment to innovation is still in the company's DNA. It has a long history of groundbreaking product development, and has often been the first to bring product advancements to the market.

This history of innovation is also made possible by a commitment to manufacture products in Italy at the Cressi facility. An investment in the latest manufacturing equipment and more than 16,000 square meters of roofed space, and the ability to have the designing and manufacturing process happen side by side has led to the absolute highest standards for quality. It also allows Cressi engineers to quickly develop, test and incorporate the latest materials and technologies.

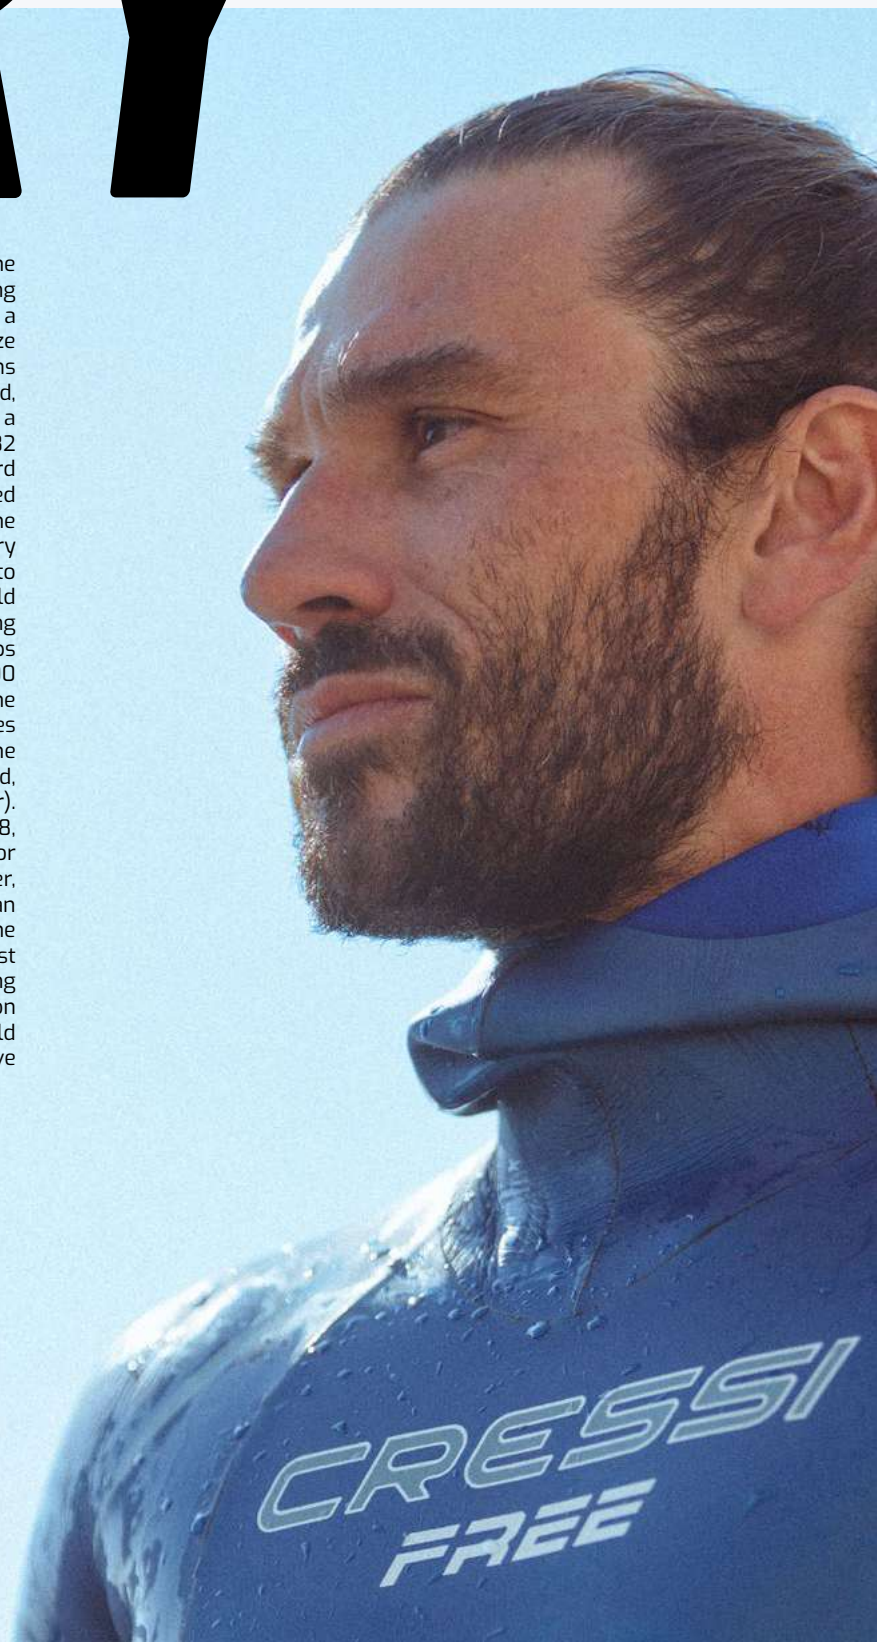
Innovations continue, the results today are the same as they were in the beginning, the most advanced and best made products in the world.

Cressi's experience and the Italian know-how gives life to the new 2023 collection.

VE MANUFACTURE QUALITY SINCE 1946

GUILLAUME NÉRY

Guillaume Néry grew up in Nice, France, by the Mediterranean Sea, and discovered freediving when he was 14 years old. At 15, he joined a freediving club, where he began to specialize in the constant weight discipline (wearing fins and without the use of a sled). At 19 years old, he joined the French national team and set a French constant weight national record of 82 meters (which also matched the world record at the time). The following year, he reached 87 meters in constant weight, becoming the youngest world record holder in the history of freediving. In 2004, Guillaume travelled to Reunion Island, where he set another world record of 96 meters. In 2005, while training for the first freediving world championships organized in Nice, Guillaume reached 100 meters during a training session. The same year, he reached 105 meters, which was Jacques Mayol's last world record, set in 1983 in the No Limits discipline (going down with a sled, and coming up with a balloon filled with air). In 2006, he reached 109 meters. In July 2008, he broke the constant weight world record for the fourth time (113 meters). Two months later, with the French freediving team (with Morgan Bourc'his and Christian Maldamé) he became Team World Champion in Egypt. It was the first gold medal for the French Team in a freediving world championship. In 2011, Guillaume won the constant weight AIDA freediving World Champion title, in Kalamata, Greece, with a dive to 117 meters.



AMBASSADORS

HOW I STARTED FREEDIVING

The first real contact with breath-hold was at the age of 14, and it was not even in the water. I was with a friend in the bus between school and home, and we were playing a game: Who can hold his breath the longest. I lost. So I started to challenge myself at home, in my bed. I discovered after few weeks I was able to hold my breath more than 4 minutes. The feeling of exploring the limits of my body was very exciting. Then I decided to try it underwater, to discover the unknown territory of the deep water. I just fell in love with this amazing feeling to explore the unknown. A few months later I discovered that I could train properly with the only freediving club at that time, which by chance was located in Nice. It was October 1997. I was 15, and the real adventure with freediving was just starting.

WHAT IT MEANS TO BE A CRESSI AMBASSADOR

Before being named a Cressi Ambassador, I was buying Cressi gear. I remember my first pair of fins was the Gara 2000. I remember having always dived with a Superocchio mask when I was younger. So to me, Cressi equiment has always been super top quality.
On top of that, Cressi has supported the two legends of freediving history: Jacques Mayol and Umberto Pelizzari. So when I was asked to become a Cressi Ambassador, it was a huge honor. I hope we will continue this adventure together for a while!

Guillaume Néry

YouTube

Guillaume Néry Youtube Channel

/ OUR AMBASSADORS

ASIA BRYNNE

Hawaii

asiabrynne

I picked up my first disposable film camera at the age of 8 and never stopped shooting. The ocean is a place away from all of the noise, where you don't have to use words, time doesn't exist, and you can share space with animals. Being underwater is a break from the busyness of life.

THE BUCKET LIST FAMILY

worldwide

thebucketlistfamily

The Gee family, just a typical family working from all over the world as Family Travel Journalists! Their story began in 2015, when they decided to sell everything and leave home for a trip around the world. They started an Instagram and YouTube channel called, The Bucket List Family.

DANILO CALLEGARI

Italy

callegaridanilo

He explored the most inhospitable places in the world, swam in the oceans and climbed the highest mountains, he crossed entire continents by bicycle... then four deserts and the largest glacier in Europe. His mission is to fuse air, land and water into a single adventure.

GIADA CAMPANELLA

Italy

giadacampanella

I am a dynamic yoga teacher, yoga for me is a connection to nature. In the water we are put to the test and we can only abandon ourselves to the water that envelops you and hugs you gently. When I dive underwater my mind is canceled, the body is abandoned and there are no other sounds other than that of your heart, then my mind calms down.

FABIO ROLLERI

Italy

fabiorolleri

Breathe is a project that aims to raise awareness of the beauty of underwater nature. We were born in contact with the sea and water has always been part of us. Below the water level everything stops, it's just you, your heartbeat and your room! Calm rules everything around you and it is at that point that you realize how wonderful there is underwater.

IGOR D'INDIA

Italy

igordindia

Igor has been able to combine his passion for outdoor adventure with his training in underwater filmmaking, camera drone pilot operation and advanced open water diving. He is deeply committed to participating in the global community who are fighting to protect the ocean.

REGINA DOMINGO

Mexico

regisunday

Regina is part of the Nakawe project. The mission is to promote the conservation of critical ecosystems and species by working directly with communities to promote sustainable solutions to local environmental issues and educate local populations on the importance of biodiversity.

KRYSTAL DORN

USA

krystalklear

Krystal moved to Hawaii, when she began photographing underwater and free diving. She is well known for capturing artistic images underwater, from mermaid photography to conservation awareness projects. Her mission is to help raise awareness for animal species.

GIULIA GABBRIELLESCHI

Italy

gabbri1996

Giulia Gabbrielleschi is an Italian swimmer, specialising in open water swimming. At the World Championships, she won a silver medal (Gwangju 2019) and a bronze medal (Budapest 2017) in the 5 km team event. The challenges continue and year after year she brings home excellent results.

CHRISTOPHER GILLETTE

USA

gatorboys_chris

I'm born in Florida and have spent my life around the water. I love the freedom, weightlessness, and otherworldly views of diving. I try to use my passion to teach others about aquatic wildlife in the hopes they will learn to love them too, and ultimately help protect these fragile ecosystems.

KAYLEIGH & CAMERON GRANT

Hawaii

mermaid.kayleigh

Kayleigh and Cameron area passionate divers who strives to educate and encourage people to protect our oceans. As a marine conservationist, Kayleigh understands the importance of educating people about ocean conservation. Through her work at One Ocean Diving, she's able to inspire people's in protecting the world's sharks and marine life.

PHILIP HAMILTON

UK

philip.hamilton.photography

Philip Hamilton, filmmaker, photographer and author, is best known for his passion and dedication to ocean conservation. He has over thirty years diving and sailing experience and has documented most marine animals on the planet, from the majestic Blue whale to the smallest underwater critters.

/ OUR AMBASSADORS

THEO KNEVEL

Netherlands

theoknevel

Theo is a scuba diving and advanced free diving instructor. He joined Cressi following a 10-plus-year career as a frogman in the Special Boat Service. He has been able to spread his passion for diving throughout the Caribbean. He is co-founder and chairman of the War Veterans Foundation.

BROOKS LAICH

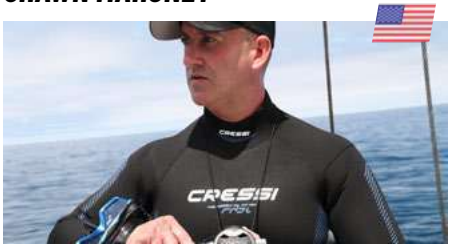
USA

brookslaich

He's a Canadian former professional ice hockey forward. He played over 750 National Hockey League games. Brooks is a multi-athlete and a sports lover, so what better way to kick off the day? A little snorkel session when the water is calm and fishes and turtles are active.

SHAWN MAHONEY

USA

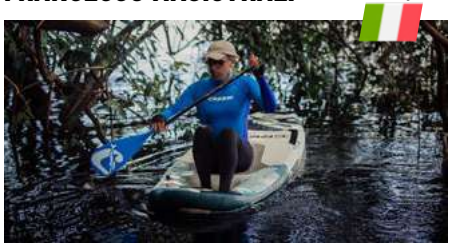


thebeaconscollective

All of my first gear was Cressi, and most of it since has been. The early pioneers of freediving wore Cressi and I saw how successful they were so I said why not emulate what they do? I loved and still do my Cressi Gara 2000's. That's why it was a no brainer to say yea to being a Cressi ambassador.

FRANCESCO MAGISTRALI

Italy



beyond.exploration

Francesco is the creator of the Beyond Exploration brand. His family, his friends and his collaborators are all part of this team. In the name of Beyond Exploration's mission itself, Francesco's gaze is always turned towards the future. Adventure, travel and exploration are the means to deeply know the world, the Mystery and Humanity.

LLUIS MASUET

Spain

masuleti_underwater

In 2016, tired of the business world, he tried scuba diving and began to learn underwater photography, a combination that in just a few short years made this Barcelona citizen a renowned, award-winning photographer. Lluis currently travels all over the world capturing beautiful images.

LEO MORALES

Mexico

leomoralesbuzo

For many, scuba diving is an adventurous, recreational activity. For Cressi ambassador Leo Morales, scuba diving was therapy and the pathway to a second chance at life. After surviving a rare form of cancer, it was scuba diving that helped Leo to heal and find a deeper meaning into the purpose of his life.

ROBERTO OCHOA

Ecuador

robertoochoahe

Roberto Ochoa is a Videographer for Planeta Azul, he started making wildlife videos at the age of 25 in the Galapagos Islands, Africa and North America. Beneath the world's waters lie landscapes, species, vegetation, and populations as diverse and splendid as those on land.

OCEAN RAMSEY & J. OLIPHANT

Hawaii

oceanramsey

"Mr. and Mrs. Sharks,". She is a marine biologist, shark and marine conservationist, professional freediver and scuba instructor, surfer, swimmer and professional model. Juan grew up surfing, he became a divemaster. He traveled the world with to help combat illegal fishing and whaling.

CRAIG O'CONNELL

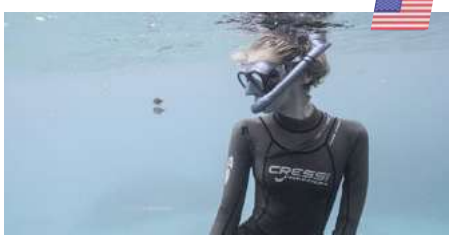
USA

thesharkdoctor

I'm from a small town located several hours from the ocean. But I always had a fascination with the ocean, a fascination that really came to fruition during my first shark encounter in the Florida Keys when I was 14. My free diving and scuba career began and has been growing ever since.

NATALIE PARRA

USA

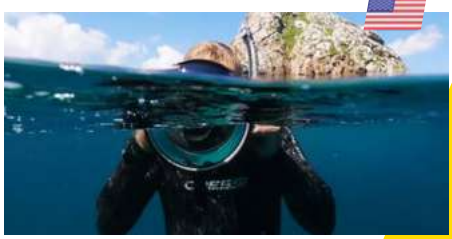


nataliekparra

I'm from Southern California. I grew up playing in the ocean, but it wasn't until I was visiting the island of Oahu prior to moving there that I tried freediving for the first time. It felt like flying and I couldn't get enough of it. I started researching, taking courses and learning from fellow free divers.

CRAIG PARRY

USA



craigparryphotography

It was his parent's gift of a disposable water proof camera that set him on the path to his passion. While most kids were reading comics, Craig was immersing himself in early editions of Australian Geographic. Finally the 35mm SLR set the course for Craig's future.

STEVEN PAYNE

USA

sevenpayne

Steven grew up surrounded by open spaces, farms, and lakes; he loved exploring and seeing animals. His family moved to Florida, which cemented his love for the ocean. Steven is currently in the process of deploying artificial reefs: His nonprofit, The Reef Genesis Corporation, is his passion.

/ OUR AMBASSADORS

PIRRY

Colombia

pirryoficial

Pirry is a Colombian journalist, writer, photographer, documentalist and important influencer that is dedicated good part of his journalist work talking about the Ocean and denouncing problems such as illegal fishing, pollution and many other difficulties facing the seas.

PRO RECCO WATERPOLO 1913

Italy

prorecco

Pro Recco Waterpolo 1913 is a water polo club from Recco and is to this day the most successful team in the world. The sea as an indissoluble link in the history, the symbiotic relationship with Liguria, the sacrifice and the constant search for innovation to win the daily challenges.

ANDREW RAAK

USA

raakbottomimaging

Passionate about all aspects of the marine environment, Andrew has worked as a dive professional for more than a decade. He has a degree in Marine Science, a captain's, license and dive instructor certification. He has traveled the world photographing in amazing locations.

MARIO RIGBY

Turks&Caicos

mariorigby

In 2018, Mario completed his crossing Africa journey, a two-year trek walking and kayaking from Cape Town to Cairo. This expedition allowed him to connect with communities and share their message and stories. His goal was to inspire people globally to get out, be brave, and see the world.

ARIANNA ROMERI

Italy

ariannaromeri_art

I grew up surrounded by equipment and the perfume of neoprene, watching my dad dive and waiting for my moment. I signed up for a freediving course. It wasn't love at first sight; I learned to appreciate it when it became the key to getting to know myself, through its timing, calmness and sensitivity.

CHIARA SALOMONI

Italy

chiaraphoto

I remember snorkeling all over the Mediterranean Sea, using my father's Cressi fins, which were oversized for my feet. I got into scuba and moved to the U.S. to follow my dream of becoming an underwater photographer, so that I would have the chance to be in the water as much as possible.

JACINTA SHACKLETON

Australia

jacintashackleton

Jacinta Shackleton is a marine biologist and educator at Lady Elliot Island, located right on the Great Barrier Reef. You might recognize her name from her stunning work filming and photographing marine animals. Most notably, she is 1/~50 people to have seen and filmed an Ornate Eagle Ray.

JONATHAN SCHUTTE

Cayman islands

jonschutte

For as long as I can remember I have had a passion for traveling and telling stories. I love to create content and share my adventures. Through my project Nauti Nomad I hope to inspire you too to embrace life and pursue your passions, respect our planet and help each other!

SULUBAAÏ FOUNDATION

Philippines

sulubaaifoundation

Our approach consists in developing our objectives and making our site a model of sustainable management and a leader in ecosystem restoration. We believe that ecosystem preservation requires the involvement of local communities, and that the active management of marine protected areas is necessary to achieve results to deal with existing issues.

LUCA TIXI

Italy

outdoorportofino

I was born and raised in Recco, at the time of high school, in a period of environmental militancy, the enlightenment arrives: I understand that my job will be to bring people into nature! After graduating in Marine Environmental Sciences at the University of Genoa, I founded Outdoor Portofino.

FEDERICO TRAVERSO

Italy

skullphoto_aka_surfskull

He is a young Italian designer and collaborates with Cressi for many years. Federico is passionate about the sea in all its forms, practice surfing and freediving but instead of hunting, he prefers to take pictures and videos. He starts each day with a morning swim session in the sea.

NANJA VAN DEN BROEK

Netherlands

nanjafreediver

Nanja van den Broek started freediving in 2001 and in her first competition she immediately set two national records. In 2015, she set a new world record in the discipline Variable Weight with a dive to -130 meters, this record is also her 30th national record.

/ OUR AMBASSADORS

VOYAGES OF AGAPE

USA

voyagesofagape

Agápe is a 1984 Tayana Vancouver 42', hull #93. "Agápē" means unconditional love. She is a true blue water cruiser, and has already seen much of Mexico, the South Pacific, and beyond. For us Agápe is home. She is a safe and trustworthy vessel that will ferry us to the less seen places of the world.

JASON WASHINGTON

Cayman islands

caymanjason

For the past two decades, Jason has been a leader in the Cayman Islands water sports community. A 2017 International Scuba Diving Hall of Fame honoree, Jason's focus both locally and abroad has been on protecting the delicate marine life found in the waters of the C. Islands.

CHRISTINE WEST & ADAM MAIRE

Hawaii

christine_regent_west

After working as scuba instructors, adding cold-water diving was the greatest modification to their portfolio. Working together diving on a project in Alaska opened their eyes wide to documenting undersea life in extraordinarily different environments from the warm waters where they began.

CRESSI, EQUIPMENT PARTNER OF Y-40®

CRESSI SINCE 1946

Y-40 THE DEEP JOY

In March 2019 Cressi officially became the partner of **Y-40® The Deep Joy**, the deepest pool in Europe. From that moment on, the recreational diving and freediving equipment available at Y-40® is provided by Cressi.

Y-40® The Deep Joy is the place where everything is possible, where you can live the most amazing aquatic experiences.

4,300 cubic meters of thermal water where there are free diving and scuba diving courses. It's a safe environment for professional exercises and scientific research, in addition to being an amazing film set and area for photographic and advertising services. Y-40® has an area of 21x18m; the maximum depth is 42.15 meters with different platforms at intermediate depths and caves for technical activities.

The deep pool can be visited, it is possible to walk in the transparent tunnel that crosses the structure, discovering the magic of this big human aquarium.

y40_thedeepjoy

INTERNATIONAL WARRANTY POLICY

In accordance with Directive 1999/44 EC, Cressi guarantees its products against inherent and operating defects. To offer better service to its customers and consumers, and to affirm the efficiency and quality of its manufacturing processes, it has decided to extend the terms of the guarantee as follows:

DIVE COMPUTERS
Two (2) years from the date of purchase (for rental or teaching use: 12 months for operating defects and 24 months for inherent defects).
Exceptions: Flooding caused by incorrect battery installation, LCD display in the case of damage due to negligence or blows, damage due to leaks of substances from the battery (the guarantee is valid if the computer is new and has not been used), damage caused by dead or non-functioning batteries, damage due to negligence, blows, or to normal wear and tear.

ANALOG DEVICES
Two (2) years from the date of purchase (for rental or teaching use: 12 months for operating defects and 24 months for inherent defects).
Exceptions: Damage due to negligence, blows, or normal wear and tear.

REGULATORS
Two (2) years from the date of purchase (for rental or teaching use: 12 months for operating defects and 24 months for inherent defects).
Exceptions: Consumable parts, damage due to negligence, blows, or normal wear and tear.

B.C.d.'S
Two (2) years from the date of purchase (for rental or teaching use: 12 months for operating defects and 24 months for inherent defects).
Exceptions: Consumable parts, damage due to scratches, punctures, abrasions, or chemical products (including chlorine), all damage due to exposure to the sun, damage due to negligence, blows, or normal wear and tear.

DRY SUITS
Two (2) years from the date of purchase (for rental or teaching use: 6 months for operating defects and 24 months for inherent defects).
Exceptions: Consumable parts, damage due to scratches, punctures, abrasions, or chemical products (including chlorine),all damage due to exposure to the sun, damage due to negligence, improper use, blows, or normal wear and tear.

MASKS, FINS, MOUTHPIECES, GOGGLES
Two (2) years from the date of purchase (for rental or teaching use: 12 months for good operations and 24 months for defects of conformity).
Exceptions: Alterations in the color of the silicone, all damage due to exposure to the sun or the effect of chemical or environmental agents, damage due to negligence, improper use, blows, or normal wear and tear.

SPEARGUNS, KNIVES, BAGS, WETSUITS, BOOTS, GLOVES, AND ALL REMAINING PRODUCTS AND CONSUMABLE PARTS
Two (2) years from the date of purchase (24 months for inherent flaws).
Exceptions: Damage due to scratches, punctures, abrasions, or chemical products (including chlorine), all damage due to exposure to the sun, damage due to negligence, blows, or normal wear and tear.

SCUBA COMPUTER WATCH

ALGORITHM FOR MANAGING TWO DIFFERENT HYPER-OXYGENATED MIXES DURING THE DIVE PHASE. GAS1 21-50% GAS2 21-99%

FREEDIVE FUNCTIONS

USER FRIENDLY MENU

LONG-LIFE BATTERY

MINERAL GLASS

HEAVY DUTY CASE

4 OPERATIVE MODES

Cartesio has a diameter of only 48mm and a high contrast display of 35mm. It is a scuba diving/apnea watch-computer of extremely reduced dimensions. It is also an ideal watch for other underwater activities, thanks to the deactivation option of the "dive" functions that avoids unnecessary alarms ringing while you're snorkelling or swimming. The display is made of mineral glass and the case is heavy duty with steel buttons that have an underwater resistance of up to 120m. Rubber wrist band with stainless steel buckle.

BLACK

BLACK/METAL

TECHNICAL FEATURES

- High contrast display with extra large numbers
- Easy access menu
- 12/24 time format with calendar and seconds
- Precision stopwatch
- Second time setting
- Alarm clock
- Backlit display
- Surf time, desaturation and no fly time calculator
- Lets you know when battery is empty
- Metric or imperial units

AIR/NITROX PROGRAM
- CRESSI RGBM algorithm
- Complete diving data processor
- PPO2 1,2-1,6 configuration
- It is possible to select hyper-oxygenated mixes during the dive phase. GAS1 21-50% GAS2 21-99%
- Graphic indicator of CNS toxicity level of oxygen
- Safety stop indicator
- Multiple level safety factor configuration
- Altitude configuration
- Algorithm for managing uncontrolled ascent
- Suitable for repeated, multiday decompression diving
- It is possible to alternate between nitrox and air diving even during desaturation
- Visualisation of time at dive phase
- Add / remove deep stop
- Alarm in case of breach of ascent speed, decompression or PPO2
- It is possible to disable the ascent alarms
- Indicates time at dive phase
- Possibility of eventual total reset, useful for renting purposes
- Planning: scrolling of no-decompression limits

FREE (APNEA) PROGRAM
- Display of all diving parameters
- Depth
- Temperature
- Dip counter
- Maximum dive depth
- Dive time
- Length of surface interval between each dive
- Length of diving session
- Depth, dive time and surface interval alarms
- Recovery time alarm
- Visualisation of time at dive phase

GAUGE PROGRAM (without decompression calculator)
- Depth/temperature indicator
- Average depth
- Dive time in minutes and seconds
- Resettable depth stopwatch
- Visualisation of time at dive phase

OFF MODE
Sensors disabled for snorkelling/swimming activities

LOGBOOK up to 50 dives per category.

Optional **INTERFACE** with visualisation of diving profile

MINERAL GLASS | HEAVY DUTY CASE | METAL BEZEL | SILICONE STRAP WITH POLYAMIDE CORE

PROTECTION ALGORITHM FROM TARAVANA | EDEMA PROTECTION FUNCTION | USER FRIENDLY MENU | LONG-LASTING BATTERY

FREEDIVING COMPUTER WATCH

With a case diameter of only 48 mm and a high-contrast display of 35 mm, King is an extremely compact watch-computer specific for freediving. This innovative product boasts an algorithm developed in Cressi, which protects the freediver from the risk of Taravana, and a function that avoids the risk of pulmonary edema.

Mineral glass, heavy duty case with steel buttons for resistance to water pressure up to 120 m, metal bezel in AISI 316 steel with surface treatment and Inkfilled technology for the inscription, silicone and polyamide strap (to prevent tears and breakage) with stainless steel buckle.

RAFFAELLO

SPECIALIZED Retailer-Product

NEW 2023

ALGORITHM FOR MANAGING DIFFERENT HYPER-OXYGENATED MIXES DURING THE DIVE PHASE. GAS1 21-50% GAS2 21-99% GAS3 21-99%

FREEDIVING FUNCTION

RECTANGULAR WIDE SCREEN SCUBA DIVING COMPUTER

Raffaello is a diving computer with a flat, large display. It is thought to give the diver the maximum data readability. Despite its thinnes and lightness it is very resistant and robust.The body of raffaello reinforced material through micro-structured nano charges. It features a mineral Borosilicate glass, extremely resistant to scratches. Two sturdy metal buttons allow for an easy access to data menus. They will not lock and function in any water condition, even in the presence of mud.
The wrist band is made of silicon. It is safe, robust and comfortable at the same time.
The circuit architecture and it new generation components allow an extremely long battery life

TECHNICAL FEATURES

- High contrast display. Very large numbers, position for an easy reading.
- Intuitive, easy access menu
- 12/24 time and calendar
- Back lighted display
- Surface time, Desaturation time, no fly time
- Low battery warning
- Metric or imperial measures
- Long lasting battery
- User replaceable battery

DIVE (AIR/NITROX) PROGRAM
- Cressi RGBM Algorithm
- Complete dive data elaborator
- PPO2 1,2-1,6 setting
- Different air mixes manageable during the dive: GAS 1 21-50% GAS 2 21-99% GAS3 21-99%
- Graphis indicator of oxygen toxicity levels at CNS
- Safety stop indicator
- Safety factor can be set at different levels
- Altitude setting
- Uncontrolled emersion algorithm
- Possibility to alternate Nitrox and Air dives during desaturation
- Time visible during the dive
- Possibility to insert/cancel a Deep stop
- Loud alarms in case of violation of ascent speed, decompression stop or PPO2
- Ascent alarms can be disabled
- Total reset possible. Useful for rentals.
- Possibility to plan dives without decompression

FREE (APNEA) PROGRAM
- Visualization of all diving data
- Depth
- Water temperature
- Dive counter
- Maximum depth of the dive
- Dive time
- Surface interval between dives
- Duration of the diving session
- Surface interval
- Recovery time alarm

GAGE PROGRAM (without decompression calculator)
- Depth/temperature indicator
- Average depth
- Dive time in minutes/seconds
- Depth chronometer can be reset
- Daytime visible during dive

OFFMODE
- Sensors are disabled to allow snorkeling and swimming

LOGBOOK to 50 dives per program type

Michelangelo has a high contrast display. It is a scuba diving/apnea computer. It is an ideal computer for other underwater activities, thanks to the deactivation option of the "dive" functions that avoids unnecessary alarms ringing while you're snorkeling or swimming. The display is made of technical polyolefin and the case is heavy duty, with a steel button. The underwater resistance is up to 150 m. TPU rubber wrist band with stainless steel buckle.

BLACK

BLACK/METAL

BLACK/COPPER

TECHNICAL FEATURES

- High contrast display with extra large numbers
- Easy access menu
- 12/24 time format with calendar
- High power backlit display
- Surf time, desaturation and no fly time calculator
- Lets you know when battery is empty
- Metric or imperial units

AIR/NITROX PROGRAM
- CRESSI RGBM algorithm
- Complete diving data processor
- PPO2 1.2-1.6 configuration
- It is possible to select hyper-oxygenated mixes during the dive phase. GAS1 21-50% GAS2 21-99%
- Graphic indicator of CNS toxicity level of oxygen
- Safety stop indicator
- Multiple level safety factor configuration
- Altitude configuration
- Algorithm for managing uncontrolled ascent
- Suitable for repeated, multiday decompression diving
- It is possible to alternate between nitrox and air diving even during desaturation
- Visualisation of time while diving
- Add / remove deep stop
- Alarm in case of breach of ascent speed, decompression or PPO2
- It is possible to disable the ascent alarms
- Possibility of eventual total reset, useful for renting purposes
- Planning: scrolling of no-decompression limits
- Maximum dive depth alarm

FREE (APNEA) PROGRAM
- Display of all diving parameters
- Depth
- Temperature
- Dip counter
- Maximum dive depth alarm
- Dive time
- Length of surface interval between each dive
- Length of diving session
- Depth, dive time and surface interval alarms
- Recovery time alarm
- Visualisation of time at dive phase

GAUGE PROGRAM (without decompression calculator)
- Depth/temperature indicator
- Average depth
- Dive time in minutes and seconds
- Resettable depth stopwatch
- Visualisation of time at dive phase

LOGBOOK up to 50 dives per category

Replaceable **PROTECTIVE DISPLAY** screen
User-replaceable batteries
Structural metal bezel that gives greater impact resistance

Optional **INTERFACE** with visualisation of diving profile

DONATELLO

SCUBA DIVING COMPUTER

Donatello is an underwater and freediving computer. It is ideal for other water activities, thanks to the deactivation option of the "dive" functions, that avoids unnecessary alarms while snorkeling or swimming. It has a high contrast display. The heavy-duty case with a steel button is fitted with a bezel which, like the protection, is plastic made. The underwater resistance is up to 150 m. The two-tone wrist band is made of TPU rubber with a stainless steel buckle.

FREEDIVING FUNCTION | DIVE AIR/NITROX PROGRAM

LEONARDO

SCUBA DIVING COMPUTER

An elegant expression of simple, functional design, the Leonardo is a must-have for divers entering the sport and those who "just want to dive." A single button interface makes it effortless to program Air, Nitrox and Gauge modes the first time a diver picks the computer up, and an edge-to-edge, high-definition screen gives large numerical displays in a computer that is still compact and travel-friendly.

The clearly visible battery life indicator and distinct audible alarms deliver critical information as well as peace-of-mind during the dive. The Leonardo can also be fully re-set after each use, making it an excellent choice for rental departments

BLACK/BLACK

TECHNICAL FEATURES

- Air, Nitrox and Gauge modes
- FO2 adjustable between 21% and 50%
- PO2 adjustable between 1.2 bar and 1.6 bar
- CNS oxygen toxicity graphic indicator
- Single button interface (short push changes function, longer push selects functions)
- Three levels of user-adjustable conservatism
- User-selectable Deep Stop function
- Modified Haldne and Wienke algorithm
- Ascent rate alarm (10 m per minute)
- Log book for 60 dives/75 hours of information with 20-second sampling rate
- Battery life indicator
- Distinct, easy-to-hear audible alarms
- User changeable battery
- Adjustable unit of measure: English or Metric
- Backlit display
- Built-in calendar and clock
- Possibility of eventual total reset, useful for renting purposes

ATELIER offline product

2 INSTRUMENTS CONSOLE

COMPUTER + PRESSURE GAUGE

MINI PRESSURE GAUGE
It is a small, light-weight gauge that has been specifically designed to avoid excessive strain on the HP hose that connects to the first stage of the regulator. The instrument has a metal case in chromium plated brass and is therefore extremely strong. The front glass is made so that it also acts as a pressure relief valve. In the event of a sudden increase in pressure inside the instrument, the glass rises slightly, allowing the excess pressure to escape. The luminescent dial is calibrated up to 350 bar in the metric version and 5000 psi in the imperial one. The area below 50 bar is highlighted in red, the one between 50 and 200 is green and that from 200 to the end of the scale is light blue.

The instrument is housed in a small, modern shaped console, made from polycarbonate and desmopan, two materials that guarantee protection from shocks and scratches and which, at the same time, are very light. On the top of the console there is a loop for fastening the instrument to the jacket so that it does not hang down with the risk of catching and damaging the environment.

WATCHES

SEA LION

LIMITED EDITION

GOLD LABEL WATCH

25 JEWELS | CORRECTOR | EXCLUSIVE DEDICATED PACKAGING

AUTOMATIC WINDING | 28,800 VIBRATIONS PER HOUR

The Sea Lion is the first Cressi Gold Label limited edition product and identifies a lifestyle belonging to the brand. It is suitable for all water sports, but also for the daily life of water lovers. The watch, 100% Swiss Made, water-resistant to 300 metres, has a stainless steel case, a sapphire crystal front and a transparent sapphire crystal back. The 120-click unidirectional rotating bezel is graduated to 60 minutes with an anodised aluminium disc, to provide the diver with an accurate indication of dive times. The self-winding mechanical movement is customized for Cressi Sub. The winding crown is at 16 o'clock, in steel with the Cressi brand engraved, in a functional position if wearing the wetsuit. Thus, the sturdy, comfortable and lightweight rubber strap allows precise adjustment of its length, so that it can be placed on the wrist above any sporting wear.

SILVER/BLUE

BLACK/BLACK

BLACK/ORANGE

TECHNICAL FEATURES

Case	· bearing design · transparent sapphire-glass back · winding crown
Diameter	44 mm
Material	Steel
Bezel	· unidirectional rotatable 60-minutes graduated · anti-scratch anodized aluminium · numerals and graduations engraved
Winding Crown	Screw-down, at 16 o'clock
Crystal	Scratch-resistant sapphire
Waterproof	To 300 meters / 1,000 feet
Movement	· automatic · mechanical · self-winding
Calibre	Eta 2824-2
Precision	-2/+2 Sec./Day
Functions	· Centre hour, minute and seconds hands · instantaneous date with rapid setting · stop-seconds for precise time setting
Winding	Bidirectional self-winding
Power Reserve	Approximately 48 hours
Strap	Soft and comfortable with non-slip texture
Material	Black rubber
Buckle	Steel safety buckle
Details	Highly legible display with luminescent material

DIGITAL PRESSURE + DEPTH GAUGE

Designed for the harshest conditions, this extremely precise console is also easy to be used.

Protective smart cover included

TECHNICAL FEATURES

- Automatic activation with connection to the tank
- High contrast display
- Depth indicator 0-120 meters
- Tank pressure indicator 0-300 bar
- Water temperature indicator -10/+50 °C
- Residual gas autonomy in minutes indicator
- Gas reserve below 50 bar indicator
- Maximum depth of the last dive
- Autonomy up to 1000 hours in immersion
- Low battery indicator
- Self-diagnosis for battery change (patented)
- User-replaceable silicone protective shell
- Dimensions: 9.9 x 5.2 x 2.8 cm

350 BAR / 5000 PSI PRESSURE READINGS | ROTATING BEZEL COMPASS

COMPASS + PRESSURE GAUGE

Compact and built to last, this console combines a Mini SPG and a compass.
The textured boot is easy to handle, even while wearing gloves, and can be rigged with a clip or bungee and secured to the diver's BC for a streamlined profile in the water.

TECHNICAL FEATURES

- Compass with rotating bezel for easy navigation
- Pressure gauge dial is color-coded in red, green and blue for instant readability.
- Reads pressures to 350 bar.
- Both instruments built with chrome-plated brass case for maximum durablity.
- Compact rubber boot is textured for a sure grip.
- One connection loop, at the top side, for attaching a clip or bungee.
- Weight of console: 420 g (includes hose).

PD2

350 BAR / 5000 PSI PRESSURE READINGS | 70 M DEPTH GAUGE

PRESSURE GAUGE + DEPTH GAUGE

Compact and built to last, this two-gauge console combines a Mini SPG and depth gauge.
The textured boot is easy to handle, even while wearing gloves, and can be rigged with a clip or bungee and secured to the diver's BC for a streamlined profile in the water.

TECHNICAL FEATURES

- Pressure gauge dial is color-coded in red, green and blue for instant readability.
- Reads pressures to 350 bar.
- Mini-depth gauge reads to 70 meters.
- Maximum depth indicator.
- Luminescent face on the depth gauge.
- Depth indications spaced out in first 12 meters (40 feet) for precise readings during safety stops.
- Both instruments built with chrome-plated brass case for maximum durablity.
- Compact rubber boot is textured for a sure grip.
- One connection loop, at the top side, for attaching a clip or bungee.
- Weight of console: 420 g (includes hose).

REGULATORS

ATELIER offline product

MADE IN ITALY

1ST STAGE T10 SC CROMO

2ND STAGE GALAXY ADJUSTABLE

HIGH PERFORMANCE REGULATOR

CERTIFIED EN 250/2014 FOR COLD WATERS

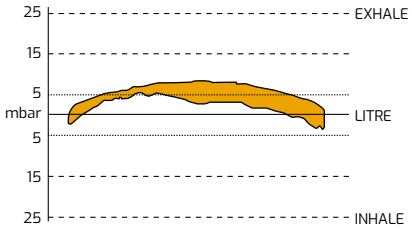
Very high performance regulator, same mechanics as the T10 Master. Ideal for seasoned or professional divers who need extremely high performing equipment that is both simple and resistant, without any of the usual accessories that may get damaged.

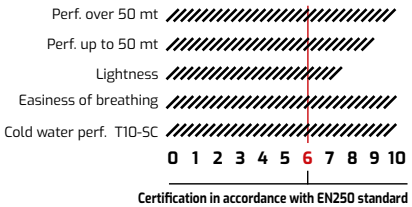
Set (INT) + Hose tot. weight	1075 gr
Set (DIN) + Hose tot. weight	957 gr

T10-SC CROMO GALAXY-R
INT REGULATOR

T10-SC CROMO GALAXY-R
DIN REGULATOR

RESULTS:
INHALE, EXHALE PRESSURE AND EXT WORK OF BREATHING





TECHNICAL FEATURES 1ST STAGE

- Hyperbalanced diaphragm (Watertight chamber on T10-SC)
- 2 HP 7/16 UNF ports
- 4 MP 3/8 UNF ports
- Operating pressure: 300 bar (4350 psi) DIN Version,
- 232 bar (3365 psi) International version
- Calibration pressure: 10 bar
- High-capacity conical filter in chemically nickel-plated spherical bronze
- Removable nozzle in AISI 316 steel
- Hyperbalancing system
- Anti-pressure drop pneumatic spring
- Stainless steel calibration spring with micropeening treatment
- Low-friction technopolymer slider shaft
- Body protection in polyurethane thermoplastic
- Quantity of air supplied: 4500 l/min
- Weight, INT version: 720 gr
- Weight, DIN version: 602 gr

TECHNICAL FEATURES 2ND STAGE

- Pneumatically balanced
- Adjustable Venturi
- Adjustable inhalation effort
- Patented elliptical diaphragm
- Patented low-friction lever
- Air delivery system without injector
- Adjuster knob with dual OR
- Internal heat exchanger
- Cap opening with Cam-lock
- Noise-absorbing technopolymer body
- Removable technopolymer deflector
- Removable mechanics
- Weight without hose: 202 gr

COMBINATION PERFORMANCE

- Average Cracking effort 3.5 mbar
- Average breathing effort 0.6 J/l

Jacketed hose extremely light and flexible weight: 153 gr

Certification EN250/2014 for cold water

MADE IN ITALY

1ST STAGE AC25m 2ND STAGE MASTER CROMO

CRESSI 3RD GENERATION FIRST STAGE | FIRST STAGE ADJUSTABLE PISTON | CERTIFIED EN 250/2014

The AC25 is the third generation of Cressi's IP adjustable balanced piston first stage. It features 2 high-pressure ports and 5 low-pressure ports. 4 low-pressure ports are located on a rotating turret that ensures that regulator and instrument connections are always in the right position. The fifth port is a co-axial Hi-Flow port and is located at the top of the turret.

The rotating turret swivels on 360° axis and features 5 low-pressure ports designed to allow the use of more connections without interfering between them. It features the external direct IP adjustment system that can be set using a simple Allen key. The hi-flow conic shape filter is the same for INT and DIN. The spring and the spring bush are coated preventing rust. Its technologically advanced design delivers consistent intermediate pressure and high performance even with low tank pressures. The AC25m it features a matte finish, in gun metal-coated brass. It is combined with the Master Cromo, the pneumatic balanced 2nd stage that features an elliptical shape and a lateral knob for Venturi adjustment.

MADE IN ITALY

1ST STAGE MC9 SC 2ND STAGE COMPACT PRO

HIGH PERFORMANCE REGULATOR

CERTIFIED EN 250/2014 FOR COLD WATERS

In order to achieve extremely high performance in low temperature environments, the second stage in particular was designed with the special Thermoconductive Thermoplastic Neopolymer that has the capacity to transfer heat like a metal while preserving the design flexibility, chemical resistance, and physical and mechanical properties of a conventional thermoplastic. That is, it makes it possible to drastically reduce the weight while delivering heat conductivity on a par with metal cases. Thanks to this material and a specially conceived purge valve, it passes EN 250 cold water tests.

MG BALANCED

SPECIALIZED Retailer-Product

NATURAL AND EFFORTLESS BREATHING | PNEUMATICALLY BALANCED VALVE | CERTIFIED EN 250/2014 FOR COLD WATERS

OCTOPUS

Octopus regulator specially designed for the most demanding divers. Its main feature is a pneumatically balanced valve that minimises the breathing effort. The Venturi effect adjuster on the mouthpiece tube increases and decreases the air flow, doing away with the risks associated with free-flow. When scuba diving, breathing is natural and effortless. Thanks to its light weight and ergonomic design, this regulator is very handy and easy to use. Weight without the whip: 182 g.

TECHNICAL FEATURES

- Pneumatically balanced
- Venturi effect adjustment
- Patented elliptical membrane
- Patented low-friction lever
- Air delivery system without injector
- Internal heat exchange
- Cam-lock system to open the case
- Body in noise-absorbent technopolymer
- Removable technopolymer deflector
- Removable mechanical parts
- Weight without whip: 182 gr

Jacketed hose extremely light and flexible weight: 153 gr

Replacement hoses for regulators

*See compatibility warnings!

* COMPATIBILITY WARNINGS !

The 1st stages and hoses are sold ONLY as a replacement for the regulator combination for which its use is envisaged under the regulatory requirements in force. Therefore it may only be used as a replacement for the combination with second stages called for in the EC certificate for the type that concern it as well as the EC declaration of conformity for the product according to Regulation (EU) 2016/425, which can be viewed at www.cressi.com. Cressi Sub declines all responsibility for any other use that does not conform with the requirements dictated by the regulations in force.
The combinations of the certified Cressi regulators are contained in the last page of the Regulator user manual which can be read or downloaded from www.cressi.com using the following QR Code:

COMMANDER EVOLUTION

ATELIER offline product

HIGH LIFT CAPACITY | NYLON 420 D BACK CELL | FLAT LOCK AID WEIGHT SYSTEM

HIGH VOLUME BACK INFLATION B.C.D.

The Commander Evolution Jacket is an impressively light high-buoyancy rear-mounted BC, anatomically designed for maximum comfort and wearability. Its main features are its detachable harness and air cell. The rear-mounted air cell interferes neither with the main underwater component nor the adjustment straps, not even when it is inflated to the maximum. This means extra freedom of movement and buoyancy for the diver. The special air cell compression strap guarantees extra quick deflation and volume control. The ultralight rigid back plate with its integrated carrying handle ensures optimal stability. Its integrated Cressi Flat-Lock-Aid weight system makes it extra easy to release the pockets and rear ballast bags (attached to the tank-block band). Accessories include four 50mm shoulder aluminium D-rings and four 25mm aluminium D-rings (of which two on the pockets and two on the lower part of the harness). There are 3 pressure relief valves: one on the upper part of the hose, one reel-operated valve on the right-hand side of the shoulder and a third on the lower right-hand side of the air cell.

TECHNICAL FEATURES

- Development of rear-mounted air cell
- Air cell material: 420 denier nylon
- Integrated Cressi Flat-lock Aid weight System
- 2 rear ballast pouches
- 3 pressure relief valves
- Four 50mm aluminium D-rings on the shoulder straps
- Four 25 mm stainless steel D-rings (2 on the pockets and 2 on the lower part of the harness)
- Ultralight rigid back plate with carrying handle
- Next generation anatomical inflator with hose retainer
- Multipurpose zip pockets
- 50 mm quick-release buckled shoulder straps

CARBON ATELIER offline product

NYLON 420 D BACK CELL | FLAT LOCK AID WEIGHT SYSTEM

EXTREMELY VERSATILE B.C.D.

The Carbon jacket is a classically built BCD. Its intermediate buoyancy level makes it extremely versatile and suitable in any situation. The ergonomic design of the inflator mechanism makes inflating and deflating extra easy and the practical hose retainer keeps it compact and safe. Its special ultralight back plate maintains the tank body compact which significantly improves both underwater and surface buoyancy and comfort.

TECHNICAL FEATURES

- 420 denier nylon air cell
- Ultralight, rigid back plate with carrying handle.
- Next generation ergonomic inflator with hose retainer.
- 2 multipurpose zip pockets
- Rear ballast pockets.
- Shoulder straps with 50 mm quick-release buckles.
- 2 pressure relief valves

FLAT LOCK SYSTEM

SCORPION

SPECIALIZED Retailer-Product

NYLON 420 D BACK CELL | FLAT LOCK AID WEIGHT SYSTEM

ANATOMICAL BACK INFLATION B.C.D.

The Scorpion Jacket is an impressively light high-buoyancy rear-mounted BC, anatomically designed for maximum comfort and wearability. Its main features are its detachable harness and air cell. The rear-mounted air cell interferes neither with the main underwater component nor with the adjustment straps, not even when it is inflated to the maximum: this means extra freedom of movement and buoyancy for the diver. The special air cell compression strap guarantees extra quick deflation and volume control. The ultralight semi-rigid harness ensures optimal stability and high comfort with its air-net fabric. Its integrated Cressi Flat-Lock-Aid Weight System makes extra easy to release the pockets.

TECHNICAL FEATURES

- Development of rear-mounted air cell
- Air cell material: 420 denier nylon
- Integrated Cressi Flat-Lock-Aid Weight System on a back vertical position
- 2 pressure relief valves
- Two 50 mm aluminium D-rings on the shoulder straps
- Two 25 mm aluminium D-rings on the pockets
- Ultralight semi-rigid harness
- Next generation anatomical inflator with hose retainer
- Multipurpose zip pockets with weight pockets inside
- 40 mm quick-release buckled shoulder straps
- Side adjustable lumbar flaps

ANODISED LIGHT ALLOY BACK PLATE | NYLON 210 D AIR BLADDER | MODULAR ADJUSTMENT SYSTEM

ONE SIZE FITS ALL

Aquawing is the one-size donut jacket designed to adapt to all anatomies (male and female) using the new patented MAS (MAS (Modular Adjustment System): in fact, the single 50 mm belt that embraces the shoulders and waist can be rapidly adjusted to your size.
The shape of the air bladder has been designed to ensure perfect buoyancy with a monocylinder.
The anodised light alloy back plate reduces the overall weight of the jacket while guaranteeing stability and safety in use. The special cylinder rest in thermoplastic rubber integrated with the back of the jacket guarantees the positioning of the tank for optimum trim.
The shoulder straps and back cover are made with an air-net material to enhance comfort and improve water drainage.
The back cover is equipped with a special pocket designed to house the decompression buoy.

TECHNICAL FEATURES

- One-size-fits-all (XS / XL)
- Air bladder: 210 D nylon
- Air bladder cover: 1500 D cordura
- MAS (Modular Adjustment System)
- 2 Stainless steel D-ring + 1 optional

PATROL

NYLON 420 D BACK CELL

FLAT LOCK AID WEIGHT SYSTEM

ESSENTIAL BACK INFLATION B.C.D.

The Patrol BC is an impressively light weight, rear inflation BC that is anatomically designed for maximum comfort and durability. The special air cell compression strap guarantees extra quick deflation and volume control. The ultralight rigid back plate with its integrated carrying handle ensures optimal stability. The Patrol also features Cressi's Flat-Lock-Aid integrated weight system that makes it easy to release the pockets. There are 3 pressure relief valves: one on the upper part of the hose, one valve on the right-hand side of the shoulder and a third on the lower right-hand side of the air cell. The Patrol also features plastic d-rings to help reduce weight and the shoulder and waist harness are fully adjustable to one full size up or down from the stated size.

FLAT LOCK SYSTEM

AQUARIDE

BUOYANCY CONTROL JACKET

NYLON 420 D STANDARD CELL | FLAT LOCK AID WEIGHT SYSTEM

Aquaride is a semi-classic structured BC with a special feature: it has adjustable shoulder straps that aren't restricted by the air cell, improving the grip on the tank and improving comfort.
Thanks to their anatomical, preformed profile, they are much easier to put on and make resting the tank more comfortable on the shoulders.

The BC features the Flat type Lock Aid System of integrated weight. It is very effective and comfortable thanks to its extremely flat profile and the easy and intuitive arrangement of the pockets. Finally, the anatomical control has a hose retainer, making all inflation and deflation operations very easy and intuitive.

TECHNICAL FEATURES

- 420 Denier Nylon bag.
- Flat system Lock Aid System integrated weight.
- Superlight rigid backpack with handle.
- Next generation anatomical inflator with hose retainer.
- Expandable sundries pocket with zip closure.
- Quick-attach rear weight pockets (capacity 2 kg).
- 2 overpressure valves.

DESIGNED FOR FEMALE ANATOMY | FLAT LOCK AID WEIGHT SYSTEM

SPECIFICALLY DESIGNED FOR WOMEN

The Elettra jacket has been conceived to adapt to the female anatomy. The exclusive design and technical features provide perfect buoyancy with a close-fitting profile. The 40 mm buckles (shoulder-waist) adapt perfectly to the female anatomy. The lower band of the shoulder strap is anchored to a ring to ensure rotation and therefore maximum adaptability to the female anatomy. The internal part is fully lined with air-net material, with thicker padding to increase comfort and improve water drainage. The two-piece waist band uses the new patented SPWB (Self Pivoting Waist Band) system. The soft and padded semi-rigid back plate permits the BCD to be folded and transported with the minimum possible volume. The Cressi Flat Lock integrated ballast system makes the extraction of the weight bags particularly easy. The jacket's two integrated cylinder supports improve the diver's trim.

TECHNICAL FEATURES

- Female anatomy (SIZES: XS-S-M-L)
- Air bladder: nylon 420 D
- Pockets and shoulder straps: cordura 1500 D
- Self Pivoting Waist Band
- Integrated Cressi Flat-Lock Aid weight System
- 2 zip up pockets for accessories
- Semi-rigid harness
- 6 D-rings in stainless steel
- 2 overpressure valves

FLAT LOCK SYSTEM

IDEAL FOR TRAVEL

NYLON 420 D STANDARD CELL | FLAT LOCK AID WEIGHT SYSTEM

AVIATOR

EASY ADJUSTABLE TRAVEL B.C.D.

Aviator is a B.C. with a classic structure designed for travel. The 50 mm buckle of the shoulder strap is pivoting according to a new Cressi patent, to guarantee perfect adaptability to all body shapes. The modular system of the abdominal band, with exclusive Cressi design, offers the possibility to quickly change the band itself – divided into two parts – to adapt to different sizes. The adjustable mechanical pivot system and the presence of an elastic band in the two parts of the band guarantee superior comfort. The semi-rigid, soft and padded back allows you to fold and carry the B. C. in the smallest possible space. The special air-net material in the shoulder straps and back ensures greater comfort and water drainage. The Integrated Cressi Flat-Lock Aid weight System makes it very easy to remove the lead pockets. Two supports, that are integrated in the B.C. for fixing the tank, improve the diver trim.

TECHNICAL FEATURES

- 420 denier nylon material
- Self pivoting waist band
- New 50 mm pivoting shoulder strap buckle
- Rubbery material (rear)
- Integrated Cressi Flat-Lock Aid weight System
- 2 zip up pockets for accessories
- 2 rear weight carrying pockets
- Semi-rigid harness
- D-rings and rings in light alloy
- 2 overpressure valves
- Rear release valve with control brought to the front

HIGH LIFT CAPACITY | CORDURA 500 D STANDARD CELL | FIXED GRAVITY POCKETS

ROBUST WEIGHT POCKET INTEGRATED B.C.D.

Its high level of buoyancy (notably in the smaller models) makes this jacket ideal for beginners, diving schools or renting.

TECHNICAL FEATURES

- 500 denier cordura (exterior) and 420 denier nylon (interior)
- External ballast-carrying pockets with quick-release safety buckle
- 2 very big multipurpose zip pockets
- ultralight rigid backplate with carrying handle.
- 2 pressure relief valves.
- Four 40 mm engineering plastic D-rings (2 on the shoulder straps and 2 on the lower part of the air cell.
- Two 25mm engineering plastic D-rings on the pockets.
- Size indicated clearly on the shoulder strap.
- Shoulder straps with 50mm buckles.

ROBUST B.C.D.

HIGH LIFT CAPACITY | CORDURA 500 D STANDARD CELL

Simple, robust and efficient jacket designed for diving centers' needs and for professional work companies that want a reliable product, of great resistance and with affordable price.

TECHNICAL FEATURES

- It has a sack that combines Cordura© 1000 Deniers on the outside, pockets and shoulder pads, and 500 Deniers on the inside part.
- Manometer and octopus fixation integrated system, really useful especially for diving centers.
- High-capacity pockets with closing by Velcro and a wide lapel.
- Abdominal strap separated from the sack to eliminate the oppression during the inflation.
- Chest strap.
- Very light and resistant semi rigid back pack.
- Size visible on the right shoulder pad.
- Small pocket over the shoulder pad that allows introducing in the octopus' hose folded.
- Direct System with double air filtering system easily removable in case of emergency cleaning.
- Extraordinary relationship size / ascensional capacity thanks to its new pattern and to the spacers installed inside the sack: T/XS 13,3 kg; T/S 14,3 kg; T/M 15,3 kg; T/L 17,3 kg; T/XL 20,4 kg.

QUARTZ

DESIGNED FOR DIVE CENTERS

HIGH LIFT CAPACITY | CORDURA 500 D STANDARD CELL | FLAT LOCK AID WEIGHT SYSTEM

Quartz, that has a good buoyancy, is the ideal B. C. for scuba diving schools and equipment rental centres. The Integrated Cressi Flat-Lock Aid weight System makes it very easy to remove the lead pockets. It features a coloured reinforcement band in the upper part of the back, at neck level, to enhance visibility in the water and protect the jacket from the abrasive action of the first stage. The sternal attachment is closed by a buckle, which also serves as a safety whistle.

TECHNICAL FEATURES

- 500 denier Cordura material (exterior and interior part)
- Integrated Cressi Flat-Lock Aid weight System
- 2 large accessory holder zip-up pockets
- Light-weight, rigid backplate with carry handle
- 2 overpressure dump valves
- 2 25 mm technopolymer D-rings on the pockets
- Size shown on shoulder straps
- 50 mm shoulder straps with buckles.

Pressure Gauge

TECHNICAL FEATURES 1ST STAGE

- Unbalanced piston
- 1 outlets HP 7/16 UNF
- 4 outlets MP 3/8 UNF
- Service pressure: 300 bar (4350 psi) DIN version, 232 bar (3365 psi) Yoke version
- Calibration pressure: 9,5-10 Bar
- Brass body Electroless Nickel plated
- High capacity conical filter electroless nickel plated
- Aisi 316 long lasting piston
- Easy external direct IP adjustment system
- Stainless steel spring
- Flow rate: 2100 l/min
- Yoke version weight: 635 gr
- Din version weight: 495 gr

TECHNICAL FEATURES 2ND STAGE

- Downstream system
- Adjustable Venturi effect
- Patented antifriction lever
- Big purge button
- Anti-scratch surface
- Bayonet-type cap holder with security lock
- Removable exhaust tee without tools
- Weight without hose: 135 gr

Jacketed hose extremely light and flexible weight: 153 gr

Certification EN250/2014 A>10° C

TECHNICAL FEATURES B.C.D.

- 500D Cordura (exterior part) and 420D Nylon (interior)
- 2 large accessory holder zip-up pockets
- Light-weight, rigid backplate with carry handle.
- 2 overpressure dump valves
- 2 25 mm technopolymer D-rings on the pockets
- Size shown on shoulder straps
- 50 mm shoulder straps with buckles.

GLACIER

SPECIALIZED Retailer-Product

NEW 2023

THICKNESS 4 MM HIGH DENSITY | ANTI-ABRASION X-DIAMOND PADS | ADDITIONAL PROTECTIVE NEOPRENE COLLAR

HIGH DENSITY 4 mm DRYSUIT

Glacier is a 4mm precompressed high-density neoprene, heavy duty, dry-suit.
The main feature of Glacier is in its collar and wrist sealing. It is made of latex. This ensures the best adherence possible to your body and minimizes the chance of water leaking in the suit. Both collar and wrist sealing are customizable. Have them cut to your precise size to have a perfect fit. Collar and wrists are replaceable too, in case they wear out or accidentally tear. Glacier features a second 1,5 mm neoprene collar, for additional thermal protection.
Shoulders, back, hips and knees are reinforced with X-Diamond pad material, making this wetsuit very resistant to abrasion. The feet are made of soft and elastic neoprene for a comfortable fit.
Inside the dry-suit a pair of suspenders will hold the suit in place when it is open. The zip is covered by a neoprene flap.
The charging valve is activated by a side button, while the deflating valve is adjustable.
Glacier features two large pockets on the sides of the legs to comfortably place the additional gear you want to carry with you underwater.

TECHNICAL FEATURES

- 4 mm High-density prestressed neoprene (external / internal nylon)
- Double storage pocket (one on the right and one on the left)
- Latex collar and cuffs
- Additional 1.5 mm neoprene thermal protection collar
- Shoulders, upper back, hips and lumbar area, knees with the special anti-abrasion X-Diamond Pad lining.
- Soft neoprene boots
- Internal braces
- Zipper flap
- Side-operated swivel fill valve
- Adjustable discharge relief valve

LATEX COLLAR + THERMIC NEOPRENE COLLAR

HOOD AND HOSE INCLUDED

DESERT

HIGH DENSITY 4 mm DRYSUIT

THICKNESS 4 MM HIGH DENSITY | METALLIC BACK ZIP | HIGH STRETCH SPANFLEX MATERIAL | LIQUID SEAL TECHNOLOGY

Comfortable and resistant thanks to its 4mm thick High-Density pre-compressed neoprene dry suit and Liquid Seal protected stitched joints. The seams and outer neoprene lining are covered with a special layer of elastomer so as to simultaneously create an impermeable obstacle for the water and increased resistance at the joints. On the inside, an additional sealing strip guarantees total waterproof-ability. This double sealing system has been carefully designed to meet the needs of the most discerning and seasoned divers that often require their dry suits to be able to adapt to extreme working or weather conditions. The special Spanflex material has also been used in the outer part so as to increase elasticity and abrasion resistance. The cuffs are made of smooth 3,5 mm-thick neoprene on the inside in order to improve sealability and from Ultraspan on the outside in order to improve elasticity. The collar is made of the same materials but with 2,5mm-thick neoprene for more comfort and breathability when turned-up. The shoulder neck and knee lines are reinforced with a special anti-abrasion X-Diamond Pad lining. The suit comes with a practical multipurpose pocket placed on the right leg as well as a comfortable hood.

TECHNICAL FEATURES

- 4 mm-thick High-Density pre-compressed neoprene.
- Soft neoprene socks.
- Internal suspender system.
- Fly with concealed zip.
- Heavy duty kneepads
- Side action rotating inflation valve.
- Adjustable discharge relief valve.

LIQUID SEAL TECHNOLOGY

A layer of polymer is spread along the seams to protect and seal them, thereby increasing the resistance to wear, the lifetime of the suit, and its insulating power.

SEMI-DRYSUIT 7 mm

One-piece 7 mm semi-dry suit for cold water. Very easy to wear thanks to special outer ELASTIC SPAN cover and internal ELASTIC PLUSH lining.
To facilitate the diver who carries important accessories, the suit is equipped with a convenient double compartment side pocket. One of them has a zipper closure while the other, intended for objects needing faster retrieved, has a Velcro closing. Two D-RINGs allow you to secure objects.
It has a HOOD HOLDER for attaching the hood and special SMALL DYMOND anti-abrasion reinforcements on the shoulders, knees and on the back side.
Double cuffs on wrists and ankles. Comfortable waterproof MASTER SEAL rear zip.

TECHNICAL FEATURES

- 7 mm-thick neoprene
- Elastic-span
- Elastic plush inside
- High volume pocket d-ring and hood holder
- Ankles and wrists with double cuffs

MULTI THICKNESS 8+6+5 MM | FRONT ZIP | ELASTIC SPAN OUTSIDE | X- PLUSH INSIDE | 7-12° C 44.6-53.6° F CE CERTIFICATION DIVING WETSUIT EN 14225-1:2017: A

MULTI THICKNESS WETSUIT 8+6+5 mm

One-piece wetsuit with different thicknesses (8, 6.5 e 5 mm) and attached hood for cold water. The suit is characterized by the WATER STOP SYSTEM, whereby a particular bib inside in ULTRASTRETCH material creates a double barrier against water infiltration and improves thermal insulation.

Transverse front zipper, along with the special ELASTIC SPAN cover and X-PLUSH lining, greatly facilitate the fit and donning. Special 6.5 mm inserts on the arms and legs improve the joint anatomy, enabling smoother motion. Additional pre-bent embossing in the folds of the joints.

SMALL DIAMOND anti abrasion reinforcements on the shoulder and back side (buttocks). Protective reinforcement on the knees. 5 mm hood with Air Free valve to remove the air. Wrists and ankles have double cuffs with a zip; the size is printed in evidence on the inside wrists.

TECHNICAL FEATURES

- Multi thickness wetsuit
- Front zip
- Elastic span outside, x-plush inside
- Ankles and wrists with double cuffs

THICKNESS 7 MM | BACK ZIP | 100% ELASTIC SPAN | ELASTIC PLUSH INSIDE | 10-18° C 50-64.4° F CE CERTIFICATION DIVING WETSUIT EN 14225-1:2017: B

100% HIGH-STRETCH MONOPIECE WETSUIT 7 mm

One piece cold water wetsuit made of 7 mm neoprene, with an outer layer in Elastic-Span and inner lining in Elastic-Plush. These materials make the suit warm and extremely elastic, making it very easy to put on. A YKK zipper (ensuring optimal quality) runs vertically on the back. The knees are reinforced with special protective patches. A very handy pocket on the right leg has two compartments and a useful D-ring. Double sleeves and zippers on wrists and ankles. A special sealing system on the collar minimises water infiltration.

TECHNICAL FEATURES

- 7 mm-thick neoprene
- Elastic-span
- Elastic plush inside
- High volume pocket d-ring and hood holder
- Ankles and wrists with zips and double cuffs
- Anti-seepage collar

FISTERRA SPECIALIZED Retailer-Product

AVAILABLE IN TWO THICKNESS: 8 OR 5 MM | TWO-PIECE WETSUIT | ULTRA DURABLE NEOPRENE

7-12° C 44.6-53.6° F CE CERTIFICATION DIVING WETSUIT EN 14225-1:2017: A — 8 mm CE

16-24° C 60.8-75.2° F CE CERTIFICATION DIVING WETSUIT EN 14225-1:2017: C — 5 mm CE

TWO-PIECE WETSUIT 8 mm, 5 mm

ROBUST WETSUIT ALSO IDEAL FOR COMMERCIAL FISHING

Fisterra was originally born in version 8mm, to respond to the need of professional divers in cold waters. The demand for professional divers, diving instructors and users who demand maximum thermal performance and comfort has encouraged us to incorporate a 5 mm version for temperate waters into the collection.
Fisterra 5 mm is a resistant, very watertight and highly thermal combination with jacket without zippers and high trousers with dungarees.
A combination that combines, therefore, characteristics that place it at the apex of pure performance in a wetsuit of this thickness.
Low-compression LC neoprene that guarantees optimum thermal protection at the bottom due to its high resistance to compression ideal for professional work or long duration diving.
Nylon outer lining of high weight very resistant, interior X-Plush elastic terry loop, waterproof and great sliding that facilitates the placement and removal of the suit at the same time has a large thermal memory.
Wide anti-abrasion knee-spin pads and elbow pads in Supratex©.

MEDAS

TWO-PIECE WETSUIT 5 mm

THICKNESS 5 MM | FRONT ZIP | TWO-PIECE WETSUIT | 16-24° C 60.8-75.2° F | CE CERTIFICATION DIVING WETSUIT EN 14225-1:2017: C

The Medas is a classic 5+5 mm suit apt for dives in temperate waters, and also useful in cold waters with use of an inner vest.
Renovated pattern, with larger more anatomical panels, in a discrete and elegant combination of black and blue for the male version and black and turquoise for the female version, with contrasting seams and the new logos sporting a more modern look. The pattern of this model is derived from the most sophisticated Cressi dive models and thus is very anatomical, with preformed legs and arms for an always-natural position and without any seams in the armpit area.
The purchase price is contained, the pattern, the production, and the attention to details make it a great choice and it is one of the most widely used globally.

TECHNICAL FEATURES

- Wrists and ankles with "Glide Skin" smooth neoprene micro cuff seals
- Powertex® knee-shin pads
- RIRI® 8 pitch diagonal frontal zipper with metallic pull to prevent tearing
- The facial contouring and neck area have a smooth neoprene insert to minimize leaks.
- Pants with a high closed bib and zipper for greater insulation
- Clip closure in male version and swimsuit style in female version

PREMIUM ULTRASTRETCH NEOPRENE

FREE

THICKNESS 3.5 MM | TWO-PIECE WETSUIT | SECOND SKIN SMOOTH NEOPRENE | X-THERMIC MATERIAL LINING

TWO-PIECE WETSUIT 3.5 mm

This two-piece wetsuit has been specially conceived for free diving, Designed to facilitate penetration into the water, it features a very smooth outer surface made of neoprene that has undergone the "Second Skin" treatment, for greatly reduced friction in the water. The low-waist pants without shoulder straps do not apply pressure to the chest and promote effective ventilation.

TECHNICAL FEATURES

SINGLE-PIECE UNDERARM SECTION TO IMPROVE ARM EXTENSION

DOUBLE VELCRO SYSTEM

SKIN

FULLSUIT 1 mm

UV 50+ PROTECTION

THICKNESS 1 MM | FRONT ZIP | 86% POLYESTER 14% SPANDEX

Crafted from 1 mm material (86% Polyester / 14% Spandex), the Skin is a versatile and a must-have fullsuit for traveling divers. The high-stretch material is effortless to swim in and naturally conforms to the body to reduce drag. The Skin provides UV protection on the surface and just the warmth needed for extended snorkeling or diving sessions in tropical waters. A long front zip makes the Skin easy to put on and the suit easily layers under thicker dive wear.

TECHNICAL FEATURES

- High-stretch 1 mm material easy to swim in
- Heel straps providing a secure fit
- Easy to don with front-entry zipper

LIDO

NEW 2023

THICKNESS 2 MM | FRONT ZIP

MONOPIECE WETSUIT 2 mm

The easy-entry, front zipper placement of the Lido makes it effortless to put on. It is perfect for snorkeling in tropical waters, swimming, surfing and other activities. Highly flexible 2 mm Neoprene and a flattering cut conform easily to most body shapes for a great fit. The absence of seams under the arms prevents the intrusion of water. Fabric cuts are anatomical for both men and women. The legs and sleeves are finished with a simple, economic, and reliable Overlock cuff.

TECHNICAL FEATURES

- Full front-zip wetsuit.
- Designed and created using innovative and patented manufacturing technology.
- Double-lined neoprene for durability and warmth.
- YKK zippers for durability - Front zip entry for easier donning.
- Always a comfortable fit.

DIVER

MONOPIECE WETSUIT 7 mm, 5 mm

AVAILABLE IN TWO THICKNESS: 7 OR 5 MM | FRONT ZIP | JUNIOR SIZES AVAILABLE

10-18° C 50-64.4° F 7 mm
CE CERTIFICATION DIVING WETSUIT EN 14225-1:2017: B

16-24° C 60.8-75.2° F 5 mm
CE CERTIFICATION DIVING WETSUIT EN 14225-1:2017: C

All-in-one suit available in 5 and 7 mm double lined neoprene, with incorporated hood and front zip fastening which has recently been up dated, both technically and aesthetically.
Traditional all-in-one suit for dives in warm waters, very easy to put on and take off,
designed to offer great freedom of movement.
The legs are pre-shaped to allow the natural, typical bending of the limbs when swimming.
The front zip stretches from the waist to the right cheek.

A smooth neoprene seal runs along the edge of the facial profile of the hood thus limiting water infiltration and increasing comfort.
There are reinforced anti-wear pads on the knees.
At the wrists the seal is guaranteed by double lined cuffs, the same solution is also used at the ankles, in this case, however, they have handy zips to help the user put on and take off the suit.
Available in men's, women's and children's versions.

WHO IT IS FOR

Diver is a wetsuit that has been designed for scuba diving in warm waters, like those of the Mediterranean during the summer months, or those of the tropics during the winter seasons.
Quick and easy to put on and take off, it offers great freedom of movement and is much appreciated by diving guides and by those who have to perform several dives on the same day.

MONOPIECE WETSUIT 5 mm

THICKNESS 5 MM | FRONT ZIP | JUNIOR SIZES AVAILABLE | 16-24° C 60.8-75.2° F | 5 mm | CE CERTIFICATION DIVING WETSUIT EN 14225-1:2017: C

5 mm one piece double lined neoprene diving suit. Conceived for intensive use in tepid waters. Easy to put on thanks to its YKK zippers: a heavy duty one on the front and two on the ankles. In the areas most exposed to wear on the part of the jacket, such as the belly and the shoulders, "Xdiamond", a special neoprene ensuring superior resistance to abrasion, is used. Special neoprene also covers the back and the knees, which are subjected to high stresses.

TECHNICAL FEATURES

- Shoulder, waist, back and knee reinforced pads with X-diamond ultraresistant material
- YKK front zip
- Ankle zipper

SWIMMING WETSUITS

KUWAE

MULTI THICKNESS 4+3+2 MM | BACK ZIP | UV PROTECTION | QUICK DRYNG | HYPERSTRETCH NEOPRENE | 12 - 18 °C 55 - 64° F

MULTI THICKNESS MONOPIECE WETSUIT 4+3+2 mm

The new Cressi swimming suit is inspired by the underwater caldera Kuwae, located in the Vanuatu archipelago in the South Pacific Ocean. The coral colour of the upper part of the wetsuit recalls the lava of the volcanic eruption, like the truly explosive design. This particular colour was also chosen to give the swimmer maximum visibility when in open water.
Kuwae has been entirely designed with the help of sophisticated 3D software for the modelling of wetsuits, which made it possible to study the fitting of the materials and the different sizes on virtual mannequins. In this way, Cressi not only facilitates an innovative approach to research and development, but also obtains a positive environmental impact by eliminating unnecessary sample collections.
Kuwae is the ideal wetsuit in cold water with temperatures between 12 and 18°C. The different thicknesses (2-3-4 mm) of the super-elastic materials favour buoyancy, help the swimmer to achieve a perfect trim when swimming on the surface and improve the fit in the arms/armpits, while ensuring complete freedom of movement. The striped material insert applied in the wrist area helps to move more water during the classic freestyle stroke. The new low neckline design has been studied to avoid any friction around the neck, while maintaining a perfect seal against water infiltration.
On the inner part of the under zip panel it is possible to customize the wetsuit with your name and insert the key of any means of transport in the special pocket. The YKK back zip guarantees tightness and resistance over time: the slider is made of anti-corrosion metal material, to ensure greater sturdiness when pulling the lanyard during the closing/opening of the wetsuit.

TOP/ARMS 2 mm
COMPLETE FREEDOM OF MOVEMENT

FRONT 3 mm
COLD WATER PROTECTION

LEGS 4 mm
IMPROVED BUOYANCY

TECHNICAL FEATURES

- The ultimate swimming wetsuit
- Completely designed with a sophisticated 3d modelling software
- Graphics inspired by underwater volcanic eruption
- Maximum visibility for the swimmer when in open water
- Back zip
- Different thicknesses (2-3-4 mm)

KUWAE

NEW 2023

THICKNESS 2 MM | BACK ZIP | UV PROTECTION | QUICK DRYNG | HYPERSTRETCH NEOPRENE | 18 - 26 ° C 65 - 79° F

SWIM MONOPIECE WETSUIT 2 mm

The new Cressi swimming suit is inspired by the underwater caldera Kuwae, located in the Vanuatu archipelago in the South Pacific Ocean. The fluorescent colour of the upper part of the wetsuit recalls the lava of the volcanic eruption, as does the truly explosive design. This particular colour was also chosen to give the swimmer maximum visibility when in open water.
Kuwae has been entirely designed with the help of sophisticated 3D software for the modelling ofwetsuits, which made it possible to study the fitting of the materials and the different sizes on virtual mannequins. In this way, Cressi not only facilitates an innovative approach to research and development, but also obtains a positive environmental impact by eliminating unnecessary sample collections.
Kuwae is the ideal swimming wetsuit in water temperatures between 18°C and 26°C.
The 2.0 mm high-density Hyperstretch neoprene optimizes comfort, provides UV protection, and protects swimmers against scratches while ensuring complete freedom of movement. The smooth exterior finish and the Glide Skin XT waterproof treatment guarantee exceptional hydrodynamics.
The new low neckline design has been studied to avoid any friction around the neck, while maintaining a perfect seal against water infiltration. On the inner part of the under-zip panel you can customize the wetsuit with your name and stash a key for any means of transport in the special pocket. The YKK back zip guarantees tightness and durability over time: the slider is made of anti-corrosion metal material, to ensure greater sturdiness when pulling the lanyard to zip/unzip the wetsuit.

KARUA

NEW 2023

MULTI THICKNESS 3+2 MM | BACK ZIP | UV PROTECTION | QUICK DRYNG | ULTRASTRETCH NEOPRENE | 18 - 26 °C 65 -79° F

MULTI THICKNESS MONOPIECE WETSUIT 3+2 mm

The new Cressi hybrid wetsuit is inspired by the underwater caldera Karua, located in the Vanuatu archipelago in the South Pacific Ocean. The graphics at the wetsuit's sleeves recall the lava of the volcanic eruption. The fluorescent-coloured sleeves, the upper back panel, and the ankles give maximum visibility when in open water.
Karua has been entirely designed with the help of sophisticated 3D software for the modelling of wetsuits, which made it possible to study the fitting of the materials and the different sizes on virtual mannequins. In this way, Cressi not only facilitates an innovative approach to research and development, but also obtains a positive environmental impact by eliminating unnecessary sample collections.
Karua is an ideal wetsuit for all kinds of watersport activities in water temperatures between 18 and 26°C. Both the exterior and interior are smooth, comfortable and durable nylon-covered 3mm Ultrastretch neoprene, which provides a great flexibility, UV protection, and protects swimmers against scratches while ensuring complete freedom of movement. The perfect thin hybrid wetsuit for those who are looking for a suit for swimming, snorkelling, surfing, paddling, canyoning, and all other experiences in the water.
The new low neckline design with the 2mm Glide Skin XT neoprene has been studied to avoid any friction around the neck, while maintaining a perfect seal against water infiltration.
On the inner part of the under-zip panel, you can customize the wetsuit with your name and stash a key for any means of transport in the special pocket. The YKK back zip guarantees tightness and durability over time: the slider is made of anti-corrosion metal material, to ensure greater sturdiness when pulling the lanyard to zip/unzip the wetsuit.

THERMAL SOCKS 3 mm, 5 mm

THICKNESSES AVAILABLE: 3-5 MM
SOFT HIGHLY ELASTIC NYLON-LINED NEOPRENE
ANTI-SLIP GRIP SOLE
SMOOTH SKIN NEOPRENE ANKLE
BLINDSTICH SEAM CONSTRUCTION

These socks for fins with strap or foot pocket are made of soft highly elastic nylon-lined neoprene. They prevent heat loss and keep feet warm. The smooth skin neoprene on the ankle allows maximum adherence between the sock and the leg of the wetsuit, reducing the passage of water. The sole is entirely non-slip. The construction of the blind stitch seam further improves comfort and aesthetics.

TROPICAL

LIGHT GLOVES 2 mm

THICKNESS 2 MM

Five fingered gloves 2 mm thick neoprene, made from two different soft and light materials. The palm and finger area uses a light grey napa that becomes extraordinarily soft upon contact with the water. However, the upper part of the glove and the wrist area are made from very thin, supple neoprene. A large area that corresponds to the upper side of the wrist allows for instant adjustment, both before and during the dive. These are particularly suitable gloves when you need the very best touch sensitivity in the fingers. The palm also offers good resistance to abrasions.

FLOW CONVENCTION EFFECT | SPECIAL ARCHED PROFILE

THOR EBS

SPECIALIZED Retailer-Product

ELASTIC BUNGEE SYSTEM SCUBA FINS

Brand new design for this extremely effective and yet very easy to use fin. The special arched profile of the fins combined with the two central ribs promote a significant flow convection effect, known as "spoon effect", which stabilises and boosts propulsion. Two lateral holes discharge the negative forces typically associated with this area and at the same time make for enhanced stability. The blades are moulded from two different materials for improved reactivity. These fins are perfect for scuba diving, whether you are an experienced diver or a novice.

TECHNICAL FEATURES

CRESSI EBS

Cressi has developed this special strap to meet the needs of the most demanding divers, who need a comfortable fastening for their foot but one that is still practical and manageable.
Its special amply sized slot makes it very easy to put on, even when wearing thick gloves or three-fingered gloves for winter water.

The wrapping section is highly flexible, making adjustments unnecessary, and as a result it's much easier to get all your equipment right in the first few meters of your descent and the fin stays in place against your foot despite the increase in hydrostatic pressure.

WIDER FOOT POCKET | INCREASED COMFORT

ARA EBS

SPECIALIZED Retailer-Product

ELASTIC BUNGEE SYSTEM SCUBA FINS

The main feature of this fin is its polypropylene blade that provides an excellent response. And weight is no longer a problem. These fins provide more thrust power to a diver's kicking, which results into an excellent effort/performance ratio. Special grooving for water channelling moulded on the surface provides outstanding stability and direction. The thermorubber foot pocket (with varying levels of hardness) is very comfortable to wear and a proper fit is ensured by ergonomic design. The heel strap, an exclusive Cressi design, is a special round bungee cord band that perfectly adjusts to all foot sizes and shapes and provides a comfortable, practical and manageable fastening. It features a special ample slot for easy don and doff even when wearing thick gloves for cold-water diving.

REACTION EBS

ELASTIC BUNGEE SYSTEM SCUBA FINS

Cressi's most technically advanced fin, the Reaction uses a completely new polypropylene blade material that is more reactive, flexible and trim than previous designs. It kicks easily yet powerfully and is suitable for divers of every experience level. The longer blade efficiently transfers energy from the computer-designed foot pocket, and like other Cressi fins, the blade extends from the top of the foot pocket to maximize its effective surface area for more thrust.
Other innovations include new locking strap buckles and anti-slip material for better traction out of the water.

MADE IN ITALY

DOUBLE DENSITY TECHNOLOGY | SUPERIOR PERFORMANCE

FROG PLUS

SCUBA FINS

The Frog Plus utilizes Cressi's patented three material injection molding process.
The three materials consist of a nice comfortable rubber on the foot pocket that extends up the side rails of the blade. The second material is the revolutionary new dual density techno polymer which forms the blade, and in conjunction with the third silicone based material creates a channeling effect.

Cressi's latest addition to its extensive line of world renowned fins is the Frog Plus open heel scuba diving fin. The Frog Plus features many of the great characteristics of a traditional paddle fin along with introducing a revolutionary new blade material that is both extremely durable and nearly indestructible.

TECHNICAL FEATURES

- Made of a combination of 3 materials: Main body in polypropylene, flexible elastomer used in the liner and in areas that require flexibility and elasticity, compact elastomer for side stringers, sole and foot support band.
- Below blade foot pocket.
- Blade profile with decreasing thickness
- Reinforced liner in the upper area
- 360º rotating buckles
- Oversized heel strap
- EBS buckle system

OPTIONAL EBS STRAP

ALSO FOR RENTAL

MADE IN ITALY

CLASSIC DESIGN

EXTREMELY LIGHT AND WELL-BALANCED

PRO LIGHT

SCUBA FINS

A highly advanced design for this fin that is moulded from two materials with very different characteristics: a strong polypropylene for the blade and soft elastomers (thermo rubber) for the foot and protective inserts.
The result is an extremely light and well-balanced fin, of average size, with surprising reaction time and a formidable thrust. The side stringers that extend all along the blade and two flaps situated along the end of the blade itself make the fin very directional.
The blade originates from the upper part of the foot pocket, with a 20% increase in useful surface area compared to a traditional fin of the same length. The foot pocket is computer designed and guarantees ideal transmission of the leg-fin thrust.
The lightness and perfect balance of the materials, together with the extremely modern design, make Rondine Pro Light a generous fin that provides exuberant performance without too much physical effort.
These fins are perfect both for beginners and for professionals and are very common amongst instructors and technical divers.

CLASSIC DESIGN | STRONG AND COMFORTABLE FIN

FROG

SCUBA FINS

A classic in the Cressi range, this has been on the market for many years and has a huge number of appreciators in every corner of the planet.
The fin is made with a skilful combination of a strong copolymer and a soft elastomer, the latter used for the foot pocket, for the side stringers and for some inserts.

The blade originates from the upper part of the foot pocket, with a 20% increase in useful surface area compared to a traditional fin of the same length.
The foot pocket is computer designed and offers great comfort; it guarantees excellent transmission of the leg-fin thrust. The Frog is heavier than the more recently designed equivalent Cressi models. It is this feature that makes it agreeable to whoever uses very thick suits or watertight suits. Anyone who works underwater will appreciate this fin a great deal because it is strong and comfortable, very popular also in diving schools and excellent for rental

CLASSIC DESIGN

GREAT FLEXIBILITY SOFTNESS AND DURABILITY

FULL FOOT FINS

The Free Frog is back! The fin has been remade with the new molding technology.
The foot pocket has been improved to fit better to most different foot shapes.
The Free Frog enjoys the exclusive characteristics of the Cressi diving fins maintaining the spirit of the legendary Frog. It features a below blade foot pocket in order to have a bigger surface that increasing the kicking thrust.
It is manufactured in a variant of low-modulus polypropylene that, combined with a particular structure, combines great flexibility, softness, and resistance to a demanding use (even as in rent and school in a diving center), durability and an unprecedented aesthetics in fins projected with this philosophy.

GARA

GARA TURBO CARBON

SPECIALIZED Retailer-Product

HIGH PERFORMANCE COMPACT FIN RAILS

Following the Impulse project we have successfully transferred the same design parameters for S-shaped undulating deformation to this innovative carbon fin. This particular movement permits a notable accumulation of elastic potential energy in the blade, which is released in the return kick, transforming into thrust. The effect has been achieved using a finite elements programme that enables the performance offered by carbonfibre to be exploited to the full. The blade is all-carbonfibre with an angle of 29°. The fibre is imported from Japan. The shaped and processed sheet is then produced in a specialist plant in Turkey. The blade is subsequently finished with an industrial co-moulding process at Cressi's Genoa plant. The elevated chemical bonding achieved between blade and rail, effectively creating a single piece, has permitted the elimination of the rigid glue that prevented the carbonfibre blade from flexing naturally. The thermoplastic rubber used for the water channelling rails is extremely flexible and soft so as not to undermine the intrinsic characteristics of the carbonfibre. The blade is therefore less fragile and more protected by the rubber. The end result is a very light fin, with every square millimetre exploiting the flexibility of the carbonfibre to the full.

TECHNICAL FEATURES

- 29 degree angled interchangeable carbon blade
- Modular detachable fin
- Superior performance
- Superior comfort
- Self adjusting foot pocket

GARA TURBO FOOT POCKET

INCLUDED GARA MODULAR INSOLE

The new insole for Gara Modular fins is recommended for use with thin boots in temperate waters, because it improves the kick performance. The semi-rigid material of the insole is completely recycled. The insoles are supplied as a pair (right and left foot) and can be cut into their shape in three different sizes, according to pre-printed guidelines.

- Down-size Gara Fins foot pocket preformed sole
- Easily adjust size
- Non- corrosive plastic construction

GARA TURBO CARBON

SPECIALIZED Retailer-Product

NEW 2023

SUPERIOR PERFORMANCE CAMOUFLAGE FINS

The blades are made with an ultra performing carbon fibre of incredible strength and flexibility. The fabrication of this carbon fiber is done with an high vacuum 100% industrial procedure, to obtain an exceptional compactness of the carbon fibre.

Average carbon fibre used for fin blades in the industry has 3.000 fibers per thread. Our Carbon has 12.000 fibers per thread. Four times as much. Four times the resistance. Four times the flexibility and elasticity, kick response compared to other carbon blades on the market.
Each thread in this carbon fiber is very very small. So small that the TOTAL DENSITY of the blade is an incredible, and unmatched, 20.000 fibers per square millimeter.

XLD
High flexibility blade

Dedicated to those divers who prefer a very soft and smooth fin. It is indicated if your fishing sessions include long sessions and if you cover long distances.

MD
Medium flexibility blade

It is perfect if you fish using a boat to move from spot to spot, using a constant weight.

HF
Sfiff blade

It is ideal for strong, powerful athletes with a higher bodyweight. It is also useful in waters with strong currents and when fishing in rougher sea conditions.

GARA TURBO SPRINT

SPECIALIZED Retailer-Product

SHORTER FOOT POCKET | HIGH PROPULSIVE PERFORMANCE | SHORTER BLADE

HIGH PERFORMANCE COMPACT FIN RAILS

The new Gara Turbo Sprint fin is a shorter version of the Gara Turbo fin. Sprint is designed to meet the needs of freedivers and spearfishers who practice this sport in wintertime and when a blade as long as Impulse is not necessary. Both fins have been designed using expensive finite element software programs that allow highly complex and equally high-performance sections to be defined. The blade of Sprint, like the Impulse blade, is made of a single thermoplastic elastomer, although it would be more correct to refer to an angled sublayer and an overlay. The sublayer follows the shape and dimensions of almost the entire fin. It has a uniform thickness and a flexible longitudinal propulsion wing of variable length. When disassembled, the blade and foot pocket occupy the space of a normal snorkeling fin.

GARA MODULAR SPRINT

SPECIALIZED Retailer-Product

SUPERIOR COMFORT | 29° DEGREE ANGLES INTERCHANGEABLE BLADE

SUPERIOR PERFORMANCE | SELF ADJUSTING FOOT POCKET

SUPERIOR MANEUVERABILITY

The new Gara Modular Sprint fin is a shorter version of the Impulse fin, which proved to be hugely popular with freedivers worldwide, both amateurs and the most demanding professional freedivers. This is also confirmed by the large number of articles dedicated to it by specialized journalists in sector magazines. Sprint is designed to meet the needs of freedivers and spearfishers who practice this sport in wintertime and when a fin as long as Impulse is not necessary. Both fins have been designed using expensive finite element software programs that allow highly complex and equally high-performance sections to be defined. The blade of Sprint, like the Impulse blade, is made of a single thermoplastic elastomer, although it would be more correct to refer to an angled sublayer and an overlay. The sublayer follows the shape and dimensions of almost the entire fin. It has a uniform thickness and a flexible longitudinal propulsion wing of variable length. In contrast, the so-called overlay covers the propulsion wing selectively and has a thickness that slopes from the maximum value to zero longitudinally towards the tip of the blade. As a result, the fin offers a new way of storing and releasing elastic potential energy, greatly assisting movement of the freediver's legs and thus guaranteeing a net improvement in propulsive output. When disassembled, the blade and foot pocket occupy the space of a normal snorkeling fin.

TECHNICAL FEATURES

- Excellent propulsive performance without tiring anyone, beginners or professionals
- Thermoplastic rubber foot pocket ,certified Full Contact
- Standard blade/stringer interface with screws under the foot pocket and side clips

GARA MODULAR GREY

SUPERIOR COMFORT | SUPERIOR PERFORMANCE | INTERCHANGEABLE BLADE | SELF ADJUSTING FOOT POCKET

SOFTER LD BLADE

The GARA MODULAR GREY is a perfect choice for deep freediving and spearfishing for divers of all levels. The modular design lets the user replace/ interchange blades for specific diving purposes, which make the perfect fin to grow with, as the diver can change blades as the divers skills increase. Any standard Fiberglass or Carbon Fiber long blade will interchange in minutes without any modifications to either. The self adjusting footpocket is constructed with the most modern multi compound joining process to deliver a footpocket that can offer comfort and suppleness around the foot where desired and yet have stiffer compounds under the footpocket and heel area where power transfer takes place. The angle of the blade provides the ultimate in efficiency during the kick cycle requiring less energy to load the blade. Can be comfortably worn with or without neoprene socks.

LONG DISTANCE - SOFTER THERMOPLASTIC BLADE
MINIMUM EFFORT ››› MAXIMUM POWER TRANSFER

FOOT POCKET

Gara Modular's foot pocket is wider than the other gara fin models. We suggest to use it with neoprene socks in order to have a proper fit. For use without neoprene socks, we recommend to buy one smaller size.

INCLUDED GARA MODULAR INSOLE

The new insole for Gara Modular fins is recommended for use with thin boots in temperate waters, because it improves the kick performance. The semi-rigid material of the insole is completely recycled. The insoles are supplied as a pair (right and left foot) and can be cut into their shape in three different sizes, according to pre-printed guidelines.

GARA 3000 LD

SOFTER LONG BLADE

GARA 3000 LD is CRESSI's entry-level long blade fin designed with softer blades, which make the GARA 3000 a perfect choice for the beginning diver or those not familiar using long blade fins. The GARA 3000 is constructed with durability in mind and long soft plastic blades that can effectively transfer power with minimum effort, which make this fin very comfortable and easy on the legs for the beginner or during long duration dives.

The GARA 3000 is an extremely comfortable and is a full footpocket style fin, This fin is also constructed using CRESSI's unique three material molding process where different compounds are bonded together to provide flexibility in the foot area and while being able to deliver power thru the blade due to the stiffness that the multi compound molding process can provide. Can comfortably be worn with or without neoprene socks.

GARA 2000 HF

STIFF LONG BLADE

GARA 2000 HF is a staple in the diving industry, and is the first fin in the industry to be manufactured using a three material molding process. Due to its lightweight and durability, it is an excellent choice for those looking for a fin that can provide the ultimate in performance while deep freediving and spearfishing, and those looking for obtaining maximum depths. The GARA 2000 has the stiffest blade in the CRESSI line and is an extremely comfortable full footpocket style fin, with long firm blades with built in stringers and runners to effectively direct water flow down the blade aiding in efficiency. This fin is constructed using multiple compounds bonded together to provide comfort and suppleness in the foot area and strength and rigidity in the heel and blade area. Can comfortably be worn with or without neoprene socks.

TECHNICAL FEATURES

- Stiff long blade designed for reach max depths
- Comfy full foot pocket
- High performance long blade

GARA PROFESSIONAL LD

THERMO RUBBER SOLES | EASY TO USE | LONG DISTANCE

LONG DISTANCE

The Gara Professional LD is a high performance fin, requiring minimum effort to load the long blades. They are more forgiving than other long blade fins for untrained legs, making this an excellent choice for deep free divers and spearfishers of all levels. They are ideal for long distance swimming, while ultimately providing the power and efficiency needed for deep free-diving and spearfishing. Due to the multi compound bonding process used during the manufacturing process, the Gara Pro LD is an exceptionally soft full footpocket style fin, which provides comfort during prolonged use on those long days in the water. Gara Pro LD delivers maximum power with minimum energy through its long firm blade that runs over the footpocket. Can comfortably be worn with or without neoprene socks.

REACTION PRO

FULL FOOT FINS

SUPERIOR PERFORMANCE | COMFORTABLE FULL FOOT POCKET

REACTION PRO is a great all around fin for scuba, snorkeling and freediving. The REACTION PRO is a full foot pocket style fin, with a longer blade and built in runners to effectively direct water flow down the blade. REACTION PRO is constructed using multiple materials bonded together with a patented three material molding process to provide comfort and suppleness in the foot area and strength and rigidity in the heel and blade area, where the foot pocket is beneath the blade for added power and efficiency. The soles are completely covered in thermo-rubber to give them exceptional grip on boat decks. Can comfortably be worn with or without neoprene socks.

TECHNICAL FEATURES

- Full foot pocket for comfort
- Long blade for efficiency
- Thermo-Rubber soles for extra grip on wet surfaces

VERSATILE AND LIGHTWEIGHT | COMFORTABLE FULL FOOT POCKET

PRO STAR

FULL FOOT FINS

PRO STAR is yet another versatile fin in the CRESSI line and is an exceptional choice for Scuba, Snorkeling and Freediving. Inspired by the PRO LIGHT, The PRO STAR is a lightweight and comfortable full foot pocket style fin. For power transference, it incorporates the blade beneath the foot pocket and the angle of the blade provides the ultimate in efficiency during the kick cycle requiring less energy to load the blade. This fin is constructed using multiple compounds bonded together to provide comfort around the foot, yet strong enough to transfer strength where needed. Can comfortably be worn with or without neoprene socks.

TECHNICAL FEATURES

- Full foot pocket for comfort
- Long blade for efficiency

MAUI

OPEN HEEL SNORKELING FINS

The principal characteristics of the Maui fin are lightness and ease of use, even for those without well-trained legs. Its weight and dimensions make it easy to stow, but without compromising performance.
The Maui has been designed with the same sophisticated and advanced finite elements technology used for the first time on the Impulse and Sprint models.
The dual material technology used for the blade means that it is substantially composed of two rigid lateral wings that direct the flow of water to the central section, where the overlaying of a softer and more elastic material makes it more flexible. In this way the blade flexes to create a "spoon effect", thereby contributing considerable propulsive force.

The fin can be used with bare feet or light socks. The fabric covering of the EBS strap prevents perishing of the elastic elements.
The heel piece is in soft, anatomical rubber. The grab handle for fitting the fin wraps around the ankle so as to reduce protrusion and avoid chafing while swimming.
Even though the EBS itself permits great adaptability and makes donning the fin particularly easy, we have fitted a cleat to the elastic strap to permit further adjustment. This function permits the user to obtain micro-adjustments – depending on whether they are wearing a sock or not – or simply to loosen or tighten to ensure the foot is held firmly in place but without excessive pressure. Dive Centres fins will have heel pieces colour-coded according to sizes to facilitate identification.

MAUI SHORT

NEW 2023

OPEN HEEL SNORKELING FINS

Maui short is a short fin, ideal for swimming in open and confined waters, and for snorkeling. For its robustness and practicality, is the ideal fin for safety and rescue teams operating on beaches. Maui short has been developed using the same calculation programs that we used to design on Impulse and Sprint fins, and on her "big sister" Maui. Two side rails, built in two different materials, convoy the water towards the central part of the blade. The combination of a softer material and a stiffer one makes this fin extremely soft and extremely performing at the same time. When the blade flexes it creates a "spoon" effect and bouncing back in position it emits a great propelling power in return.

The strap is built using an EBS system made of elastic rubbers, with a nylon lining, that guarantees a very long duration and resistance to abrasion. The heel is made of soft rubber, cut in an anatomic shape. This fin can be used with or without neoprene socks.

The handle is wrapped around the heel, so that it does not interfere with the movement of legs and feet when swimming. The EBS system is very stable on its own, but we added a choker un the elastic bands to allow a fine tuning of the fin and to avoid an unwanted release.
Maui short is a fin for swimming in the sea or in the swimming-pool, it can be used for snorkeling and it's the fin of choice for rescue teams operating on beaches.

PALAU

OPEN HEEL SNORKELING FINS

These open heel snorkel fins are made for use with bare feet and provide outstanding comfort and versatility. The open-heel design means each fin can accommodate a wider range of sizes, so family members or friends can share equipment more easily. It also allows dive schools or rental departments to stock fewer sizes while providing very high-quality fins to customers. The Palau's blade delivers excellent thrust with a modest kicking effort.snorkelling, free diving, and long swims.

TECHNICAL FEATURES

- Open heel foot pocket designed for bare feet
- Soft elastomer material delivers outstanding comfort
- Ideal for sharing among family and friends or for rental departments
- Easy-kicking blade responds well to any kicking style
- Blade extends from the top of the foot pocket for maximum surface area
- 5 fin sizes cover shoe sizes from 32 to 47 (European).

PLUMA

FULL FOOT SNORKELING FINS

This high-tech fin designed specifically for snorkeling benefits from the best technologies used in free diving and scuba diving. Cressi's unique molding process also allows for the use of three separate materials to create a highly-responsive blade. Now, snorkelers can power through current and enjoy hours on the water without undue muscle strain. The Pluma's computer-designed foot pocket provides excellent power transmission and unparalleled comfort.

TECHNICAL FEATURES

- Patented Cressi molding
- Technology used to create lightweight, responsive blade
- Computer designed foot pocket with stiff base better transmits power down the blade
- Soft thermo-rubber foot pocket material is comfortable for extended wear
- Lightweight polypropylene blade is easy to pack
- Blade ribs provide precise flex control for maximum thrust
- Excellent value

AGUA

FULL FOOT SNORKELING FINS

Agua is a very easy fin to use, and doesn't require any special athletic or water-sport abilities, yet it still delivers excellent performance without tiring your feet. Thanks to the latest technology and Cressi's experience in developing these products, we've been able to markedly decrease the weight of this fin compared to others in its category, while still preserving excellent responsiveness.

The foot pocket features the original Self Adjusting Foot Pocket system, which thanks to the special softness and elasticity of the blends makes for a consistently soft and adherent fit.

RONDINELLA

FULL FOOT SNORKELING FINS

All of Cressi's fifty-year experience has gone into these fins, which are a modern revival of the successful principles of the glorious light blue rubber Rondine fins. The blade is made from light and at the same time reactive polypropylene and during moulding is coalesced with a soft, flexible thermo-rubber (elastomer), used for the foot pocket, for the frames and for some inserts. This mix makes the Rondinella fins light and powerful: they are easy to use, not too demanding, and perform generously at the same time. The computer-designed foot is enveloping and anatomical, making it easy to put them on and perfect for extended use. Rondinella fins are perfect for snorkelling, free diving, and long swims.

AGUA SHORT

SHORT BLADE SWIMMING FINS

The Cressi Agua Short Swim Fin is the shorter more versatile version of Cressi's popular Aqua long blade fin. The Agua Short Fin is ideal for travelers and is the perfect swim aid while in the pool or open water. This fin features a self-adjusting foot pocket for incredible flexibility and comfort. It is perfect for any level of experience and is a must-have on your next vacation or work-out.

LIGHT

SHORT BLADE SWIMMING FINS

The Cressi Light are specifically designed for pool use and for swim training, but can also be used adequately for recreational swimming and snorkeling.
The short blade is made of a highly reactive and light material which guarantees agile and effective kicking while not tiring out your legs. The length of the blade has been researched and studied by Cressi to ensure perfect muscle training without causing cramps or discomfort. The anatomically designed foot pocket is made from soft rubber elastomers, and it houses the foot with a great deal of comfort, even during long swimming sessions.

WHO IT IS FOR:
The Light Fins have been specifically designed for training and to build up muscles, but they can also be used for recreational swimming and snorkeling.

CRESSI KIDS

100% NATURAL RUBBER

ABOVE BLADE FOOT POCKET

MINI LIGHT

KIDS SWIMMING FINS

Fin as a shoe with short blade 100% natural rubber. This material has a great resistance to breakage and abrasion damage that makes it suitable for use by children both at sea and in the pool.
The fin is designed with the shoe in the middle of the blade, so that the transmission of force is effective, with a progressive motion and pleasant for the swimmer, reducing the hydrodynamic resistance of the upper part of the foot.

The sole has a calculated rigidity to avoid cramping at the sole of the foot. The rear part of the shoe is thicker, reinforced and has a tongue that facilitates its positioning. All the edges in contact with the skin are rounded for greater comfort.
The very soft and comfortable elastomer (thermoplastic rubber), which surrounds the upper part of the shoe and the side spars, helps the stability of the fin during swimming.

INNER MEMBRANES

A patented membrane surrounding the inner nose pocket and both the inner eyes pockets which acts as a barrier and traps any moisture escaping from the diver's nose involuntarily when breathing through the mouth. The result is that not only is the moisture channeled away from the lenses, thus avoiding the fogging up of them, but it also reduces the need to compensate for pressure.

HEAT EXCHANGER

The external part of the skirt features a cooling system composed of two small heat exchangers that act as radiators. Thanks to this system, the temperature inside mask drops, coming closer to the external temperature and the droplets of humidity are trapped before the air reaches the lenses, preventing them from fogging up.

CRESSI

QUANTUM

SPECIALIZED Retailer-Product

NEW COLOR 2023

NEW REVOLUTIONARY ANTI-FOG SYSTEM

The major innovation with the Quantum mask is that as well as offering enhanced downwards vision it avoids the fogging phenomenon through the internal thermoregulation of the warm, damp air exiting the nose. This air is channelled by a system of membranes set in the moulding around the eyes and nose and deviating the flow towards the rubber skirt rather than the lenses.

The external part of the skirt features a cooling system composed of two small heat exchangers that act as radiators. The effect is that the temperature inside mask drops, coming closer to the external temperature and the droplets of humidity are trapped before the air reaches the lenses, preventing them from fogging up.
Despite the presence of the small internal membranes deviating the air flow and the external heat exchangers, the body of the Quantum mask is nonetheless compact and represents the most advanced design offered on the underwater vision market.
The lenses are not treated chemically and it should be remembered that when the mask is new, as is the case with all masks, we advise you to clean the

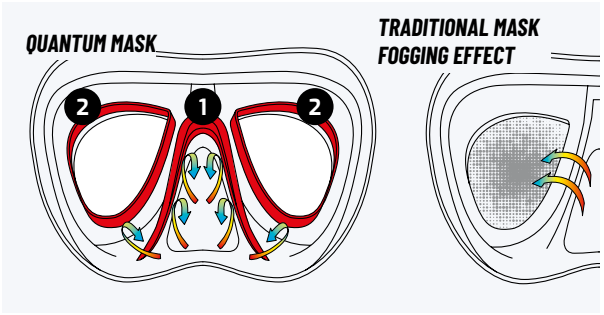
INNER MEMBRANES + HEAT EXCHANGER

INNER MEMBRANES

A patented membrane surrounding the inner nose pocket (1) and both the inner eyes pockets (2) which acts as a barrier and traps any moisture escaping from the diver's nose involuntarily when breathing through the mouth. The result is that not only is the moisture channeled away from the lenses, thus avoiding the fogging up of them, but it also reduces the need to compensate for pressure.

To further improve the anti-fog effect, Cressi suggests, the first times that the dive mask is used, to spray some anti-fog solution or to apply some saliva on the inside of the lenses and then to rinse them with water.



HEAT EXCHANGER

The external part of the skirt features a cooling system composed of two small heat exchangers that act as radiators (3). Thanks to this system, the temperature inside mask drops, coming closer to the external temperature and the droplets of humidity are trapped before the air reaches the lenses, preventing them from fogging up.

U.S. PAT 6272693 B1 | DOUBLE INJECTION TECHNOLOGY | IDF-TECHNOLOGY INTEGRATED DUAL FRAME | INCLINED LENSES | FLEXIBLE BUCKLE | TEMPERED GLASS | 100% HIGH QUALITY SILICONE SKIRT

FOG STOP SYSTEM

Zeus is the perfect mask for diving. This mask has a particular tapered structure deriving directly from the highly popular Nano-mask patent. The same IDF-INTEGRATED DUAL FRAME TECHNOLOGY SYSTEM allows you to join the silicone skirt to the lens frame without major interruptions of the curvature continuity. The result is a mask with an extremely hydrodynamic shape and, visibility being equal, a significantly smaller size. The field of view obtained is particularly wide, laterally and in the lower zone. Thanks to its matte coating the mask's components all match, enhancing the underwater experience since it prevents reflections in the water that may disturb marine life. The new micrometric adjustable buckles with a larger button allow a more easily regulation also wearing dive gloves. The new strap is made of two different silicone colors.

PENTA + NEW 2023

LOW INTERNAL VOLUME | U.S. PAT 6272693 B1 | DOUBLE INJECTION TECHNOLOGY | TEMPERED GLASS | FLEXIBLE BUCKLE | INCLINED LENSES | 100% HIGH QUALITY SILICONE SKIRT

UNPRECEDENTED TOTAL VISION

The Penta+ is the restyling of the popular Penta mask. It has four lenses and also introduces to this sector all the exceptional characteristics of the Matrix and the Lince. The Cressi patented system of raked lenses with an "inverted drop" shape offers incredible downward visibility, ideal for having under control the scuba diving equipment. The clear side windows are made of scratch-resistant material, more strong than glass or polycarbonate. Thanks to them, the mask offers unprecedented lateral visibility and great luminosity for total vision with no compromises. The skirt and the strap are made of hypoallergenic silicone, a very soft material compared to the low-quality PVC, that ensures a perfect seal and comfort. The buckles are embedded in the frame to offer instant adjustment of the strap length, even with one hand. It offers a very low internal volume, a record weight of only 175 g (6.2 oz).

TECHNICAL FEATURES

- Type: four lens mask
- Front lenses: inverted teardrop design to ensure maximum visibility, made of tempered glass
- Strap buckles: pressure, with instant adjustment
- Very low internal volume
- Weight: 175 g (6.2 oz)

SPECIALIZED Retailer-Product

NEW 2023

FLEXIBLE BUCKLE | MICROMETRIC ADJUSTABLE BUCKLE | TEMPERED GLASS | 100% HIGH QUALITY SILICONE SKIRT
ULTRA LOW VOLUME | ERGONOMIC NOSE SHAPE | EASY COMPENSATION

ULTRA LOW VOLUME MASK

Atom is a radical mask, with incredible low internal volume, thought and built for free-diving.
It is a frameless mask. Construction material has been reduced to the minimum.
Inside the silicon facial a stiff core is co-stamped with the two lenses, giving just the right rigidity to the mask.
This semi-rigid core substitutes the usual external plastic frame and allowed us to reduce the internal volume of the mask in an unseen way until today.

Another feature of Atom is the ergonomic shape of the nose.
Two small cavities, carved by the nostrils, facilitate the action of compensation. This makes the mask extremely stable during the dive. Atom will not move when you compensate pushing
Atom is the perfect mask for the expert free-diver and spear-fisher, who wants the maximum performance from its gear.

DOUBLE INJECTION SILICONE STRAP

CALIBRO

U.S. PAT 6272693 B1 | MICROMETRIC ADJUSTABLE BUCKLE | IDF-TECHNOLOGY INTEGRATED DUAL FRAME | ULTRA LOW VOLUME | FLEXIBLE BUCKLE | TEMPERED GLASS | 100% HIGH QUALITY SILICONE SKIRT

FOG STOP SYSTEM

Cressi's next generation diving masks are all equipped with the IDF-INTEGRATED DUAL FRAME TECHNOLOGY which offers exceptional field of view, and the new Calibro is no exception.
The mask is designed so that the integrated face and frame allow for an extremely hydrodynamic and compact shape and a particularly wide lens, maintaining the mask extremely close to the face. Cressi's Calibro combines minimal internal volume with a phenomenal field of view due to the raked angle of the frame. The buckles are, as always, directly integrated into the rigid skirt through a solid but flexible rubber attachment that allows you to adjust and place the mouthpiece without shifting the mask. Thanks to its matte coating the mask's components all match, enhancing the underwater experience since it prevents reflections in the water that may disturb marine life. Calibro is the perfect mask also for free-diving since it is designed to provide the diver with a feeling of total freedom and comfort.

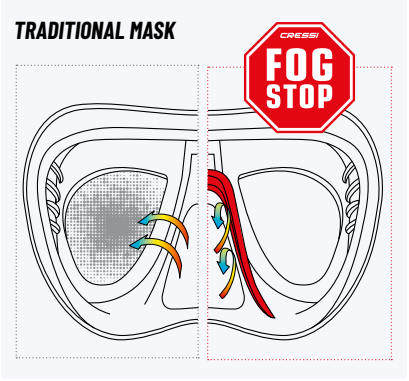
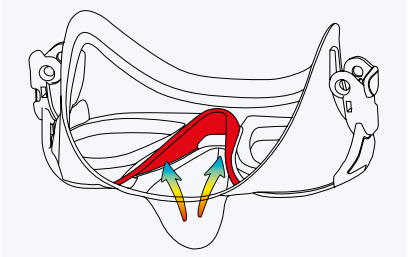
FOG STOP SYSTEM

INNER NOSE POCKET - NEW PATENT PENDING

A patented membrane surrounding the inner nose pocket which acts as a barrier and traps any moisture escaping from the diver's nose involuntarily when breathing through the mouth. The result is that not only is the moisture channeled away from the lenses, thus avoiding the fogging up of them, but it also reduces the need to compensate for pressure.

To further improve the anti-fog effect, Cressi suggests, the first times that the dive mask is used, to spray some anti-fog solution or to apply some saliva on the inside of the lenses and then to rinse them with water.





NANO

U.S. PAT 6272693 B1 | ULTRA LOW VOLUME | INTEGRATED DUAL FRAME | TEMPERED GLASS | MICROMETRIC ADJUSTABLE BUCKLE | FLEXIBLE BUCKLE | 100% HIGH QUALITY SILICONE SKIRT

NEW IDF TECHNOLOGY INTEGRATED DUAL FRAME

Mask for advanced freediving and spearfishing, designed to offer an extremely hydrodynamic and compact shape to help divers cut through the water and aid movements in small spaces.

The internal volume is minimal and does not require intentional equalizing. The swiveling buckles feature micrometric regulation. Angled tempered glass lenses. Anatomical strap.

THE SILICONE REVOLUTION crystal®

CRYSTAL silicone® is an exclusive CRESSI material that revolutionizes swim mask skirt clarity.

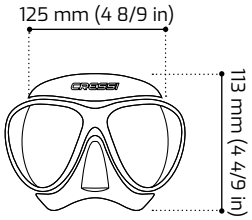
MADE IN ITALY

BIG EYES EVOLUTION CRYSTAL

WITH CRYSTAL SILICONE SKIRT

TEMPERED GLASS | U.S. PAT 6272693 B1 | DOUBLE INJECTION TECHNOLOGY
INCLINED LENSES | FLEXIBLE BUCKLE | MICROMETRIC ADJUSTABLE BUCKLE
100% HIGH QUALITY SILICONE SKIRT

The ultimate in comfort and performance, the Big Eyes Evolution Crystal combines the best of Cressi technologies.
Raked lenses, with Cressi's inverted tear-drop shape, are placed close to the eyes for an exceptional field of view, and the Crystal Silicone skirt delivers excellent light transmission while resisting discoloration and fogging.
The Crystal Silicone skirt also seals gently against the skin with a very open angle that accommodates a wide range of facial shapes.



TECHNICAL FEATURES

- Raked lenses provide excellent field-of-view
- Inverted tear-drop lenses improve downward visibility for managing BC-mounted gear
- Low internal volume allows ,for effortless clearing
- Crystal Silicone resists aging and prevents skirt discoloration and fogging
- Ribbed skirt design provides supportwhere needed for a soft, flexible fit
- Micrometric adjustable buckles allow precise headband adjustments
- Swiveling buckles connect to flexible, indestructible elastomer tabs for total durability and comfort
- Accepts optical lenses

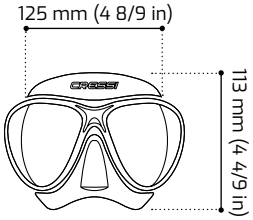
BIG EYES EVOLUTION

OUTSTANDING FIELD OF VIEW

U.S. PAT 6272693 B1 | DOUBLE INJECTION TECHNOLOGY | TEMPERED GLASS | FLEXIBLE BUCKLE | MICROMETRIC ADJUSTABLE BUCKLE | INCLINED LENSES | 100% HIGH QUALITY SILICONE SKIRT

The Big Eyes Evolution's signature inverted tear-drop lenses are raked inward and provide outstanding field of view with very low internal volume. A redesigned skirt now uses internal ribs to provide the ultimate in fit and support. Fully flexible, easy adjust buckles are attached using Cressi's double injection molding technology for both comfort and extreme durability.



TECHNICAL FEATURES

- Raked lenses provide excellent field-of-view
- Inverted tear-drop lenses improve downward visibility for managing BC-mounted gear
- Low internal volume allows for effortless clearing
- Dual-density silicone skirt flexes for a perfect seal along the face and full support around the frame
- Ribbed facial skirt provides support where needed for a soft, flexible fit
- Micrometric adjustable buckles allow precise headband adjustments
- Swiveling buckles connect to flexible, indestructible elastomer tabs for total durability and comfort.
- Accepts optical lenses

MATRIX

U.S. PAT 6272693 B1 | INCLINED LENSES | MICROMETRIC ADJUSTABLE BUCKLE | TEMPERED GLASS | 100% HIGH QUALITY SILICONE SKIRT

EXCELLENT FIELD-OF-VIEW

The compact twin-lens Matrix takes the basic design concepts of the Big Eyes Evolution and pushes them to a new level of performance. More pronounced inverted tear-drop shaped lenses, raked inward to sit even closer to the eyes, and a more compact build overall make the Matrix an ideal choice for divers and free divers looking for the biggest view in the smallest package.

FRAMELESS TECHNOLOGY

MICROMETRIC ADJUSTABLE BUCKLE | TEMPERED GLASS | 100% HIGH QUALITY SILICONE SKIRT

F1

FRAMELESS COLORAMA DIVE MASK

Frameless masks are loved by many divers for their low-profile and ability to fold flat for easy carrying, even in a BC pocket. Cressi's frameless design bonds a high-grade silicone skirt directly to a single lens for the ultimate in simplicity.

The low-internal volume allows for effortless clearing and quick-adjust strap buckles are molded directly into the skirt for a flexible fit and reduced drag. It also represents an unbeatable value, with a cost roughly half that of similar masks.

LIBERTY TRISIDE

THREE WINDOWED MASK

3 LENS PANORAMIC DESIGN | TEMPERED GLASS | MICROMETRIC ADJUSTABLE BUCKLE | FLEXIBLE BUCKLE | 100% HIGH QUALITY SILICONE SKIRT

The Liberty Triside features a wide mono front lens with 2-sided lenses to ensure a panoramic view without interruption.
The result is a mask that allows maximum light and feels as open as the ocean itself. All lenses are tempered glass for the best clarity.
The skirt is made in hypoallergenic silicone to ensure comfort and a perfect seal.
It is a breeze to adjust the length of the strap thanks to the two buttons on the buckle, which can also be used while wearing gloves.
The frame is colored with a paint effect that makes the mask elegant and beautiful to see, which can be coordinated with your equipment.

TECHNICAL FEATURES

- Three-lens panoramic design for excellent peripheral vision.
- Lightweight, durable polycarbonate frame.
- Soft silicone skirt fits a wide range of face shapes.
- Fast-adjust ratcheting strap buckles.
- Easy-access nose pocket for equalization.
- Lenses made in tempered glass.

MINIMA

REDUCED SKIRT | EASY COMPENSATION | EXCELLENT VISIBILITY | ADJUSTING BUCKLE | 100% HIGH QUALITY SILICONE SKIRT

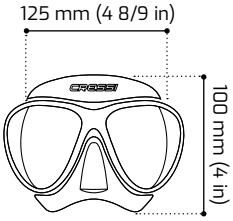
THE LOWEST VOLUME ON THE MARKET

This mask was designed specifically for deep sea diving, with innovative features that place it at the top of its category. The special reduced skirt, complete with a small seal ring, sticks like a suction cup to the face, leaving minimum air space inside the mask, which make compensation extremely easy, taking very little air from the lungs.

The lens-eye distance is the absolute smallest on the market and guarantees, even with small diameter lenses, excellent visibility in all directions. The two optic glass lenses are thicker than the standard to allow a special safety mould.
The strap comes with instantly adjusting buckles for an easy and precise fit.

TECHNICAL FEATURES

- Materials: liquid silicone, hi-tech polymers
- Strap buckles: instant adjustment
- Internal very low volume
- Dimensions of frame: 168 x 45 mm
- Weight: 118 g



PRODUCT	CODE		
MINIMA MASK BLACK/BLACK	DS292050

SUPEROCCHIO

CLASSIC LOW VOLUME MASK

EASY ADJUSTABLE BUCKLE | TEMPERED GLASS | 100% HIGH QUALITY SILICONE SKIRT

A huge classic in Cressi masks, it continues to be a favourite among fans even though it has been in production for many years. It's a small mask with minimum internal volume, very well suited for deep freediving. The size of the skirt is limited, and the mask adapts easily to many facial shapes. The two separate lenses, placed very near the eyes, offer great visibility in every direction.

TECHNICAL FEATURES

- Minimum internal volume
- Suitable for deep freediving
- The size of the skirt is reduced, and the mask adapts easily to many facial shapes
- The two separate lenses, placed very near the eyes, offer great visibility in every direction
- Made in Italy

SNORKELING MASKS

Photo by: Javier Ferrer

FIJI NEW 2023

PATENTED ANTI-FOG SYSTEM | DOUBLE INJECTION TECHNOLOGY | INCLINED LENSES | TEXTILE STRAP | TEMPERED GLASS | 100% HIGH QUALITY SILICONE SKIRT

ADVANCED ANTI-FOG SYSTEM + TEXTILE STRAP MASK

FIJI is a snorkeling mask that features the ultimate Cressi Fog Stop System.
A system of membranes channels the air towards the lower part of the mask, away from the glasses. A second membrane seals the eye socket, so that warm air coming from exhalation does not get on contact with the glass at all. This dramatically limits the fogging of the mask. Another feature of our fog stop system is the heat exchanging structure on the top of the masks silicone blades facilitate heat exchange between the mask ant the water, balancing the temperature between the two in a shorter time. This also helps to reduce fogging. Fiji is a mask thought for snorkeling. It features an elastic band, making it an easy to use mask, that will be appreciated by beginners, people with long hair. It can be used for scuba diving too, but keep in mind that an elastic strap is not as firm as a silicon one. The lenses are not treated chemically and it should be remembered that when the mask is new, as is the case with all masks, we advise you to clean them well with a strong soap (toothpaste, dishwashing liquid soap, degreaser) . Also use perform the normal antifogging procedure before using the mask, with an anti-fog spray or saliva on the dry glass.

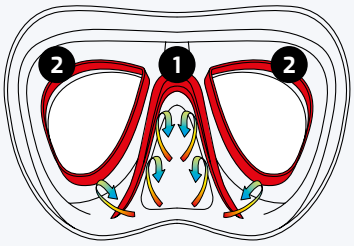
INNER MEMBRANES

A patented membrane surrounding the inner nose pocket (1) and both the inner eyes pockets (2) which acts as a barrier and traps any moisture escaping from the diver's nose involuntarily when breathing through the mouth. The result is that not only is the moisture channeled away from the lenses, thus avoiding the fogging up of them, but it also reduces the need to compensate for pressure.

To further improve the anti-fog effect, Cressi suggests, the first times that the dive mask is used, to spray some anti-fog solution or to apply some saliva on the inside of the lenses and then to rinse them with water.



HEAT EXCHANGER

The external part of the skirt features a cooling system composed of two small heat exchangers that act as radiators (3). Thanks to this system, the temperature inside mask drops, coming closer to the external temperature and the droplets of humidity are trapped before the air reaches the lenses, preventing them from fogging up.

NEW TEXTILE ELASTIC STRAP

SAMOA

NEW 2023

PATENTED ANTI-FOG SYSTEM | DOUBLE INJECTION TECHNOLOGY | TEXTILE STRAP | TEMPERED GLASS | 100% HIGH QUALITY SILICONE SKIRT

ADVANCED ANTI-FOG SYSTEM + TEXTILE STRAP MASK

Samoa is a mask that features our efficient Fog-Stop system, on a smaller frame suitable for people with a smaller face.
A system of membranes channels the air towards the lower part of the mask, away from the glasses. A second membrane seals the eye socket, so that warm air coming from exhalation does not get on contact with the glass at all. This dramatically limits the fogging of the mask.

Another feature of our fog stop system is the heat exchanging structure on the top of the masks silicone blades facilitate heat exchange between the mask ant the water, balancing the temperature between the two in a shorter time. This also helps to reduce fogging.
Samoa is a mask thought for people with a smaller face. It allows women and younger people to use our performing Fog-Stop System.

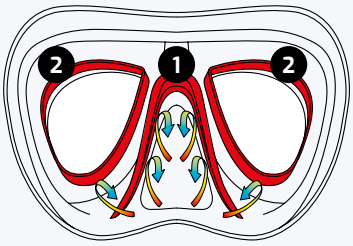
INNER MEMBRANES

A patented membrane surrounding the inner nose pocket (1) and both the inner eyes pockets (2) which acts as a barrier and traps any moisture escaping from the diver's nose involuntarily when breathing through the mouth. The result is that not only is the moisture channeled away from the lenses, thus avoiding the fogging up of them, but it also reduces the need to compensate for pressure.

To further improve the anti-fog effect, Cressi suggests, the first times that the dive mask is used, to spray some anti-fog solution or to apply some saliva on the inside of the lenses and then to rinse them with water.



HEAT EXCHANGER

The external part of the skirt features a cooling system composed of two small heat exchangers that act as radiators (3). Thanks to this system, the temperature inside mask drops, coming closer to the external temperature and the droplets of humidity are trapped before the air reaches the lenses, preventing them from fogging up.

NEW TEXTILE ELASTIC STRAP

MADE IN ITALY

ESTRELLA

ADULT SIZE

WINDOW 1 | MICROMETRIC ADJUSTABLE BUCKLE | TEMPERED GLASS | 100% HIGH QUALITY SILICONE SKIRT

The quality of the assembly and of the materials is the same as the most technical range: unbreakable tempered glass, polycarbonate frame of reduced thickness and weight, simple and resistant buckles integrated into the frame and in the front-side, silicone strap. Its design is studied to obtain a very wide vision in all directions.

Buckles 100% swiveling in all directions thanks to the flexible anchorage, and micro-adjustment with one hand at the push of a button.
They avoid the usual breakage of this critical point and maintain the stability of the mask, once positioned and with the strap on.

MAREA

ADULT SIZE

2 WINDOW MASK | MICROMETRIC ADJUSTABLE BUCKLE | TEMPERED GLASS | 100% HIGH QUALITY SILICONE SKIRT

Evolution of the legendary Focus model, the most versatile and one of the most successful Cressi masks.The frame design is minimized in thickness and the lenses are slightly angled to improve vertical and horizontal visibility.
Buckles with flexible anchorage 100% pivoting in all directions thanks to its flexible anchorage and with micro adjustment by button, with one hand. They avoid the usual breakages in this delicate point and maintain the stability of the mask once positioned and with the strap pulled.
100% multi-purpose mask suitable for apnea, snorkeling and diving. Very resistant also for use in diving centers or intensive use.

- Internal volume: 130cm3 weight 165 gr (junior 80cm3 120 gr).
- Clear silicone or dark silicone strap and skirt.
- 360º adjustable pivoting buckles, perfect also for diving centers' usage or intensive use.
- Skirt with adaptable percentage of more than 85%.

MADE IN ITALY

OCEAN

ADULT SIZE

2 WINDOW MASK | MICROMETRIC ADJUSTABLE BUCKLE | TEMPERED GLASS | 100% HIGH QUALITY SILICONE SKIRT

The patented concept of raked lenses and their special "inverted drop" is developed further here. The lenses are placed as closely as possible to the eyes, with the further increase in the field of vision taken to the maximum levels possible. The soft silicone skirt has a new profile and a wide sealing ring for excellent grip and unprecedented comfort. The internal volume of the mask is exceptionally low, lower than that of many free diving models and the weight is decidedly low. Two pressure buckles, integrated into the headband, allow for quick and accurate adjustment of the strap.

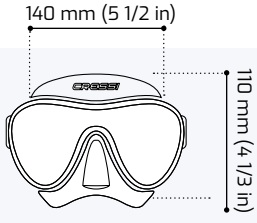
PINOCCHIO

WINDOW 1 | MICROMETRIC ADJUSTABLE BUCKLE | TEMPERED GLASS | 100% HIGH QUALITY SILICONE SKIRT

ADULT SIZE CLASSIC MASK

A real CULT when it comes to masks, Pinocchio is the most famous mask in the world. It began life in the first half of the '50s, and was the first mask that came with a special lodging for the nose, making compensation possible. Adored by entire diving generations all over the world, its design was so advanced at the time it was launched on the market, that it is still valid today, fifty years down the track.



FIRST MASK WITH A NOSE POCKET SINCE 1952

PRODUCT	CODE		
PINOCCHIO MASK BLACK/FRAME BLACK	DN210000		

SNORKELING MASKS JUNIOR

CRESSI JUNIOR MADE IN ITALY

ESTRELLA JUNIOR

WITH TEXTILE STRAP - AGE 7-13

WINDOW 1 | TEMPERED GLASS | 100% HIGH QUALITY SOFT CLEAR SILICONE SKIRT

This new version of the Estrella has an elasticated fabric strap without adjustment buckles to make it easier for children to put on and to avoid pulling the hair. The traditional snorkel clip has been replaced with a loop created with the fabric strap supporting and positioning the snorkel.
The same mask can be fitted with both the silicon and fabric straps via an attachment pin.

TECHNICAL FEATURES

- Kids diving mask for kids from 7 to 13 years old.
- Suitable for snorkeling and also scuba diving.
- Single tempered glass lens

MAREA JUNIOR

AGE 7-13

WINDOW 2 | EASY ADJUSTABLE BUCKLE | TEMPERED GLASS | 100% HIGH QUALITY SILICONE SKIRT

The Marea Junior is a 2 Windowed Mask that is particularly suitable for scuba diving and snorkeling. It has dual tempered glass lenses, a double feathered skirt edge that adapts to most faces and a small inner volume that is perfect when going deep underwater. The Marea Junior is made from 100% clear high-quality sealing soft silicone rubber that offers extraordinary and unprecedented comfort and fit.

Designed for younger and women divers the Marea Junior Mask gives an exceptionally wide field of view. Mask is equipped with Cressi's micrometric easy adjust buckles and has a wide silicone rubber split strap designed mask strap for even dispersion of pressure for increased fit and comfort. Mask has an easy-to-reach one-hand nose pocket for ear equalization.

TECHNICAL FEATURES

- Scuba, free diving and snorkeling mask
- Dual tempered glass lens for durability.
- Easy Adjustable buckle.
- 100% High Quality Silicone.
- Wide field of view.
- Soft silicone mask skirt for comfort.
- Designed for women and younger divers.

PIUMETTA KID

AGE 3-7

ULTRA RESISTANT POLYCARBONATE LENSES

Piumetta is not only a minimized version of a senior diving mask, as we already produce a junior version called the Ondina, rather all of the dimensions have been reconfigured for optimum adaptation to the physiology of smaller individuals. Thus, not only the critical frame contact areas (nose, bro, etc.) are left protected, rather the eyes are perfectly centered in the glass display for maximum visibility. Piumetta shares the frame materials and technology used in professional masks with soft Silicone and an unbreakable polycarbonate display.

SNORKELS

ITACA ULTRA DRY

SPECIALIZED Retailer-Product

DRY GUARD | PURGE VALVE | 100% HIGH QUALITY SILICONE MOUTHPIECE

ADULT SIZE

The features at the top end an internationally patented dry guard, which prevents water entry while using it on the surface in any position.
The new mechanical device has three movement joints, whose counterweight ensures immediate opening of the upper valve whether you dive or emerge from the water.
The lower part is equipped on the inner side with a smooth flexible corrugated section, which keeps the aerator away from the mouth while using any breathing apparatus.
The mouthpiece, made of soft silicone, has an angle studied in a particularly ergonomic way, with a reduced bite size for prolonged use without gum fatigue. The mouthpiece body consists of two pieces, with an inclination that ensures better and faster water drainage. A lower purge valve enables instant clearing when needed.
The transparent tube has a side reinforcement in coloured rubber.

TECHNICAL FEATURES

- Special patented new Aquastop valve: very efficient on up / down positions
- Dry guard: seals breathing tube when submerged
- Mouthpiece: drops away when not in use - great for scuba divers
- High-quality silicone mouthpiece: is comfortable and durable
- Angled anatomical mouthpiece: reduces jaw fatigue
- Lower purge valve: allows water to be quickly expelled
- Streamlined design reduces drag while swimming
- Adjustable clip for securing to any mask

PATENTED AQUASTOP DRY GUARD WITH 360° DRY PROTECTION TECHNOLOGY

QUICK RELEASE SNORKEL HOLDER

PURGE VALVE

MADE IN ITALY

CORFÙ

ADULT SIZE

SPLASH GUARD | PURGE VALVE | 100% HIGH QUALITY SILICONE MOUTHPIECE

Snorkel designed mainly for snorkeling, apnea and diving. The tube (curved shape and soft material) has a variable section and in the upper part ends with an innovative splash guard, which drastically reduces water entry from waves, without interfering with breathing. The mouthpiece, made of soft silicone, has an angle studied in a particularly ergonomic way, with a reduced bite size for prolonged use without gum fatigue. The mouthpiece body consists of two pieces, with an inclination that ensures better and faster water drainage. A lower purge valve enables instant clearing when needed.

MEXICO

SPLASH GUARD | 100% HIGH QUALITY SILICONE MOUTHPIECE

ADULT SIZE

The Mexico snorkel is a high-end tube specifically studied to form a perfect fit on any face shape and features a completely rounded progressive profile. The upper baffle reduces water entrance due to waves with a design created to avoid damaging the air inlet flow. It has a transparent tube in a very flexible polyurethane with a mixed matte-gloss texture. The section of the tube walls is studied to maintain the necessary stiffness in the pressure zone of the mask strip to support air circulation in this area. It has a very comfortable mouthpiece with a design that combines different thicknesses to favor its self-orientation and relieve the tension of the user's jaw after long use. T

CORSICA

ADULT SIZE

CORSICA is a highly technical snorkel designed specifically for deep freediving and spearfishing. The soft bendable large diameter tubing makes it extremely comfortable to properly position behind the head while maintaining ease of breathing on the surface. When diving, the mouthpiece tucks neatly under the chin for the ultimate in hydrodynamics.

The anatomical hypoallergenic silicone mouthpiece provides extreme comfort during long durations in the water. The CORSICA is available in either black or green and is an excellent choice for the discriminating diver who is looking for the best equipment.

TECHNICAL FEATURES

- Anatomical hypoallergenic silicone mouthpiece provides extreme comfort during prolonged use
- Soft bendable snorkel tube to maintain proper and comfortable positioning
- Large diameter snorkel tube provides unobstructed ease of breathing
- Specially designed and molded u-bend provides easier clearing capability
- Ultra flexible tube

MADE IN ITALY

AMERICA

100% HIGH QUALITY SILICONE MOUTHPIECE

ADULT SIZE

AMERICA is a snorkel specifically designed for deep freediving and spearfishing. This snorkel provides excellent surface breathing properties due to its shorter, large bore flexible tubing with minimal curves to maintain a proper position around the head. The multi-positional soft silicone swivel mouthpiece can be tuned at any angle to provide extreme comfort during long durations in the water.

TECHNICAL FEATURES

- The multi-positional silicone soft mouthpiece provides extreme comfort during prolonged use
- Large diameter Snorkel Tube provides unobstructed ease of breathing
- Minimal tube and mouthpiece bends provides easier clearing capability

COLORS	CODE

MADE IN ITALY

GRINGO

ADULT SIZE

GRINGO is a traditional snorkel used for all types of diving. This snorkel provides excellent surface breathing properties due to its fairly straight tubing with minimal curves to maintain a proper position around the head. The multi-positional soft silicone swivel mouthpiece can be tuned at any angle to provide extreme comfort during long durations in the water.

TECHNICAL FEATURES

- The multi-positional silicone soft mouthpiece provides extreme comfort during prolonged use
- Large diameter Snorkel Tube provides unobstructed ease of breathing
- Minimal tube and mouthpiece bends provides easier clearing capability

SNORKELS JUNIOR

MINIDRY

NEW COLOR 2023

DRY GUARD | PURGE VALVE

SMALL SIZE

Version of the Dry model for women and children. The MiniDry snorkel has an original anti-splash end with a special valve that seals the tube as you dive, almost totally preventing the entrance of water as the snorkel is submerged. The lower end has a corrugated part that is smooth on the inside and keeps the snorkel away from the mouth when using breathing apparatus. A special water collection cup, with a large elliptic discharge valve makes expelling water quick and easy.

TECHNICAL FEATURES

- Anti-splash end with automatically closing valve
- Ergonomic shape for maximum comfort
- Mouthpiece and corrugated part in hypoallergenic silicone
- Discharge cup for easy and quick emptying

TOP

SPLASH GUARD | PURGE VALVE

SMALL SIZE

Sized for optimal comfort and performance for kids, the Top uses the same quality materials as adult snorkels.
A splash guard helps reduce water entry and a purge valve below the mouthpiece makes for effortless clearing. The fully adjustable snorkel keeper allows for perfect positioning.

TECHNICAL FEATURES

- Smaller size for young explorers
- Splash guard helps minimize water entry from splashing or waves
- High-quality silicone mouthpiece is comfortable and durable
- Angled mouthpiece reduces jaw fatigue
- Lower purge valve allows water to be quickly expelled
- Adjustable clip for securing to any mask

GALILEO

U.S. PAT 5.956.778 | MICROMETRIC ADJUSTABLE BUCKLE | 100% ANTI UV LENS | ANTI SCRATCH LENS | ANTI FOG LENS

ADULT SIZE | WITH TEMPERED GLASS LENSES

The Galileo goggles have marked a historical turning point in the swimming goggles sector. In actual fact, their flat lenses are mounted on a rigid frame, just like a diving mask, thus guaranteeing perfect vision with no distortion. The shape of the lenses, which are perfectly flat and have no side curving, also prevents annoying distortion at the sides of the lenses.

The watertight seal is extraordinary and comfort is excellent. The strap has a quick adjustment system (Cressi patented), similar to that used on the prestigious Cressi-sub masks, which allows quick and easy adjustment. The shatterproof lenses have external anti-scratch treatment, UV protection and internal anti-fog treatment.

JUMBO ATELIER offline product

600-DENIER TWISTED POLYESTER FILAMENT | WATERP REPELLANT MATERIAL | YKK ZIP | PVC LAMINATION | 140 L

WHEELED BAG & BACKPACK

The Jumbo bag is designed for very demanding divers who want to organize transport of all the equipment they need for their dives during their holiday travels or free time. The ample volume (140 liters) and internal partitioning makes luggage easy to prepare. The two side pockets, with the fin logo inside, can hold a pair of large fins, up to size XXL. The two front pockets are handy for packing accessories, like towels, t-shirts and sunglasses. The top pocket protects the two-position telescopic handle and also conceals a special small pocket inside for a personal details card. The spacious inside compartment has room to organize all technical equipment up to size XXL (e.g. a complete 7 mm hooded wetsuit, jacket, boots, gloves, mask, mouthpiece, regulator, etc.), securing it with two special straps. The system of buckles on the outside allows the bag to be compacted further, by pulling on the straps according to how much is packed in it. The large wheels are highly resistant and easily replaceable, as they are attached with screws and locknuts. The shoulder straps can be easily concealed in the back pocket and pulled out when needed. The new adjustment buckles on the shoulder straps allow rapid adjustment, even with the bag on the back.

TECHNICAL FEATURES

- Made of 600 Denier twisted polyester fabric, with PVC water-repellent coating
- YKK Zippers
- Adjustable shoulder straps for carrying as a backpack

DIMENSIONS

Volume	140 L
Weight	4,5 kg 10 lbs
Dimensions	80 x 50 x 35 cm 31.5 x 19.7 x 13.8 inch

PRODUCT	CODE		
JUMBO TROLLEY BAG	UB932500		

WHALE SPECIALIZED Retailer-Product

YKK ZIP | 140 L

WHEELED BAG & BACKPACK - SEMI RIGID CASE

Whale Scuba Bag is a capacious trolley designed to carry diving equipment.
It is made of 1000 denier nylon with polyurethane coating and YKK zipper.
The rigid back panel is made of thermoformed EVA.
It is very versatile, thanks to the telescopic handle and the adjustable and removable shoulder straps (useful when, for example, you are shipping luggage).

Whale Scuba Bag is equipped with strong lateral compression straps, ideal to reduce the volume of the bag to the maximum once it is filled up.

TECHNICAL FEATURES

- Made of 1000 Nylon with polyurethane coating
- YKK Zippers
- Removable shoulder straps for carrying as a backpack

DIMENSIONS

Volume	140 L
Weight	3,85 kg 8.48 lbs
Dimensions	75 x 42 x 38 cm 29.5 x 16.5 x 14.9 inch

MOBY 5

WHEELED BAG & BACKPACK

YKK ZIP | EXTRA POCKETS | 115 L

It is made from a new 300/400 denier material that is light yet very strong. The main compartment opens on three sides allowing easy access. There are two large bellows pockets to the front with zip closures, two side pockets for fins and a small upper pocket that holds an address tag. There are also two adjustable, padded, straps for carrying on the back that can be placed in special pockets when the backpack is being forwarded. The reinforced pull handle is telescopic and fully retractable. The wheels have a large diameter and can be removed and easily replaced in the event of breakage. There are two carrying handles: a reinforced one at the top and one with Velcro closure at the bottom. The back of the bag houses supporting rods to keep the Moby 5 in a vertical position. All the zips are very strong YKK.

DIMENSIONS

Volume	115 L
Weight	4,9 kg 10.8 lbs

MEGATTERA

YKK ZIP | 110 L

DRY DIVING BAG WITH SPECIAL FINS COMPARTMENT

Megattera is a diving bag to carry all your equipment and accessories.
It's equipped with handles and adjustable shoulder strap.
Megattera is strong and capacious. It is made of 500 denier tarpaulin, while for the bottom the same material has been used but with an anti-abrasion treatment.

Equipped with a practical upper zipper to easily insert all the accessories and diving equipment, Megattera has two pockets designed especially for divers. The first is external and closed with a buckle, perfect for carrying diving fins; the second pocket is a waterproof internal compartment for carrying equipment and wet clothes.

TECHNICAL FEATURES

- Made of 500 D Tarpaulin
- Diving equipment pockets
- Waterproof internal compartment

PIPER

ULTRALIGHT TROLLEY | 2.9 KG

IDEAL FOR TRAVEL | 50 L

Dimensions 35.5 x 23 x 56 cm
14 x 9 x 22 inch

The Piper is a suitcase designed and especially convenient for air travel, with a special 2 stage telescoping handle and 2 exterior compression straps with quick-release buckles. Several zippers, heavy-duty wheel housing, bumper protection, and scratch-resistant denier fabric ensure that your equipment will be able to be stored safely. Grab handles on the top, side, and bottom of the suitcase make this very easy to hold. The interior of the Piper features compression straps and a side pocket to help organize your belongings. A back ID pocket makes it possible to label your suitcase. At 6.4 pounds and 1.73 cubic feet, the Piper is light and great for traveling. Its dimensions are compliance with the carry-on airplane regulations.

360 REGULATOR BAG	UB940000		

TUNA

WATERPROOF POLYESTER | EXTERNAL WATERPROOF POCKET | 120 L

WHEELED BAG - FITS LONG BLADE FINS

The Tuna bag has a rigid bottom, thanks to the structure that supports the rubber and anti-breakage wheels. It is designed to carry diving equipment more comfortably. The material is water-repellent, even if not watertight. All metal components are made of rustproof stainless steel. The capacity is 120 litres. It is equipped with a large internal mesh pocket with zip and a small external pocket with zip. Three inner straps are attached to the bottom of the structure to secure the equipment. At the top end there is a handle for towing and another handle is at the bottom end. In the middle of the bag, two more handles can be joined with a padded strap.

TECHNICAL FEATURES

- Waterproof bag
- Made of Polyester
- External pocket
- Side handles and shoulder straps

PIOVRA XL

85 L / 90 L | WATER REPELLANT | FOR FREEDIVING AND SPEARFISHING EQUIPMENT | SPEARGUN HOLDER

LONG BLADE FINS BACKPACK WITH WATER REPELLANT TREATMENT

The Piovra backpack bag is perfect for sport spearfishing equipment. It is made of water-repellent DRY material, even if not watertight. The main compartment, with breathable anti-moisture mesh at the bottom, can accommodate freediving fishing gear, such as wetsuit, long fins (up to 100 cm / 39.37 in), mask, mouthpiece, belt, knife and various accessories. The secondary compartment, i.e. the outside pocket, is as a "cool" type refrigerator bag for the transport of cold drinks or fish. The external elastic with braided laces allows to insert other objects, such as the towel. The two sides are equipped with fixing systems for two spearguns. There is a D-ring at the top of the bag. The two carrying straps are adjustable and a side handle makes it easier to grip. A reflective print on the front ensures greater visibility. The main compartment has eyelets for padlock.

TECHNICAL FEATURES

- Dry material
- "Cool" external refrigerator pocket
- Long fins compartment
- Gun holder

DIMENSIONS

Volume	85 L / 90 L
Weight	1.6 kg 3.5 lbs

DRY GUN BAG

YKK ZIP | 840 DENIER NYLON

DRY BAG

A beautiful bag for carrying the spearguns. It features an adjustable shoulder strap and a reinforced handle. It has YKK zip closing long 52.5 in | 133 cm. Inside there is a small pocket with velcro closure. On the top, you can roll and close firmly thanks to the adjustable buckles.

Thanks to the special coating the bag is waterproof and will protect the equipment inside.
It is long approximately 70 in (179 cm), enough for carrying long spearguns or other equipment.
It is an ideal bag for the spearfishing man that want to protect and easily transport his gear.

TECHNICAL FEATURES

- Waterproof bag
- Made of 840 Denier nylon
- YKK zip closing
- Side handles and shoulder straps

ROATAN NEW 2023

123 L | MESH BAG FOR DRAINING/RINSING EQUIPMENT | MADE WITH HIGH-DENSITY POLYESTER

HEAVY DUTY MESH BAG 123 L

The Roatan mesh liter bag is perfect to keep all your scuba diving gear together. Made with high-density polyester, this mesh bag makes carrying your gear easy. The bag is equipped with two access points -a drawstring on the top and a full-length zipper on the side- to make retrieving equipment easy, even if wet. The bag can be worn like a backpack, with padded, adjustable shoulder straps and chest strap. It can also be carried with two reinforced handles, one on the side and one on the top. Included is a semi-dry front pocket with a zipper closure. A drain in the reinforced PVC bottom ensures that any water empties out, making this a perfect option to rinse your gear after use.

PRODUCT	CODE		
ROATAN HEAVY DUTY DIVE BAG 123 lt	UB936000		

TECHNICAL FEATURES

- Mesh bag for draining wet equipments
- Made with high-density polyester

CRESSI DOG

FOR YOUR DOG'S SAKE

Cressi Dog is a new line dedicated to dogs by Cressi and designed to promote the well-being and security of the animal in its relationship with water, so that it can live this experience in total harmony and serenity.

DLJ DOG LIFE JACKET

DON'T SINK, FLOAT AND SWIM

The Dog Life Jacket is a garment of Duratex 1000 denier black fabric (like Cordura) and Polyester 500 denier (goose-beak yellow) specifically designed to keep the animal on the surface or to facilitate it to swim. It is the necessary equipment for rescue dogs in water and is very useful for rehabilitation. It has a practical ring for the leash and a comfortable handle (three in sizes L-XL) to facilitate the recovery of the dog when you are on the boat.

The jacket has been exactly achieved to keep the dog in the correct swimming position and to facilitate its movements, both when it is submerged and on the surface. The Life Jacket is ergonomic, comfortable and easy to wear.
The 7 sizes range is from Micro 2XS to XL. This product has also been designed to be used over the Cressi Dog Wetsuit, which further increases the dog's protection against the cold.

TECHNICAL FEATURES

- Padding made of material with intrinsic buoyancy
- Duratex 1000 denier fabric and polyester 500 denier
- Double strip of high-visibility silver reflective material EN471 and inserts of the same material
- Embroidered logos and rubberized logo
- Two ventral padded bands for greater dog comfort

DWS DOG WETSUIT

HIGH BUOYANCY | COMFORTABLE | DURABLE

KEEPS YOUR DOG WARM AND SAFE

The Dog Wetsuit is a 3 mm thick neoprene bodysuit that isolates the body of the animal and protects it from the cold, thanks to the air cells of its structure which, at the same time, facilitate the buoyancy. The use of the wetsuit, due to its thermal characteristics, can avoid the onset of swimmer's tail syndrome. The soft material that wraps the dog gives it a reassuring effect and promotes calm and self-control.

The Dog Wetsuit presents a cut that follows canine anatomy and allows free movements avoiding any constriction. The garment has a comfortable full-opening zipper on the back, which facilitates dressing. The 11 sizes range is from Micro XS to XXL. This product has also been designed to be used under the Cressi Dog Life Jacket, which further increases the dog's buoyancy.

TECHNICAL FEATURES

- Made of 100% neoprene
- Available in 11 different sizes
- Bright color for more visibility
- Rubberized logo
- Back clousure zip

DIVE TORCHES

MADE IN ITALY

LUMIA+

WHITE COLOR TEMPERATURE | ADJUSTABLE ELASIC STRAP | EXCELLENT ERGONOMICS | SWITCH WITH 3 POSITIONS | LED LIGHT TECHNOLOGY | PREMIUM MATERIALS | NARROWED LIGHT BEAM

ULTRA LED DIVE LAMP

Torch with a highly asymmetric design boasts excellent ergonomics and a highly tactile perception of its geometric characteristics. Thanks to this particular design, the switch position is immediately found without needing to use your eyesight. The porthole and body are coated with thermoplastic rubber to extend shelf life and reduce noises from impact when used for fishing. These ergonomic features are a big advantage over aluminium torches with a circular section which do not give feedback on the position of the grip and, in some cases, even require the use of two hands to turn it on. The switch has three positions: Off, On Unstable with Automatic Return, On. The "On Unstable" position is particularly useful in fishing because it allows flashing by one simple press. The strap with slider spring allows adjustment according to the user's needs, but being elastic can be pulled out in case of emergency. Power is supplied by four AA "Stylus" batteries, either alkaline or rechargeable. The electronics ensure a constant level of brightness even when the batteries are rechargeable and/or not fully charged. Batteries included.

BLACK/BLACK

PRODUCT	CODE		
LUMIA+ TORCH BLACK/SILVER	SJ550170		
LUMIA+ TORCH BLACK/BLACK	SJ550150		

Length	168 mm - 6.61 inch
Head diameter	47 mm - 1.85 inch
Weight	130 gr - 4.58 OZ (without batteries)

NEW WHITE COLOR TEMPERATURE

The LED has a white color temperature similar to sunlight for maximum return of the colors in the underwater environment. The light beam of the LED is narrowed into a spot light beam of about 6° by means of a lens made of ultra-transparent material protected by the polycarbonate optical porthole.

ACTIVE ELECTRONICS

Power is supplied by four AA "Stylus" batteries, either alkaline or rechargeable. The power supply has an electronic management system that eliminates the gap between the different electrical potentials of different types of batteries and ensures an efficiency of 30% higherthan the commonly used systems. The active electronics of the flashlight guarantee constant light, even when the battery charge decreases. When the charge drops below the safety threshold value, the lighting level will reduce to warn the user that the batteries are depleted.

TECHNICAL CHARACTERISTICS

Luminous Flux	300 Lumens
Color Temperature	6500 °K CRI>75
Burn Time	3,5 h
Viewing Angle	6°
Illuminance	30000 Lux
Impact Resistance	1,5 m
Ingress Protection Code	IPX-8 75m

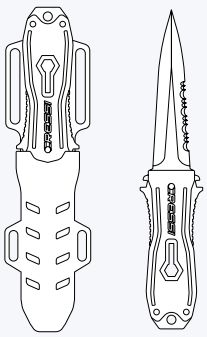
Thickness blade	3,8 mm - 0.15 inch



PREDATOR

STAINLESS STEEL 420 + COATING

Small stiletto knife, designed for underwater fishing. Manageable, blade penetration and durability and grip. The blade extends through the interior of the handle and, at the end of the handle, has a small pommel. Tempered AISI 420 steel with Black Coating. The duration of these features is guaranteed not by the sharpness itself, but by the quality of the material that guarantees the durability of the blade. Rhomboidal cross section for greater resistance to flexing and breaking. Double-edged blade with one smooth-edged side and the other serrated. Comfortable handle with rubbery polymer coating.

Blade length	8.6 cm - 3.39 inch
Total length	18 cm - 7.1 inch
Blade width	17 mm - 0.67 inch
Blade thicknesses	3-5 mm - 0.1-0.2 inch

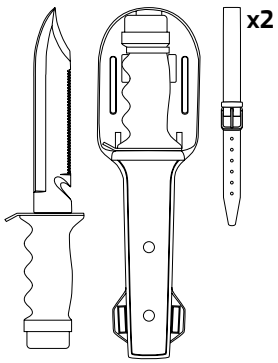
420 JAPANESE 420 STEEL

ORCA

STAINLESS STEEL

This legendary product has been around for years and years and has now become a sought-after collector´s item. It is considerably heavy and large, perfect for a work tool, which this knife is designed to be. The large blade is forged from special steel, with a smooth edge on one side and partly serrated on the other. This side of the blade has a line cutter at the handle end. The anatomical, non-slip handle is made from soft grip material for a comfortable grip and comes with anatomical moulding for the fingers to fit into. On the back, it ends with a chrome-plated knob that can also be used as a mallet. The front of the handle ends with a stainless steel hilt to protect the fingers. The sheath is made from plastic and has a traditional elastic band to hold on the knife. It also has loops to attach the knife to your leg or onto your belt and comes with two leg straps.

Blade length	17,8 cm - 7.01 inch
Total length	30 cm - 11.82 inch
Blade width	32 mm - 1.25 inch
Blade thicknesses	5,5 mm - 0.22 inch
Knive-only weight	450 gr - 0.99 lb
Weight with sheath	600 gr - 1.32 lb



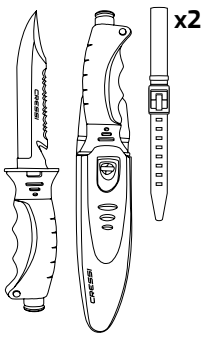
CODE		
RC556000		

BORG

STAINLESS STEEL 420 & 304 + COATING

Borg is a modern, large knife with a futuristic design and a strong, tempered blade. One side of the stainless steel blade is straight-edged, the other one is serrated right along the blade; they are both very sharp and effective for line cutting.
Sheath with locking mechanism to allow one-hand release.
It is separated from the blade by a small technopolymer thumb tab.
The knife comes with two, standard issue straps to attach it to your leg.

Blade length	14,5 cm - 5.7 inch
Total length	26,8 cm - 10.5 inch
Blade width	25 mm - 1 inch
Blade thicknesses	5 mm - 0.19 inch
Knive-only weight	230 gr - 0.5 lb
Weight with sheath	330 gr - 0.72 lb



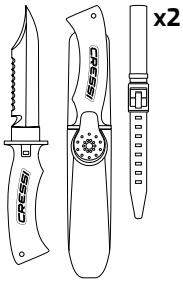
CODE		
RC559100		

NORGE

STAINLESS STEEL

Norge is a modern, compact knife with a futuristic design and a strong, tempered blade. The anatomical, non-slip handle is made from soft grip material. It is separated from the blade by a small technopolymer thumb tab. The blade is made from special tempered stainless steel, with a smooth edge on one side and partly serrated on the other. This side of the blade has a line cutter at the handle end. The black technopolymer sheath comes with loops to attach it to leg or at the waist.
The blade hooks onto the sheath with a quick-release spring slide that sits smoothly against the actual sheath.
The knife comes with two, standard issue straps to attach it to your leg.

Blade length	11,7 cm - 4,61 inch
Total length	22,8 cm - 8,98 inch
Blade width	25 mm - 1 inch
Blade thicknesses	4,5 mm - 0.18 inch
Knive-only weight	140 gr - 0.3 lb
Weight with sheath	250 gr - 0.55 lb



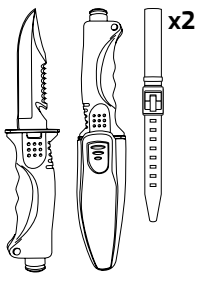
CODE		
RC553010		

SKORPION

STAINLESS STEEL 420

Skorpion is a modern, medium-sized knife with a futuristic design and a strong, tempered blade.
One side of the stainless steel blade is straight-edged, the other one is serrated right along the blade; they are both very sharp and effective for line cutting. It is separated from the blade by a small technopolymer thumb tab.
Sheath with locking mechanism to allow one-hand release.
The knife comes with two, standard issue straps to attach it to your leg.

Blade length	11 cm - 4,33 inch
Total length	23,5 cm - 9,25 inch
Blade width	25,5 mm - 10,03 inch
Blade thicknesses	5 mm - 0,18 inch
Knive-only weight	200 gr - 0.3 lb
Weight with sheath	280 gr - 0.55 lb



CODE

MADE IN ITALY

SUPERTOTEM

STAINLESS STEEL

An inexpensive, average-size knife with an excellent quality-price ratio.
One side of the stainless steel blade is straight-edged, the other one is serrated right along the blade; they are both very sharp and effective for line cutting. The anatomic grip is made from technopolymers and has a series of moulds for the fingers, ending with a thumb protection tab at the blade end.The plastic sheath holds the knife firmly with a traditional elastic band and has loops to attach it to the leg or strap.
The knife comes with two, standard issue straps to attach it to your leg.

Blade length	12,4 cm - 4,89 inch
Total length	23,2 cm - 9,14 inch
Blade width	32 mm - 1.25 inch
Blade thicknesses	3 mm - 0,12 inch
Knife-only weight	120 gr - 0.26 lb
Weight with sheath	210 gr - 0.46 lb

MADE IN ITALY

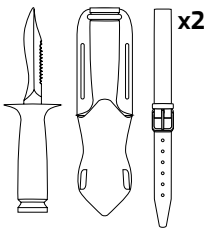
420 JAPANESE 420 STEEL

KILLER

STAINLESS STEEL

A small knife that´s been around for years now, highly appreciated because it is easy to handle and the blade penetrates really well. This is forged from a single piece of stainless steel, and is blocked at the grip by a screw knob situated at the end of the grip. One side of the blade has a smooth cutting edge, the other is partly serrated.
The anatomical technopolymer grip ends at the blade with a thumb tab. The sheath is made from plastic and has a traditional elastic band to hold on the knife and loops to attach the knife to your leg or onto your belt.
The knife comes with two, standard issue straps to attach it to your leg.

Blade length	8,6 cm - 3.39 inch
Total length	18 cm - 7.09 inch
Blade width	25,2 mm - 1 inch
Blade thicknesses	3-5 mm - 0.12-0.2 inch
Knive-only weight	120 gr - 0.26 lb



CODE		
RC554000		

GRIP

STAINLESS STEEL 304

The Grip Spear is a small-sized knife with a tapered blade that makes it ideal for spearfishing.
The blade is made in stainless steel. It features a high precision dagger point tip. One side is an extra rigid serrated blade for sawing, the other side is a skillfully crafted straight blade. It features an ergonomic non-slip handle grip and a hole to add a lanyard (not included).
The knife comes with a sheath that can be attached to the BCD shoulder strap. The sheath has a locking mechanism that prevents the knife from falling out. With 2 rubber straps (included) you can fix the sheath to your leg or your arm. The straps are 20 in (50.8 cm) long.
Great for spear fishing or scuba diving; as primary knife or back-up.

Blade length	8,1 cm - 3.1 inch
Total length	17,4 cm - 6.8 inch
Knive-only weight	49 gr - 0.1 lb
Weight + sheath	85 gr - 0.18 lb

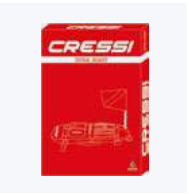
SIGNAL BOARD BUOY

PVC WITH MESH COVER + 0.25 MM INNER BLADDER | 20 M LINE | CARRYING HANDLE | FLAG WITH 40 CM POLE | 4 POCKETS | SAFETY WHISTLE

Red for excellent visibility, it uses two casings: an outer skin made of abrasion-resistant material ensures excellent protection for the two inner inflatable chambers, which are white. A mesh cover makes the bottom abrasion-proof and ensures effective drainage so that the buoy retains its light weight at all times. The upper part is fitted with multipurpose pockets and a big expanding container. A mesh bag made of adjustable elastic straps will carry additional objects. A zipper along the centre gives access to the two air tubes, which are kept separate for fail-safe buoyancy. A casing for the pole of the flag required by regulations is provided in the centre of the front section of the float. Also Red, the line is about 20m long and is fitted with two plastic snap hooks. This buoy comes with a convenient whistle: an additional safety device.



PRODUCT	CODE		
SIGNAL BOARD BUOY	TA611902		

SPYDER BOARD BUOY

BRIGHT RED COLOR FOR MAXIMUM VISIBILITY | FLAG WITH 40 CM POLE | 4 POCKETS

The buoy is double chamber type with an inner tube and an external protective cover. It is made from abrasion-resistant 420D nylon. Fluorescent red colour makes it highly visible Holds 3 rifles Buoy dimensions: 80 cm x 30 cm. The buoy has a double internal chamber to increase your safety. If one is pierced, the buoy will always be on the surface thanks to the other chamber. The three pockets are very practical for storing various accessories. A stabilising lead makes this buoy very stable even with the sea formed and with the top compartments occupied by heavy objects.

PRODUCT	CODE		
SPYDER BOARD BUOY	TA611900		

BUOY ROPE FOLDER

PRODUCT	CODE		
BUOY ROPE FOLDER	TA613000N		

TORPEDO BUOY

BRIGHT RED COLOR FOR MAXIMUM VISIBILITY | CLASSIC TORPEDO SHAPED BUOY | 0.35 MM PVC

The PVC used for this mono-camera buoy is very thick (0.35 mm) and is highly resistant to stress from sea activities. High-quality heat welded connections. The torpedo shape is very convenient for swimming because it eliminates any idrodynamic resistance. It has a super slip tray finish, so that the buoy is the minimum resistance to the angler's progress. It is also very comfortable for rifles that can be positioned lengthly. Pole with "Diver Underwater" flag and 25 m rope.

Diameter	25 cm - 9.85 inch
Height	85 cm - 33.46 inch
Volume	about 15 L
Weight	680 gr - 1.5 lb

PRODUCT	CODE		
TORPEDO BUOY	TA611600		

COMPETITION BUOY

BRIGHT RED COLOR FOR MAXIMUM VISIBILITY | CLASSIC ROUND BUOY | 0.35 MM PVC

This spherical float is slightly flattened to offer less wind resistance and has a built-in inflatable flag. Made from PVC, it has a strong anchor point for attaching the line on the lower half. It is supplied complete with a light 25 m floating line that has a small cylindrical lead weight of 150 g.

Diameter	30 cm - 11.81 inch
Height	23 cm - 9.05 inch
Volume	about 7 L
Weight	380 gr - 0.84 lb

PRODUCT	CODE		
COMPETITION BUOY	TA611500		

EASY BUOY

WRAP-AROUND SYSTEM | 20 M LINE | 0.35 MM PVC

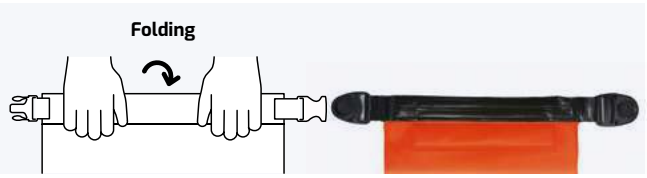
First-ever buoy to feature a built-in flag, it is fitted with a specially designed casing for the line that prevents the line from tangling up and makes it possible to adjust its length as a function of how deep you want to go. Pursuant to the regulations, its prevailing colour is red with a white stripe for immediate recognisability. Also red in colour, the line is about 20m long and is fitted with two plastic snap hooks. This buoy comes with a convenient whistle: an additional safety device that can be used to attract attention in an emergency situation.

PRODUCT	CODE		
EASY BUOY	TA611501		

SWIM BUOY

FOLDING TOP CLOSURE | INFLATION VALVE

Very hydrodynamic Swim Buoy, realized with quality materials and components. Tapered design that improves the hydrodynamics especially in case of blurred sea and wind. Red orange fluorine fabric for great visibility. Brilliant finish for an ideal slide. Internal compartment watertight with water tightness system specially effective with rigid soul. Inflator with safety closing screwing.



PRODUCT	CODE		
SWIM BUOY	TA611981		

FREEDIVING BUOY

BRIGHT RED COLOR FOR MAXIMUM VISIBILITY | CLASSIC ROUND BUOY | 0.35 MM PVC

This training buoy is dedicated to freediving. It has a durable external material, an external zipper pocket, four external handles for pre-immersion preparation and two exterior D-rings. The wide interior space allows to store the rope during transport. The inflation system is oral with overpressure valve. The freediving rope can be connected to a D-ring in stainless steel. Flag is included.

PRODUCT	CODE		
FREEDIVING TRAINING BUOY	TA611990		
INNER TUBE FREEDIVING TRAINING BUOY	TZ611990		

MARKER BUOY

0.35 MM PVC

Professional balloon especially resistant due to its nylon resin-coated composition with inside polyurethane injection. It goes rolled over itself with rubber band closing and has three inflating systems: through the regulator from the inferior area, with the mouth or connecting a hose of wetsuit or jacket *. Inside thermo welded "duck bill" to avoid accidental emptying of the balloon on surface in case of bad weather. Great visibility due to its fluorescent red color. It incorporates insertion to fix a chemical or stroboscopic light on the superior part and reflective band. Overpressure valve and quick emptying with handle. DIR snap hook. 120 cm length.

PRODUCT	CODE		
MARKER BUOY	TA611800

TANKS

MADE IN ITALY

STRONG AND RELIABLE TANKS

Cressi tanks are made of high quality and safety standards. They come in 5 different capacities: 5, 10, 12, 15 and 18 litres. On the other hand, the valves are made by Cressi-sub and were the first easy to assemble and disassemble valves to appear on the market. They are strong and reliable and are made from really top quality materials. The inner air passages were carefully studied in the design so as to guarantee top performance even, and above all, with the top performance regulators.

The valve design ensures an excellent grip, facilitating opening and closing of the tank. A brand new, exclusive slot system means you can check whether the faucet is open or closed at a glance (yellow = faucet closed, red = faucet open).

The regulator connection incorporates a threaded insert, which means it can equally be used for both INT bracket or DIN connection. The valves are modular you can easily change from a single connection valve to dual connection valve and vice versa. The Cressi-sub valves passed the strict tests imposed by European standards with flying colours thus receiving the prestigious CE certification.

Cressi sub uses the M25x2 spacing to thread tanks and control valves in conformity with European Regulations. Using articles (tanks/valves) with a different threading can cause serious accidents.

BELTS & ACCESSORIES

Photo by: Kayleigh Burns & Cam Grant

MARSEILLAISE

PREMIUM RUBBER BELT

Rubber weight belt with stainless steel buckle. Because it is made from a stretch material, the belt automatically tightens up during descent, when it generally loosens due to abdominal pressure and the reduction in the thickness of the wetsuit. Consequently the belt always fits snugly against the diver in every phase of the dive. The quick-release stainless steel buckle provides instinctive and rapid emergency release. The buckle pin passes through, is very strong and is riveted at both ends.

CRESSI SPEARFISHING
2023 COLLECTION

With this catalogue, we would like to highlight our origins, which have distinguished us over the years. Today, with the same passion as then, we follow the needs of our customers, from the beginners to the most ambitious athletes, sure of providing products suitable for all needs, always focusing on technology and results.

In these 76 years the company has always preserved its DNA, which is well represented by Cressis logo. The "C" logo with the mermaid, in the origin with the speargun, is recognisable all over the world as a prestigious brand of watersports and spearfishing.

Our goal is to provide a complete vision of our products Dedicated to all those who make spearfishing their passion.

The work undertaken over the years carries out a constant renewal of products with strict testing and always new technologies, placing us at the top for reliability, performance and durability.

All this takes in thanks to a continuous dialogue between our designers, who are always ready to make the best improvements, and our ambassadors, expert testers who have made the sea their home.

The philosophy of the Cressi family is always the same, first of all the technique and then everything else... this catalogue is an excellent example.

BORN FROM THE SEA

CRESSI

SPEARFISHING & SUSTAINABILITY

Spearfishing has become **the most sustainable fishing method** for many reasons. One of the biggest is that it has the most selective catch, by species, size, and quantity.

It also has the least problems for the environment, no by-catch, it doesn't need any bait, almost no gear loss, virtually no non-targeted species impact, and no harm to the surrounding **underwater environment.**

When using the Cressi gear and taking only high percentage shots, there is a low non-retrieval rate. **By following all fishing regulations and laws, and shooting only fish that are good to eat, and always eating your catch.**

Cressi cares to preserve the planet reducing its environmental impact.

Egidio and Nanni Cressi first founded the Cressi company to service the growing sport of spearfishing, and the Cressi name has been associated with the sport ever since.

Cressi-sponsored athletes have **won 11 world spearfishing titles** in that time, and **15 Italian championships.**

The company offers an **extensive line of gear**. These include pneumatic and band-powered guns, masks, a lot of models of freediving fins and a wide range of accessories, such as bags, shafts, reels and so on.

MORE THAN ANYONE ELSE!

/ OUR AMBASSADORS

ANGELO ASCIONE

Italy

Angelo Ascione

I've had several successes in both national and international spearfishing competitions. I'm a freediving and spearfishing instructor, and today I'm constantly dedicated to this. I've always been fascinated by the aquatic world. The sea is my passion which is second only to my family.

STEFANO BELLANI

Italy

Stefano Bellani

Since I was young, in my free time I was always out at sea, in the blue waters of Corsica, fishing tunas and amberjacks. Constantly looking for new places to explore and to practise my passion. People calls me a real champion, I'm proud to have the opportunity to share my underwater world.

PHILIPPE CHARRIER

France

I was born in July 1977 in Cannes, France. I am a professional fisherman, I love the sea and every time is a new discovery. In 2001 I entered the world of Cressi, which has sponsored me ever since. I was on the French national underwater fishing team between 1999 and 2005.

CRISTIAN CORRIAS

Italy

Kristian Corrias

I'm very connected to the sea, it gives me sense of freedom even when it's rough and seems to want to push me away. I've always had the passion for spearfishing since I was a teenager, I waited impatiently for the specialized magazines to admire the champions of the time and read their stories.

SERGIO DE JULIÁN ARRIOLA

Spain

Sergio De Julian Arriola

Sergio has always shown that his passion goes beyond sport or hobby, it's his way of enjoying life. A very physically prepared fisherman with an innate aquatic ability, he is an extreme competitor who performs impressive fishing rhythms at medium depths.

LUCA DELLA SANTA

USA

lucads13

I was raised on the beaches of North Carolina and South Florida, where my love for the ocean began. Growing up, I was fishing, diving, or surfing any chance I could get. With my love for the ocean and wanting to experience it in different ways, I have continued to share the passion for the sport.

PEDRO DOMINGUES

Portugal

Spearfishing for me started at the age of 14 after the death of my father, but I have been connected to the sea since I was a child, going spearfishing during my holidays in Setúbal. I like fishing for big bass, as well as bream, snapper, corvina, etc. The more difficult it gets, the more I like it.

JULIÁN RIVAS

Spain

jrivaspq

Member of the Spanish National Team, he started fishing in his native Asturias in the surroundings of Gijón in the Cantabrian Sea, when he was a child. He especially likes the area of Cartagena where you can find both vertical cliffs that deepen quickly as well as platform areas.

/ OUR AMBASSADORS

NICOLÒ COLUCCELLI

Italy

nico_cressiteam

I love spearfishing and I compete for the Underwater Club of Sestri Levante, where I live. This year I will take part in the Italian Championships for the first time. I am honored to be part of this team, as it was my dream since I was a child. I will continue to compete hoping for the best possible results.

DAVID GOTTSHALK

Spain

David Gottschalk

David is a passionate promoter of more responsible and selective spearfishing. He has made numerous short films available on his YouTube channel "Hasta el Fondo" on different topics such as the defence of spearfishing, learning and deep-sea fishing techniques.

ÓSCAR HIDALGO

Spain

Oscar Hidalgo

In his competitive career he has won 3 individual and 3 team championships in Catalonia. He became passionate about spearfishing at the age of 7; since then, his passion has not stopped growing. He is very experienced in the behaviour of fish and is a great observer of their habits.

ÁNGEL CRUZ

Spain

Angel Cruz

Since he was a child he used to fish with his father, at the age of 19 the sea became his whole life, his training, his profession and his sporting life. Champion of Spain 2021 and 9 times regional champion. Undoubtedly, the Cantabrian fisherman with the best career.

ALEJANDRA PRAT

Spain

apogonimberbis

Since she was a child her parents initiated her in the practice of spearfishing in Cap de Creus. Due to her great passion, she has made a name for herself in both men's and women's competitions, winning several titles. She's part of the Spanish national team in the next World Championship to be held in Sardinia.

FRANCISCO LOFFREDI

Brazil

franciscoloffredi

Born and raised in Rio de Janeiro, Brazil, where I learned to fish. Spearfishing is a way of life, and my love for the sea has led me to be a proponent of sustainable spearfishing. I have won the biggest fish trophy at the Blue Water World Cup three times. In 2013, I won all three trophies of the World Cup: individual, team and biggest fish.

FRANCESCO DIVERSI

Italy

diversifrancesco

Graduated in Molecular Biology in Pisa, where my passion for the sea began. Particularly for sailing, achieving success in national and international competitions, and for spearfishing. In 2008 I won the Italian team championship and in 2017 I started working with Cressi.

SANTI LÓPEZ CID

Spain

Probably the most prestigious and recognised Spanish spearfisherman in the world. He has won 7 European Championships and 4 World Championships. He started spearfishing in Mallorca, when he found a speargun, a mask and a snorkel hidden in some bushes. Many call him "the magician" for his magical performances in championships that have left the other competitors speechless.

DARIO MACCIONI

Italy

dariomaccioni

Being part of the Cressi Team makes me proud, above all because since I was 8 years old my favourite brand for its colours, logo and the champions that represented it is Cressi Sub. My life is dedicated to my family and to spearfishing, I continue my competitive career giving my best with the hope that it will last as long as possible.

RICARDO GONZÁLEZ

Spain

Ricardo González González

Ricardo is considered an exemplary sportsman and a gentleman in every aspect of his life. In his long competitive career, he has won 8 individual Galician Championships and 3 team championships. Ricardo is a lover of the waters of Galicia and has also been a Cressi salesman for 20 years.

PAULO MOREIRA

Portugal

I'm a Portuguese spearfisherman. I made some videos for YouTube with "MAR Y CAZA TV". I enjoy sharing this passion and also the challenge of not only catching fishes but also knowing how to capture the right moment for filming. Determination, perseverance, sacrifice: I believe that dedication strengthens talent. Also loyalty, for example to your competitors... what else? I'm always ready for ambush.

JOÃO PEIXEIRO

Portugal

j_peixeiro

I'm a lover of the aquatic world and I like the idea of promoting the spearfishing to break the existing taboo, to exchange knowledge and fishing techniques. I am very active on social media for this reason too, it's nice to meet people who share the same passion as you.

/ OUR AMBASSADORS

STJEPKO KESIC

Croatia

Stjepko Kesić

I'm part of the Cressi team and won my first title as Croatian National Champion in 2019. Then I won my second title in 2020, a two days championship was held in the area of half island Istra and it was organized by the Club Delfin from Pula, it was a very satisfying experience.

ANTONINO PIRAS

Italy

Antonino Piras (Nino)

When I was 12 years old the most important thing for me was to jump into the sea to see everything that was inside. I've turned this passion into my sport and I consider myself extremely lucky cause my passion has also led to my job as Cressis agent, which gives me satisfaction in being the team manager of this wonderful group of athletes.

ANDREA SETTIMI

Italy

and_set_sea

A lifestyle and family tradition that I have experienced since I was 12 years old. The emotions and peace that I constantly feel underwater give me the strength to look ahead and set myself new goals. I love everything about freediving, from the difficulties to the satisfaction, and I always try to learn from it. The sea seems always to understand me.

AINHOA ABELLÁN LÓPEZ

Spain

Ainhoa YPunto

She started practising it as child with her father. She has obtained good classifications, currently runner-up of Spain and she will be the main fisherwoman in the Spanish national team in the next world championship in Sardinia. She is specialised in fishing in shallow waters where she gets an amazing advantage.

FRANCESCO PIRAS

Italy

pirasf

My love for the water has been transmitted from father to son. Organising fishing expeditions is my greatest passion. I practice in all seasons and with different techniques, I live underwater all year round. In September 2016, in the waters of Taranto, I won the Italian Championship of Apnea Fishing Qualification (second category).

ALEXANDRU TEODORESCU

UK

selenitry

I'm part of Cressis Athletes team and I'm so happy to have joined this family. This cooperation allows me to practice my passion for this sport. I have the opportunity to experience and try new products all the time, this also means that I can spend as much time as possible into the water and enjoy every my spearfishing sessions.

DAVID MONTERO

Spain

monterosub

He discovered his background at the age of 14 years. He started competing in 2007 at the age of 27, achieving a third place in his debut, which encouraged him to keep trying. He is a great fisherman at medium-high depths, a very good strategist and meticulous in training for competitions.

JUAN RAMÓN PÉREZ CABELLO

Spain

juanramonperezcabello

Born a few meters from the shore of the Atlantic Ocean, Juan Ramón Pérez breathed salt water from his first breaths. A child surrounded by brothers and friends who loved spearfishing, in which he started very young. A life linked to the sea and to CRESSI, the brand he started with in 1998.

SPEARGUNS

CHEROKEE POWER

SPECIALIZED Retailer-Product

UNLIMITED POWER

Anticorodal black frame with integrated spear guide, grip made of engineering plastic reinforced with glass fibre, interchangeable high or low soft sternal support. Ultra-light triggering case with trigger, release mechanism and line ring on the side in AISI 316, machined from solid with a CNC process. The shock absorber makes silent the release of the shaft. Reversible side-safety mechanism. Reinforced reel with steel pin buckle. Head for double elastic with magnetic spear lock: as soon as the spear is put in place, it is held by two magnets mounted in a watertight chamber. This characteristic guarantees maximum speed of reset without the disadvantages of conventional mechanical restraint systems. The speargun is supplied with double 16 mm natural latex band, with Dyneema wishbone.

MOICANO

PERFECT FOR THE AMBUSH

Moicano is a speargun for fast fishing with its excellent handling thanks to its Ø26 mm anticorodal aluminum barrel, with an innovative extremely rigid shaft. This combination is a great compromise between structural resilience, low production costs and ease of movement in every direction underwater. It is a very manageable, agile and multipurpose spear gun. Integrated low-friction guide as the barrel only rests on the two outer corners. The lower part is reinforced with additional thickness. This combination enables the spear gun to remain extraordinarily easy to handle while being more rigid than spear guns that are much larger in diameter. New anatomical butt with integrated minimized load assist, derived from the legendary Apache-Comanche butt, highly resistant, reliable and appreciated by sports fishermen as a model perfect for fast fishing without problems. This proverbially ergonomic and versatile butt is suitable for every type of fishing and shooting from any position. Smooth and fast coupling of the rod and cassette mechanism, tough, reliable and compatible with all types of shafts, tolerant of different heights, finishings and machining.

SIOUX

BETTER EQUIPPED FIRST LEVEL GUN

Tried and tested and effective spear guns, the strengths of Sioux guns lie in the excellent materials used, their reliability, the easy firing and the favourable quality-price ratio. The barrel is made from light, non-deformable anti-corrodal aluminium. The inclination of the handgrip is designed for perfect firing and for quick, instinctive aiming; this is covered in rubbersoft. The trigger system is very gentle and progressive, and is fitted with a safety catch. A strong ring for the line comes out of the bottom of the handgrip, and at the front there are 2 line releasing devices, the dovetail trigger for the reel and a somewhat advanced spear-rail saddle.

APACHE

ROBUST AND MINIMALIST

Simplified version of the Navajo model. Open head, robust and minimalist, to optimize the visibility of the shaft. It is a spear gun of competition range, but also adapted to non-professional underwater fishermen, for the incorporation of basic accessories. Anodised aluminium tube 26 mm in diameter.

High resistance to flexion once the rubbers have been tensioned, with the consequent increase in precision. Speargun that stands out for its perfect stability and compensation due to the distribution of weights. 6 mm diameter steel shaft.

SAETTA

SPECIALIZED
Retailer-Product

QUALITY & POWER

The Saetta black is the ultimate in pneumatic spearfishing. An upgraded model of the world-renowned Cressi SL series, The Saetta offers unmatched power, comfort and accuracy. A few design tweaks have been able to maximize shot power with high precision and speed. Among the upgrades of the extremely reliably SL series is a new muzzle with incorporated holes to aid in water drainage and a new, soft, angled white handle that also aids in locating the speargun underwater. The Saetta still boasts some of the same successful features of its predecessors. For one, an anatomical high grip butt that enables the gun to be held in line with the arm. A strong line hook situated on the bottom of the grip butt for shaft loading. Also, a safety catch that frees the line; releasing the device, when the trigger is pulled, and lastly, an Ø 8 mm threaded shaft. The Cressi Saetta is the new standard in pneumatic spearguns. The Saetta is available also with the version with the Power Reducer, a lever that reduces the power of the half, in case of close targets.

TECHNICAL FEATURES

- Internal Ø 13 mm barrel
- Upgraded muzzle with incorporated holes for water drainage
- Upgraded white-colored ergonomic handle
- Safety lock
- Handle eyelet for cord connection
- Threaded shaft Ø 8.0 mm
- Power reducer version available
- Measurements: 70, 55 and 40 cm
- Measurements with reducer: 110, 88, 70 and 55 cm

SL STAR

NEW DESIGN 2023

THE HISTORY OF OUR PNEUMATIC GUNS

The SL Star range of pneumatic spear guns has been in production for many years now, and they have won worldwide fame for their excellence in terms of robustness, reliability, precision and powerful shooting. The various models correspond to the equivalent models in the SL series, without power reducer. Constantly updated over the years, the SL Star spear guns are ultra light, easy to use, and fire quickly. They come with anatomical high grip butts enabling the gun to be held in line with the arm with no extra effort. The bright red butt means you can identify the gun even if it ends up on the sea-bottom after shooting.

TECHNICAL FEATURES

- A strong line hook is situated on the bottom of the butt for shaft loading
- The guns are fitted with a safety catch and, when the trigger is pulled, it frees the line releasing device
- The SL Star spear guns come with an Ø 8 mm threaded steel shaft
- Measurements: 70, 55 and 40 cm

REELS

R20 - R30 - R50

The frame and the central pin are in AISI 316 steel. The drilling on the frame itself allows it to be used also on arbalete spearguns of different brands. The special clutch provides an excellent closing torque. The assembly system allows easy maintenance and cleaning. All sizes are equipped with a rewinder ring and size R50 is also equipped with an anti-blocking roller. The models R30 and R50 are equipped with a lightened drum in order to weigh as little as possible on the balance of the speargun.

PRODUCT	CODE		
REEL R20	FA359020		
REEL R30	FA359030		
REEL R50	FA359050		

TECHNICAL FEATURES

- Reel of sturdy construction that combines the resistant Delrin material with assembly elements in AISI316 stainless steel
- Constructed from a single piece of Delrin which is worked by a high precision lathe
- Stainless steel mechanism
- Lenght for line: 50 m - 160 ft with line Ø 1.5 mm
- Dovetail mounting for quick assembly, compatible with many Cressi rifle models

REELS

FISHING REEL

New Reel for Cressi Spearguns. The Cressi Fishing Reel is a light and quick reel that will fit to the underside of your Cressi speargun with the dovetail mount. A tightening nut will hold the reel from paying out line and small handle help you reel your catch back in. Streamlined, low profile, horizontal line reel tecnopolimer reinforced construction metal inserts for added durability and strength Adjustable drag knob attaches to standard rail mounts or provided adapter for all rubber spearguns Cressi. Adjustable drag knob allows for easy control of line release reate. Dovetail mounting system.

TWO-PIECE WETSUIT 5 mm, 7+5 mm

SMOOTH MATERIAL WARMS UP QUICKLY
For effortless breathing and wearability, the most sensitive areas of this wetsuit use a new smooth, dual layer neoprene called "Sandwich Neoprene", which is highly flexible, has great thermal power and at the same time is very study and durable. This neoprene has a 1 mm thick outer layer and a 4 mm (or 6 mm) dual inner layer separated by a structural elastic lining. Thanks to this technology, it may be sewn to obtain strong seams and will not tear. The wetsuit benefits from a underarm panel that facilitates comfort and wearability. The design is rigorously anatomical. Protective reinforcement on sternum, knees and crotch. Watertight seals in smooth skin on hood, wrists and ankles.

TWO-PIECE WETSUIT 5 mm, 7+5 mm

INSPIRED BY THE LIVERY OF THE PELAGIC FISH
A special digital printing system has been used for this new camouflage wetsuit, allowing high-resolution images to be obtained and thus create an exclusive camouflage design. The new "Cryptic Camouflage Technology" of Cressi is based on a real image of a fish (a dolphin fish in this case, with its dominant colours), to create camouflage that is very close to the original and then altered to obtain a repetitive effect that is one of a kind. The wetsuit is manufactured in two separate 5 or 7 mm pieces (jacket and pants). The materials used are: highly-elastic camo on the outside, open-cell neoprene on the inside.

TOKUGAWA

MONOPIECE WETSUIT 3 mm

FOR SPEARFISHING, FREEDIVING & SWIMMING | CAMOUFLAGE DESIGN | REAR ZIPPER

DESIGNED FOR BLUE WATER SPEARFISHING
Tokugawa, named after the Japanese feudal shogunate, is a one-piece 3 mm thick wetsuit, perfect for spearfishing, freediving and swimming, as well as for open water and pool training. The unique camouflage of this wetsuit is appropriate for different aquatic environments, from the blue waters of the Caribbean Sea to the greener tones of North American waters. The wetsuit's graphics provide the ultimate in camouflage for all environments. Tokugawa, which is made of elastic, flexible, comfortable and soft neoprene, has an anatomically designed cut specific to Cressi wetsuits, with preformed arms and legs that improve wearability and movement in the water. The chest and the knee pad reinforcements are designed specifically for spearfishing.
The Dura Stretch nylon lining improves the wetsuit's elasticity, comfort and durability.

SARAGO CAMO

SOFT HIGHLY ELASTIC NYLON-LINED NEOPRENE | ANTI-SLIP GRIP SOLE

THERMAL NEOPRENE SOCKS 3 mm

These socks for fins with strap or foot pocket are made of soft highly elastic nylonlined NEW camouflage neoprene 3 mm. They prevent heat loss and keep feet warm. The smooth skin neoprene on the ankle allows maximum adherence between the sock and the leg of the wetsuit, reducing the passage of water. The sole is entirely non-slip. The construction of the blind stitch seam further improves comfort and aesthetics.
