FURUNO

For those who demand the best, Furuno offers *even more*.

For over 70 years, Furuno has been continuously imagining and creating new solutions, making new marine electronic equipment with the goal of offering both performance and simplicity for everyone. Not only for men and women who make a living on the seas, but also for those who simply want to enjoy the boating lifestyle. For them, Furuno has become synonymous with quality, performance, and reliability.

Furuno offers the ultimate response to all kinds of situations by providing a wide range of devices, making each operation more intuitive and each trip more enjoyable than the last. Backed by an unrivaled worldwide sales/service network spanning every corner of the globe, Furuno delivers unparalleled service and equipment maintenance. If that's not enough, Furuno guarantees the highest of quality in all of our products, offering a two-year parts and labor warranty program.

For Furuno, the best is not an option, it's a promise.

A hand is shown gripping a black steering wheel. In the background, several circular navigation instruments, including compasses and speedometers, are visible on the dashboard. The scene is set inside a ship's cabin, with a window showing a glimpse of the sea and sky.

*Your favorite MFD just
got a major upgrade.*

*Experience speeds so
fast you'll be going on
a power trip.*

KEY FEATURES:

- Available as 9" or 12" Hybrid Control, 16" or 19" All-Glass In-Plane Switching (IPS) Multi-Touch MFD
- Quad-Core CPU powers TimeZero technology with lightning speed!
- Quad-Screen display configuration allows for presentation of 1, 2, 3, or 4 different functions
- IPS LCD provides superior viewability from virtually any angle
- Internal GPS receiver* (*TZT19F utilizes an external GPS receiver)
- NEW game-changing Fish-It and Drift-It feature designed to save time, fuel, and increase fish catch
- Built-In True Dual-Channel 1kW TruEcho CHIRP™ Fish Finder* (*TZT9F Single-Channel only)
- Deep Impact high-power 2/3 kW TruEcho CHIRP™ Fish Finder for NavNet TZtouch3; go deeper by connecting a 5 kW/10 kW transducer (BT-5 required, TZT12F/16F/19F only)
- NavNet Command Center integrates 3rd party apps using a built-in HTML browser**
- NEW Video Converter Kits stream compatible Sonar and Radar video data directly to TZtouch3 MFDs
- Compatible with NavNet TZtouch2 networks* (*Requires TZtouch2 v8.01 or higher)
- Sync up any data with a tablet or smartphone
- Add Autopilot, Instruments, Radar, AIS, Multi-Beam Sonar, and other sensors to your TZtouch3 network
- Autopilot control from MFD when connected to the NAVpilot-300/711C
- Compatible with CZone digital switching
- Tablet & Smart phone apps: TZ First Mate with cloud backup, NavNet Remote, NavNet Viewer, and NavNet Controller for your iOS and Android™ devices

**with more future planned integrations

The Return of Hybrid Control

Captains who have smaller boats know that when you are crashing through the waves, it can be difficult to get an accurate tap on the screen. That's why we made our TZtouch3 9" and 12" MFDs with Hybrid Control. You get the best of both worlds with a full multi-touch display and a handy, built-in keyboard that features a RotoKey™, cursor pad, and dedicated buttons.

Plot Your Adventure With Confidence

TZ First Mate Keeps Track of Your Catch & Location

When you're out on the water, you want to be on top of your game. So, you train like the professionals. You prepare all of your equipment. And before you head out, you do your homework. The good news is TZtouch3 just made it all easier with TZ Cloud and the TZ First Mate App. See page 20 for more details.

Free (U.S. only) MapMedia Vector & Raster Chart Library

Freely choose the charts that fit your individual needs. Easily select either raster, vector or fishing charts, MapMedia brings an authentic vector and raster chart library to your NavNet TZtouch3. "C-MAP" as well as "Datacore by Navionics" vector cartography are optional world-wide charts that can be easily purchased and unlocked. MapMedia cartography integrates cutting edge algorithms with high resolution image processing techniques to deliver a fusion of digital navigation charts and satellite photography.

Raster Charts

Vector Charts

TZ Cloud: Never Lose Waypoints, Routes, or Settings Again

Create your routes at home using TZ Navigator, a web browser*, or TZ iBoat iOS App. Then you can retrieve them from the cloud & download to your TZtouch3. Also, create events on your MFD and retrieve them at home because the data is synchronized automatically & securely to My TimeZero. TZ Cloud also stores marks, routes, boundaries, photos, and catch data! (*cloud.mytimezero.com raster planning charts for US only)

Satellite PhotoFusion™ & CMOR Charts (U.S. only)

Satellite photography is included in the MapMedia raster and vector charts, simply called Satellite PhotoFusion™. Land areas (zero depth) are completely opaque, displayed as satellite photos on the chart. As the depth increases, the satellite image is merged with the chart data to provide you with added detail on seabed areas in shallow water without losing vital chart information. Chart overlay is an optional feature designed to work exclusively with Furuno.

CMOR's high-resolution, shaded-relief bathymetric bottom images help navigators identify suitable locations for fishing and diving.

Satellite PhotoFusion™

CMOR Charts

Powerful Additions To Boost Your Catch

Find More Fish With TruEcho CHIRP™

The internal 1 kW TruEcho CHIRP™ Fish Finder inside TZtouch3 is designed to operate across a wide range of frequencies utilizing a broadband transducer and delivers significant advantages to signal clarity & target definition. Due to the constant sweeping of frequencies, it is capable of gathering more & higher quality data than traditional Fish Finders.

“DEEP IMPACT” TruEcho CHIRP™

Deep Impact - DI-FFAMP, a high-power TruEcho CHIRP™ Fish Finder Amplifier designed specifically to work with TZT12F/16F/19F. This 2 kW or 3 kW TruEcho CHIRP™ Fish Finder gets you down to the deepest waters to find your catch. You can even connect a 5 kW or 10 kW transducer!

(BT-5 required, see page 15 for more details)

Use DFF-3D With Your Fish Finder

This powerful combination helps you get on the fish like never before. Use your standard Fish Finder on low-frequency to go deep and then use the DFF-3D for your high-frequency to see fish in the water column. With the 3D History and Triple Beam Modes, you can easily see which side of the boat the fish are located, so you know where to drop your line.

Easily See Where To Drop Lines

When you find fish, you can quickly drop a mark on your Chart Plotter for a return drift. Then looking at the DFF-3D's Cross Section and Side Scan Modes, you can easily determine which side of the boat the fish are on, how deep they are, and how far out from the boat they are swimming. It's almost like you have a tracker attached to them!

See page 16 for more details.

NavNet Series

Model DRS2D/DRS4D-NXT

Spec P93

NXT Radome

KEY FEATURES:

- Solid State pulse compression Doppler Radar with no preheating time and low energy consumption (no use of a magnetron)
- Revolutionary Target Analyzer™ function instantly identifies hazardous targets
- Acquire up to 100 targets with Fast Target Tracking, Auto Target Acquire, and manual selections
- RezBoost™ beam sharpening to increase resolution
- Effective horizontal beam width* can reach 0.7° with DRS6A/12A/25A-NXT (XN13A), 2.0° with DRS4D-NXT, and 2.6° with DRS2D-NXT
- Bird Mode to find the best fishing grounds by tracking birds
- Simple installation, external PSU is not required (no need to open array or radome)
- Smart-connector cable for retrofitting existing DRS cable installations (DRS2D-NXT/DRS4D-NXT only)

* when using RezBoost™

Model DRS6A/12A/25A-NXT

Spec P93

NXT Radar Array

Spot Hazardous Targets Instantly

The NXT series are the first Radars in the world to use Furuno's exclusive Target Analyzer™ function. Targets that are approaching your vessel automatically change color to help you identify potentially dangerous targets. Green echoes are targets that are stationary, or are moving away from you, while red echoes are hazardous targets that are moving towards your vessel. Echoes dynamically change color as targets approach, or get farther away from your vessel. Target Analyzer™ improves situational awareness and can increase safety by showing potentially threatening targets.

RezBoost™ Beam Sharpening

Furuno's exclusive RezBoost™ technology has been incorporated into our Radar units for enhanced resolution and impressive performance. With RezBoost™ set to MAX, the sharpness offers an incredibly detailed image with more targets and less clutter.

2008-2014,
2016, 2018-2021

X-Class Radar

Model DRS4DL+ >>> Spec P94

Compact Radome

KEY FEATURES:

- Digital Signal Processing enhances short and long range detection
- Dual range scanning for two different Radar ranges
- Enhanced auto gain anti-clutter controls and auto tuning
- Bird Mode helps you identify birds, automatically adjusting the gain and sea for optimal detection
- Fast Target Tracking takes only seconds for a speed and course vector to be displayed
- Advanced side lobe reduction technology
- Spot-on Radar-Chart Overlay on both 2D and 3D chart presentations*
- AIS overlay “AIS-over-Radar” presentation for precise vessel tracking*
- Radar Guard Zone and Watchman features alert you to potential dangers
- VRM (Variable Range Marker) and EBL (Electronic Bearing Line) give distance and bearing indications
- Low noise gearbox that is 20% lighter than previous models
- No Power Supply Unit required for most installations

* Appropriate sensor required.

Model DRS6AX/12AX/25AX >>> Spec P94

X-Class Radar Array

DOMES	OPEN ARRAYS - 3.5', 4', or 6'		
DRS2D-NXT/DRS4D-NXT	DRS6A-NXT	DRS12A-NXT	DRS25A-NXT
DRS4DL+	DRS6A X-Class	DRS12A X-Class	DRS25A X-Class

Bird Mode

The DRS X-Class and NXT Series feature a Bird Mode that helps you identify birds congregating around schools of fish near the sea surface. Bird Mode works by automatically adjusting the gain and sea settings for optimal visibility.

High Power TruEcho CHIRP™ for TZtouch3

Model DI-FFAMP >>> Spec P92
Deep Impact TruEcho CHIRP™ Amp

KEY FEATURES:

“DEEP IMPACT” DI-FFAMP	
Frequency	26.6 to 242 kHz
Output Power	2 kW/3 kW
ACCU-FISH	Yes**
Bottom Discrimination*	Yes**
Transducer	2 kW or higher compatible transducer

* Depending on bottom type and water conditions
** With appropriate transducer

Go Deeper With More Power Than Thought Possible

You spoke. We listened. And now we delivered! TZtouch3 incorporates a powerful internal 1 kW TruEcho CHIRP™ Fish Finder. For many, this is the perfect Fish Finder, but for some, they need more power. So, we proudly bring you Deep Impact (DI-FFAMP), a high-powered 2 kW/3 kW amplifier that connects to the internal TruEcho CHIRP™ Fish Finder. But if that's not enough, Deep Impact gives you 5 kW/10 kW with the right booster (BT-5 Booster). Go big or go home!

(DI-FFAMP can be connected directly to TZT12F/16F/19F. To use a TZT9F with the DI-FFAMP, it must be connected to a network with one of the aforementioned MFDs)

Multibeam Sonar

Model **DFF-3D** >>> Spec P92
Black Box Network Multibeam Sonar

KEY FEATURES:

DFF-3D Multibeam Sonar	
Frequency	165 kHz
Range Scale	Up to 1,200 m
Detection Range	200 m* (Side beam best performance) 300 m* (Main beam directly under boat)
ACCU-FISH	N/A
Bottom Discrimination	N/A
Transducer	800 W

* Depending on bottom type and water conditions

PBG (Personal Bathymetric Generator)

Discover new fishing hot spots and save them to the cloud so you can return again and again! Bottom images are drawn with shaded relief, depth contours, and variable colors, making it easy to identify hidden structure and ridges that hold fish in a simple, easy-to-interpret presentation. Multiple color palettes are available, including the ability to show contour lines only. The area each ping covers is approximately twice the depth at the time of recording, so at a depth of 100 meters, a 200 meter-wide area is displayed and recorded to your NavNet TZtouch3 MFD.

Find the Fishing Spots Others Have Missed

The Multibeam Sonar gives you real-time 120° port-starboard view of the water column and seabed up to 200 m depth*. The DFF-3D allows you to explore fishing spots and find fish in deep water far faster than conventional single beam sounders. The main beam penetrates right under the boat at a depth of approximately 300 m*. See page 59 for more details!

* Maximum depth depending on installation, bottom type and water conditions.

** Bottom Discrimination transducer required

Precision Features That Give You the Edge

Monitor Sea Surface Temperature

Sea Surface Temperature (SST) is one of the most important pieces of information for fishing in order to find the best spot or area.

Track Recording

Track recording by SST Variation draw a ship's track in variable colors, helping you find the best spot or area.

Shear Alarm

The Shear Alarm lets you know when there is a sudden change in sea surface temperature, often caused when two currents meet. This is usually a good indication of a great fishing spot.

SST Graph

SST Graph on the Fish Finder display, instrument display or data box shows you the history of SST in the trip.

White Edge Helps Easily Identify Seabed

The top of the seabed is displayed in white to easily discern seabed structure from bottom fish returns. While conventional bottom discrimination function (i.e.: White Line) is applied to the strongest echoes, the White Edge function enhances the discrimination between bottom fish and the seabed.

Keep Track With Scroll-Back

Certain features may require appropriate sensors.

Found a fishing hot spot? Simply tap the screen and add a fish mark. With the scroll-back feature, you can look at past echoes simply by swiping the screen, adding new fish marks that will automatically show the captured location on your plotter screen.

Bottom Discrimination Functionality

The Bottom Discrimination function enables the Fish Finder to indicate whether the bottom is composed mainly of rocks, gravel, sand or mud.

Probability Mode:

Rocks Gravel
Sand Mud

Graphic Mode:

Rocks Gravel
Sand Mud

ACCU-FISH™ (Fish Size Analyzer)

ACCU-FISH™ is a fish size assessment function that is unique to Furuno. In order to assess individual fish size, echo returns are evaluated based on strength and turned into fish size display on screen. ACCU-FISH™ can detect fish size from 10 to 199 cm, in depths of 2 to 100 m. In some instances, fish size indicated may differ from actual size. Please read the operator's manual carefully before using this feature.

Onboard Systems Monitoring

CZone Digital Switching

www.czone.net

CZone digital switching by BEP simplifies the installation and operation of complex electrical systems. NavNet TZtouch2/ TZtouch3 is compatible with CZone controls, allowing you to operate CZone equipment. CZone, engine, navigation and various NMEA2000 data can displayed on the same screen.

My TIMEZERO™ Cloud Data

login.mytimezero.com

Connect your NavNet TZtouch2/TZtouch3 to the Internet and login to your My TIMEZERO™ account, and you will be able to back up or restore points, routes, tracks and settings to/from the cloud server. Plan routes on your tablet at home and transfer them to your TZtouch2/TZtouch3 onboard through the cloud.

Marine Weather Forecast*

***Internet connection is required**

The weather tool is completely free and easy to use, giving you unlimited access to weather forecasts, worldwide, 24 hours a day, provided by NavCenter. NavNet Series can display up to 16 days of downloaded weather forecasting.

Sirius/XM Satellite Weather*

***Internet connection is required** >>> Spec P95

Keep track of the weather, listen to your favorite tunes, and now track fish with Furuno's BBWX4 Fourth-Generation Sirius/XM Satellite Weather Receiver for NavNet TZT2BB/TZtouch3.

(U.S. and Canada only, requires SiriusXM subscription)

Marine Audio FUSION-Link

<https://www.fusionentertainment.com/fusion-link>

Enjoy the ability to control all FUSION-Link enabled 700/750/755 series marine entertainment system capabilities and functions directly from the NavNet TZtouch Series. FUSION-Link makes it easy for you to enjoy your onboard audio entertainment from the NavNet TZtouch Series.

View Info Wirelessly From Your Smart Device

For Apps and Smart Devices

Compatible with NavNet TZtouch Series

NavNet TZtouch2 and TZtouch3 open the door to cutting edge Wireless LAN features, such as iOS and Android™ apps, real-time weather data, software updates, and much, much more.

NavNet Remote

Take full control of your NavNet series in a whole new way. The NavNet Remote app allows you to remotely operate and view your system when connected to the Wireless LAN network.

NavNet Controller

Wirelessly control NavNet series with touch controls just like the real thing. With a scroll pad, cursor pad and dedicated keys within the app, controlling NavNet is simple and straightforward.

NavNet Viewer

Conveniently view instruments as well as the Fish Finder of your NavNet series on your smart devices over the Wireless LAN network. Key navigational information such as Depth, Temp, Wind, COG as well as Engine information can all be accessed from the palm of your hand. Even if you change the display on your NavNet MFD, you can still view the Fish Finder on your smart devices.

TZ First Mate: Keep Track of Your Catch and Catch Location

You put in blood, sweat, and tears finding the perfect hot spot, and guess what, it paid off! Wouldn't it be nice to make a note of what you caught and how big it was? Now your TZtouch3 display can do that when you drop an event mark. Choose the species, enter length & weight, and even take a picture with your phone. View & edit the marks on your smart devices with the TZ First Mate App, TimeZero PC Software, or TZ iBoat.

View and edit from your smartphone or tablet.

Choose from a list of species and enter optional length and weight.

See your catches on the map.

TZ Cloud: Never Lose Waypoints, Routes, or Settings Again

Create your routes at home using TZ Navigator, a web browser*, or TZ iBoat iOS App. Then you can retrieve them from the cloud & download to your TZtouch3. Also, create events on your MFD and retrieve them at home because the data is synchronized automatically & securely to My TimeZero. TZ Cloud also stores marks, routes, boundaries, photos, and catch data! (*cloud.mytimezero.com raster planning charts for US only)

External Fish Finders can also be connected to TZtouch2/TZtouch3. The internal and external Fish Finder cannot operate simultaneously. You can select which one to use from the settings menu.

External GPS antennas and navigators can also be connected to NavNet TZtouch2/TZtouch3. You can select which one to use from the settings menu (internal not available for TZT2BB).

TIMEZERO Software

A Powerful Navigation Tool That Meets Your Demands

Today's captains expect a lot from their navigation systems. TIMEZERO Navigation Software is the ideal system for captains and crews that demand the best. TIMEZERO is the only navigation platform that combines intelligent weather with superior raster and vector charting support, hallmarks of superior engineering and expertise. TIMEZERO is a powerful navigational tool capable of blending and analyzing data from multiple sources in real-time. Features such as multi-screen support and full network compatibility make it, without a doubt, the most accurate and advanced onboard tool of its kind. TIMEZERO offers simple operation, increased productivity and the comfort of added confidence and safety.

For more information visit: mytimezero.com

Seamlessly Exchange Your User Objects with TZtouch2/TZtouch3 Series*

All your User Objects (Marks, Routes, Boundaries, Photos, Catches) are automatically synchronized between TIMEZERO PC Software and your MFD as soon as they are connected on the same local network (Ethernet LAN). In addition, if the computer has access to the Internet, TIMEZERO PC Software will be able to back up your data to the cloud using your My TIMEZERO account. A maximum of 100 boundaries can be imported to NavNet TZtouch2/TZtouch3.

* Software version 4.01 or later

TZ iBoat (iPad and iPhone App)

TZ iBoat is the best marine navigation app for coastal sailing, featuring easy-to-use functions and the fastest and smoothest chart display ever, as well as 3D data and weather information for an unparalleled experience. TZ iBoat is powered by the amazing TIMEZERO technology, featuring a 2D/3D chart display, PhotoFusion™ and the most accurate marine charts thanks to MapMedia's unique Raster mm3d format.

TZ iBoat can connect to the Wireless Hotspot created by the NavNet TZtouch3/TZtouch2 Series and use the navigation data (Position, COG/SOG, Heading, Depth, Wind and AIS*) available on the NavNet network. In addition, TZ iBoat also has the capability to synchronize all your User Objects with the MFD (including the Active Route). If the iPad has access to the Internet, TZ iBoat Software will be able to back up your data to the cloud using your My TIMEZERO account.

*AIS module sold separately.

DRS4W Radar Overlay

Furuno 1st Watch Wireless Radar DRS4W with TZ iBoat provides a Radar overlay image across the App's navigational chart on your iPhone or iPad in real-time.* Additional modules allow Radar overlay from DRS-series antennas.

* Radar Module (in-app purchase required).

Anchor Watch Alarm NEW

The NEW advanced anchor alarm features allow you to choose the anchor activation and positioning method to perform quick management, and gradual display of the alarm.

TZ Navigator V4 >>> Spec P95

- Marine navigation software with a fast and smooth full 2D/3D chart engine: Our navigation software operates in a fully rendered 3D environment and delivers unparalleled speed and a seamless chart plotting experience
- Worldwide chart coverage: Mm3d chart catalog with raster and vector charts (C-MAP and Datacore by Navionics)
- Connect your GPS and Autopilot (NMEA compatible serial ports or Ethernet by Furuno)
- Free worldwide weather forecast service: Download/overlay weather updates for free, allowing you to perform advanced planning
- Redesigned and user-friendly interface: The exclusive TIMEZERO interface combines functionality with ease of use, providing for a practical and personalized navigating experience
- Exclusive PhotoFusion™: Fuse satellite images to the marine chart
- AIS/TT function included: TIMEZERO can be connected to any AIS using NMEA0183 or via Ethernet
- ActiveCaptain integration: TIMEZERO is the first navigation software to offer ActiveCaptain Points-of-Interest (POI) integration and real-time updating
- Marine charts, 3D data, worldwide tide database (display tidal data on TIMEZERO to know about water depth in ports) and standard satellite photos
- Routes & Waypoints management
- New Route Planning Wizard/Security Cone/Odometer NavData
- New Furuno advanced compatibility
- Radar overlay module available (requires DRS series antenna)

Route Planning Safety

Security Cone

Weather Routing with the TZ Routing Module

TZ Professional V4 >>> Spec P95

- The latest version of the PBG module allows you to create clearer, more realistic charts of the seafloor. Connect to DFF-3D Multibeam Sonar with optional module
- Instantaneously display a point-to-point depth profile window. This 2D view allows you to identify the depth variations with unequaled precision (rocks, shipwrecks, etc.)
- A workspace exclusively dedicated to professional fishermen allows for personalization of 2D/3D, so info that is most pertinent is shown first
- Keeping up-to-date charts is an essential element to ensure the safety of all those at sea
- Now compatible with the official S57/S63 formats
- Thanks to cutting-edge augmented reality technology, TZ professional allows you to display the active route and cross track distance directly on the camera video feed. Identify all boats equipped with AIS system surrounding you and mitigate the risk of collision
- Up to three monitors can be used simultaneously working on independent workspaces
- TZ Professional introduces the new Premium Oceano-O service for pelagic fishing, providing higher resolution and a new type of multi-layer data. This service is geared toward commercial fisherman and advanced sport fishermen who want to target best possible fishing spots

Ultra Realistic Seafloor Bathymetry

AIS with Cartography Overlay

MODEL1623

►►► Spec P97

5.7" Silverbright LCD Marine Radar

KEY FEATURES:

- Exceptional short-range target detection
- Automatic adjustment of antenna rotation speed according to selected range scale for optimum performance at all ranges
- Watchman mode with very low power consumption —only 8 W
- Display a “lollipop” indication of selected waypoint position (optional input required)
- Excellent screen clarity, day or night
- Reverse video feature for nighttime visibility
- Zoom window for close observation of a specific area
- Intuitive operation with simple key layout
- Not available in EU

Antenna Selections:

MODEL1623	
Output Power (kW)	2.2
Size	15" Radome
Range Scale (NM)	0.125-16
Rotation Speed	24/31/41 rpm

Big Radar Features in a compact display designed for pleasure craft and small fishing boats!

Wirelessly Connect to Your Mobile Devices and GP-1871F/1971F

The Furuno DRS4W Wireless Radar can be connected to the GP-1871F/GP-1971F GPS/WAAS Chart Plotter. Refer to pages 43-44 for details.

MODEL1815

►►► Spec P97

8.4" Color LCD Radar

KEY FEATURES:

- Compact radome antenna with 4 kW transmitter output power and low power consumption - 38 W max
- Easy installation and intuitive operation
- Advanced auto-adjust settings for Gain/Sea clutter and Rain clutter
- AIS/Fast Target Tracking*: Target speed and course vector are displayed seconds after target acquisition
- True Trail Mode: Moving objects will appear on the main screen with a colorful trail
- True View Mode: Based on the head-up mode, reduces the discrepancy between an observed target and what is displayed on the Radar
- Echoes in yellow, green, orange or white colors
- User-programmable function keys
- Swivel mounting bracket to adjust the angle of the display unit

*Optional input required

Antenna Selections:

MODEL1815	
Output Power (kW)	4
Size	19" Radome
Range Scale (NM)	0.0625-36
Rotation Speed	24 rpm

AIS/Target Tracking Up To Ten Targets*

Fast Target Tracking function manually or automatically acquires and tracks 10 targets. After selecting a target, it takes only a few seconds for a speed and course vector to be displayed. With accurate tracking information, estimation of other vessel's course and speed is made easier.

Target Tracking (TT) Symbols

Targeted vessels with AIS information

AIS Symbols

Sleeping AIS Target

Lost Target

Activated Target

Dangerous Target

Selected Target

AIS Display with FA-40/70 Units*

When connecting a Furuno FA-40/70 AIS unit, up to 100 AIS targets can be tracked and displayed on the Radar screen. You can easily read detailed information about other AIS-equipped vessels nearby, such as speed and heading. Additionally, the FA-70 AIS transponder improves safety during travel by sharing the status and position of your vessel with other AIS-equipped vessels nearby.

Tracking Information

* Heading sensor is required to display AIS

Selectable Modes for Changing Situations

Zoom Mode

Expands the length and width of a selected target with the magnification of 2.0 in the zoom window.

Off Center Mode

Focus on a specific area ahead of or around the vessel without losing track of the position.

Gain, Sea, & Rain Settings

By automatically adjusting the gain, the Radar eliminates unnecessary echoes and displays a clear image.

True Trail Mode*

Moving objects will show up on the main screen with a gradational trail. These trails make it possible to see the movement of nearby vessels in the blink of an eye.

* True Trail Mode: Heading sensor is required

Multiple-Station Configurations

Multi-station configuration allows up to three RDP157 (1815 displays) to be connected to a single antenna via an ethernet hub, without the need to install individual antenna units on each display. This configuration provides a cost saving and dynamic setup for situations requiring the ability to monitor the Radar from different locations on the vessel.

Adjustable Color Layouts

You can select the color scheme depending on your environment. From brightly sunlit to dark of the night, displayed images can always be seen.

Yellow Echoes

Green Echoes

White Echoes

Orange Echoes

Reliability, durability, and flawless performance are the hallmarks of this user-friendly and feature-packed Radar series!

MODEL1835/1935/1945

►►► Spec P98

10.4" Color LCD Radar

KEY FEATURES:

- Easy-to-install 10.4" color LCD (350 cd/m2) display
- Bonded LCD provides clear view in all weather conditions
- Stable AIS/TT* with zoom display function
- Full Screen Mode allows operators to observe a wider range around the vessel
- Enhanced Auto Tuning/Gain/Anti-Clutter controls
- Echoes in yellow, green, orange or multiple colors

*Optional input required

Antenna Selections:

Model	MODEL1835	MODEL1935	MODEL1945
Output Power (kW)	4	4	6
Size	24" Radome	3.5' Open	4' Open
Range Scale (NM)	0.0625-36	0.0625-48	0.0625-64
Rotation Speed	24 rpm	24 rpm, 48 rpm (option)	

AIS/Target Tracking Up To 100 Targets*

Up to 100 AIS and 10 TT targets can be tracked and overlaid on the Radar screen to assist the operator in tracking vessel movements. Since AIS works by a VHF transceiver system, a variety of navigational information such as vessel name, speed, ROT, draft, and the destination of the selected targets can be included in real time. Unlike TT targets, AIS targets are visible even if they are located behind large ships or islands. AIS targets can show that a vessel is coming from behind an object such as an island, where the Radar beam does not reach.

*Requires appropriate AIS, GPS, and Heading sensors

Anti-Clutter Controls

Adding to the enhanced auto clutter controls, dedicated rotary knobs are provided for the suppression of unwanted echoes from sea clutter, rain and other forms of precipitation. Anti-clutter settings can be adjusted manually to remove sea and rain clutter from the Radar screen to gain a clearer view of Radar targets.

Anti-Rain Mode OFF

Anti-Rain Mode ON

Dedicated rotary knobs to adjust GAIN/STC/FTC for simplified control.

Off-Center Mode

With a push of the "OFF CENTER" button, own ship position is shifted to a pre-selected point on the screen. This allows the operator to focus on a specific area ahead of or around the vessel without losing track of the position.

Clearance between the markings of the bearing scale is changed according to the proximity between own ship and the bearing circle, as shown in the images on the left-hand side. This is useful when estimating a target echo's bearing without using an EBL.

Full Screen Echo Image Mode

With Full Screen Mode, the entire screen is filled with an echo image. Full-screen echo presentation capability allows the operator to observe a wider view of the surrounding area. There is also an option to clear the navigation data on the Radar display. Individual navigation data can be easily toggled ON or OFF in the dedicated menu.

NAV Data ON

NAV Data OFF

Short Range Target Discrimination

With its advanced signal processing technology, the 1835/1935/1945 series demonstrates substantial increases in target detection, particularly in close range. As shown in the pictures below, the Radar clearly displays thin piers from a very short distance.

Target Zoom Display Mode

A target can be shown in a zoom display while its detailed movements are tracked by AIS or TT. Conventional zoom function is also available by which the operator sets the zoom function on the target manually.

Target A1: Target acquired and tracked

Target A2: Tracked target shifts position

Target A3: Zoom box tracks the targeted object according to its movement

Discern between vessel traffic, rain, and surface reflections to find and track the movement of targets and remove unnecessary echoes.

Model FR-8065/8125/8255

►►► Spec P99

12.1" Color LCD Radar

KEY FEATURES:

- One-touch auto-adjust settings for Gain/Sea/Rain clutter
- 48 rpm high-speed antenna rotation provides clear information in narrow passages and on high-speed vessels
- Wide viewing angle LCD for exceptional visibility from any angle
- True Motion Trails and AIS/TT Target Tracking with a zoom display function*
- State-of-the-art signal processing makes it easy to identify targets in rain and poor visibility
- "True View Mode" means Radar echoes move smoothly when own vessel is in motion*

Antenna Selections:

Model	FR-8065	FR-8125	FR-8255
Output Power (kW)	6	12	25
Size	4/6' Open Array		
Range Scale (NM)	0.0625-72		0.0625-96
Rotation Speed	24 or 48 rpm		

*Requires appropriate sensor

Full Screen & Off-Center Mode

Make use of the whole display surface with the Full-Screen mode, giving you more information when making important decisions. When combining Full-Screen mode with Off-Center mode any target or point of interest can be observed in detail. The overlay information can be turned off to observe targets obstructed by the text as well as providing an unobstructed Radar view.

Target Zoom Display Mode*

When using the Target mode, vessels close by and vessels on intersecting courses are automatically displayed zoomed in. These targets will remain displayed for as long as they pose any concern. Target Trails are also displayed, making it easy for the user to determine the movements of individual vessels.

* AIS transponder and ARP11 are required to use the zoom display function

AIS/Target Tracking Up To 100 Targets

Up to 100 AIS and 10 TT targets can be tracked and overlaid on the Radar screen to assist the operator in tracking vessel movements. Since AIS works by a VHF transceiver system, a variety of navigational information such as vessel name, speed, ROT, draft, and the destination of the selected targets can be included in real time. Unlike TT targets, AIS targets are visible even if they are located behind large ships or islands. AIS targets can show that a vessel is coming from behind an object such as an island, where the Radar beam does not reach.

Advanced Signal Processing

Even during rainfalls or severe weather conditions, Radar echoes are clearly displayed, and unnecessary echoes can easily be removed instantly. The technology for removing sea, rain and snow clutter has been greatly enhanced, utilizing Furuno's state-of-the-art knowledge in digital signal processing.

A/C Rain turned off, the marina is completely covered by the rain echo.

A/C Rain turned on, the marina appears clearly.

True Trail & True View Modes*

When using the True Trail Mode, moving objects will show up on the screen with a colorful trail. True Trail Mode make it possible to see the movement of nearby vessels at a glance. The Radar echoes move smoothly on the main display thanks to "True View Mode". True View Mode is based on the head-up mode. During the Radar sweep, the echoes move according to the heading of your ship. Since echoes move in real-time, the discrepancy between an observed target and what is displayed on the Radar screen is greatly reduced.

* Heading sensor is required

The monitor can be mounted in portrait or landscape orientation to easily fit your bridge space.

Model FAR-1416/1426

Spec P100

15" Color LCD Radar with Chart Plotter

KEY FEATURES:

- Simple operation with "point-and-click" menu functionality
- Built-in chart overlay on Radar presentation*
- Use Target Analyzer™ to discern hazards, simply by looking at the color of their echo*
- Instant speed vector display for tracked targets
 - A speed vector will be displayed after clicking on a select target
- Improved sea and rain clutter removal function
 - Automatic Clutter Elimination (ACE) function provides clear echoes
- Space-saving and straightforward installation with processor built into the display
- Straightforward operation using a trackball and wheel menu selector

Antenna Selections:

Model	FAR-1416		FAR-1426	
Output Power (kW)	12		25

Refined Antennas With High Signal Accuracy and Excellent Reliability

High image quality is achieved by the signal processor inside the new antenna unit, directly converting signals from analog to digital before sending them to the main processor unit. The new antenna shape minimizes aerodynamic drag and lightens the burden on the gear box. Installation and maintenance are now easier than ever. All components of the gear box are integrated into one block that can easily be removed from the gear box when maintenance is required.

Automatic Clutter Elimination (ACE) Provides Unmatched Echo Clarity

Quickly adjust the Radar image with the push of a single button. With ACE activated, the system automatically adjusts clutter reduction filters and gain control according to sea and weather conditions selected by the user (calm/rough sea/hard rain).

Advanced Tools For Simplified Navigation

The user interface of the Radar utilizes carefully organized operational tools: The **Status Bar** and The **InstantAccess Bar**. These operational tools deliver straightforward, task-based operation, allowing the operator to quickly perform tasks without having to navigate a complex menu tree.

Target Analyzer™ Function

Target Analyzer function displays moving targets, stationary targets, rain, sea surface, and targets closing in on your vessel in different colors. Spot hazardous targets simply by the color they are displayed in. It can increase your safety as well as improve situational awareness.

Fast Target Tracking

After selecting a target, it takes only a few seconds for a speed and course vector to be displayed. With accurate tracking information, estimation of other vessels' course and speed is made easier.

Chart Overlay On Radar Presentation*

By overlaying Radar presentation and chart map, you can easily recognize coastlines and buoys at a glance. Records of your vessel's track points and waypoints will help memorize fishing points. When the Chart Radar presentation and chart map are overlaid, North-Up, Course-Up, and Head-Up direction modes will be available.

- Enhanced precision utilizing SBAS (Satellite-Based Augmentation System), requires a GPS radio beacon receiver and GPA021S antenna unit, available as options)
- Simplified menu operation
- Bridge Alert Management (BAM) compliant

Bridge Alert Management-Ready

The GP-170 is BAM (Bridge Alert Management) ready and boasts a variety of display modes, including Plotter, Course, Highway, Data and Integrity. The Integrity display mode delivers a highly-accurate Skyplot presentation of currently viewable satellites, status on GNSS/SBAS signal reception including strength and SNR, and elevation angles of available satellites, as well as detailed information about available beacon stations.

GPS/Chart Plotters

"I have a pair of GP-1971F's and they BOTH worked flawlessly over the course of 2,000 nautical miles, with one performing dedicated Fish Finder duties and the other the Chart Plotter."

*- Capt. John Raguso,
The Fisherman Magazine*

Model GP-1871F

▶▶▶ Spec P110

**7" WIDE GPS/WAAS Chart Plotter
with built-in CHIRP Fish Finder**

KEY FEATURES:

- Easy and intuitive operation with multi-touch interface
- Daylight viewable multi-touch display with excellent readability, brightness of 1000 cd/m² (typical)
- Anti-reflective glass coating, strengthened glass filter
- Anti-fingerprint treatment on AR glass*
- Internal GPS/WAAS antenna for simplified installation
- Internal memory: 30,000 waypoints, 1,000 routes
- Autopilot (NAVpilot-300 and NAVpilot-711C) controls available on the display (sold separately)
- Built-in TruEcho CHIRP™ Fish Finder (single-band)
- Fish Finder's Post-processing Gain Control applied to all echoes displayed on the screen
- Detects fish lying near the bottom with White Edge function
- Compatible with DRS4W 1st Watch Wireless Radar

* GP-1971F only

Model GP-1971F

▶▶▶ Spec P110

**9" WIDE GPS/WAAS Chart Plotter
with built-in CHIRP Fish Finder**

Powerful Built-in Features Maximize Your Catching Potential

TruEcho CHIRP™ Fish Finder*

The high level of detail available with TruEcho CHIRP™ technology helps to distinguish fish schools, even when close to the seabed.

ACCU-FISH™**

Individual fish size is calculated from echo strength. ACCU-FISH™ can detect fish sizes of 10 cm to 199 cm, at depths of 2 m to 100 m.

RezBoost™ Fish Finder**

Provides a higher resolution picture of fish schools from a standard 50/200 kHz dual frequency transducer.

Bottom Discrimination Function**

The Bottom Discrimination feature enables the Fish Finder to indicate if a major component of the seabed is mud, sand, gravel or rocks.

*: TrueEcho CHIRP™ transducer required.

** Must be connected to a compatible dual-frequency transducer.

GUI Inherited From TZtouch2

Optional Wireless Radar Connection to DRS4W via iOS

Radar can be overlaid onto the Chart Plotter display via wireless connection to the Furuno DRS4W 1st Watch Wireless Radar. The DRS4W's wireless configuration makes it a breeze to add the compact 19" Radar dome to any vessel. The DRS4W can also display the Radar presentation on one connected iOS smart phone or tablet, offering a major upgrade in safety and versatility.

1st Watch Wireless Radar Model DRS4W.
Refer to page 26 for details.

GPS/Chart Plotters

With a variety of innovative functions, shortcut control keys and a 12.1-inch IPS screen that provides clear visibility, the GP-3700 series gives you immediate situational awareness. Large storage capacity for track points, buoy points and marks/lines makes it a perfect solution for long-term fishing operations.

Model GP-3700

▶▶▶ Spec P111

12.1" GPS/WAAS Chart Plotter

Model GP-3700F

▶▶▶ Spec P111

12.1" GPS/WAAS Chart Plotter with built-in Fish Finder

KEY FEATURES:

- Customizable keys allow you to create menu shortcuts before leaving the dock for a more intuitive operating experience
- Screenshot function allows you to look back at past data
- 12.1" large IPS LCD screen features a distinctively clearer and wider viewing angle with excellent readability
- Stores up to 30,000 own ship track points, 10,000 TT/AIS/GPS buoy points and 30,000 marks/lines
- Utilizes MapMedia Vector cartography
- Scroll Back function allows you to scroll backwards through the Fish Finder history to find fishing grounds or fish targets again, so that you can drop a mark and plot a course back to that area
- A wide variety of display modes can be cycled through at the touch of a dedicated DISP key
- "UNDO" key lets you go back one operational step of deleting and drafting your marks and lines with a single press of a button
- Easy-access USB flash drive can be connected to the front panel

Smart Features For Ease-Of-Use

Both the GP-3700/3700F incorporate an easy-to-use interface while adding new enhancements and features. With a variety of innovative functions, shortcut control keys and a 12.1" IPS screen that provides clear visibility, the GP-3700 series gives you immediate situational awareness. Large storage capacity for track points, buoy points and marks/lines makes it a perfect solution for long term fishing operations.

Colorful keys allows mark lines and points on the display.

Trackball can be used to quickly move the cursor, while the arrow keys can be used for more precise cursor manipulation.

Variety Of Orientation Modes*

The GP-3700 Series features Head Up, North Up, Auto Course Up, Course Up, Go To Up, and Specified Direction Up display modes. Specified Direction Up mode is a target-oriented navigation map, allowing the chart to remain vertical in the direction of the target. Select the desired display mode to suit your operational needs.

*Requires appropriate sensor

Head Up Mode

Specified Direction Up Mode

Versatile Display Modes

The GP-3700 Series provides and displays navigation data in a variety of modes. All of the available display modes can be switched by pressing the DISP key. Plotter, Compass, Satellite information, and Fish Finder* can be selected and customized to match your preferences.

*GP-3700F only

*NOTES:

Use at a depth of 5 m – 100 m. Use transducer in transom mount or thru-hull mount (Requires use of compatible dual-frequency transducer). To show a consistent display of the actual bottom, set the range display of the fish finder screen to "auto". Enter the ship's draft value. Use a ship speed of ≤ 10 kn. In some instances, bottom component indicated on the display may differ from its actual bottom structure.

Fish Finders

Model FCV-588

►►► Spec P113

8.4" Fish Finder

Model FCV-628

►►► Spec P113

5.7" Fish Finder

KEY FEATURES:

- Dual-frequency Fish Finder (50 kHz to 200 kHz) equipped with revolutionary RezBoost™ signal processing technology*:
 - Improved clarity and resolution that was previously impossible with conventional narrow-band transducers has been made possible thanks to Furuno's exclusive RezBoost™ technology
- ACCU-FISH™ – A unique fish size analyzer based on digital technology*
- Bottom Discrimination – Analyze bottom structure*
- White Line feature – Detect fish lying near the bottom
- Configurable Alarm function (depth, fish echoes, etc.)
- Post-processing Gain Control applied to all echoes displayed on the screen
- Share and display information with a connected Chart Plotter**
- Fast transmission rate of 3,000 PRR (Pulse Repetition Rate) per minute (at 5m depth range)

* Compatible thru-hull or transom mount transducer required

** Compatible Chart Plotter required

RezBoost is a revolutionary signal processing technology that improves resolution and target separation when using conventional narrowband transducers.

Boost Your Resolution with RezBoost™

RezBoost™ is a revolutionary signal processing technology developed by Furuno that improves resolution and target separation when using conventional narrow-band transducers.

Spot individual game fish surrounding bait balls, as well as fish close to the seabed. With RezBoost™, not only can you expect higher resolution and crisper visuals, but also improvements in the ACCU-FISH™ function.

Compared to conventional signal processing techniques (FDF), a RezBoost™ Fish Finder produces an image that is up to 8 times^{*1} clearer. A TruEcho CHIRP™ Fish Finder (requires a special transducer) produces an image that is up to 10 times^{*1} clearer when compared with FDF. What can be done with a conventional narrow-band transducer, like the one you might have installed on your vessel, is truly impressive.^{*2}

^{*1} RezBoost™ performance may vary depending on depth, range and signal frequency used.

^{*2} The Enhanced mode of RezBoost™ requires a RezBoost™ capable thru-hull or transom mount transducer.

Bottom Discrimination Functionality

The Bottom Discrimination function enables the Fish Finder to indicate whether the bottom is composed mainly of rocks, gravel, sand or mud. This provides you with valuable information that helps you locate rich fishing grounds and boost your catch of the day. The probability display mode shows the most probable bottom composition in graph form, while the graphic display mode does the same graphically or using four colors.

Differentiate with ACCU-FISH™

ACCU-FISH™ is a fish size assessment function that is unique to Furuno. In order to assess individual fish size, echo returns are evaluated based on strength and turned into fish size display on screen. ACCU-FISH™ can detect fish size from 10 to 199 cm, in depths of 2 to 100 m. In some instances, fish size indicated may differ from actual size. Please read the operator's manual carefully before using this feature.

The fish mark can be utilized to display individual fish echoes when they are detected. It helps beginners to identify fish echoes for a more engaging fishing experience. Fish marks are selectable from either a circle, square, or two fish symbols. The fish symbols are displayed in two different sizes (Large: over 50 cm; Small: 10 to 49 cm), and are a great help for anglers when identifying individual fish. The circle and square symbols help identify individual fish without hiding the underlying echo.

With RezBoost™ technology, the resolution is increased, leading to sharper and more defined echoes. Thanks to this increase in resolution, the accuracy of the ACCU-FISH™ function is also improved. ACCU-FISH™ is very useful when you need to determine fish size, but also has the added benefit of making fish echoes more visible when viewed from a distance. With ACCU-FISH™, you can spot individual fish echoes, even from the deck of your vessel.

Fish Finders

With Quick Gain control, changes you make to the gain setting are applied not only to new echoes, but also to all past echoes on the screen.

Model FCV-295

▶▶▶ Spec P113

10.4" Color LCD Fish Finder

KEY FEATURES:

- Post-processing gain control applies changes to gain setting for all existing returns on the display
 - White Edge feature for enhanced bottom discrimination
 - Furuno Digital Filter delivers crystal clear target presentation
 - Furuno Free Synthesizer (FFS) allows for adjustable operating frequency
 - Available Heaving Compensation provides stable echo presentation even in rough seas (FCV-1150 only)*
 - Unique fish size analyzing function ACCU-FISH™ mode (available when FCV-1150 is connected with CA50/200-1T transducer)
 - Bottom Hardness output to TimeZero and PC Navigation suites for 3D mapping
- *Requires appropriate sensors

Model FCV-1150

▶▶▶ Spec P113

12.1" Color Fish Finder

Optimized with Furuno Digital Filter (FDF)

Furuno digital filter optimizes the gain to obtain highly defined images of underwater conditions. The FCV-295 and FCV-1150 can clearly show target fish close to the seabed. The digital filter also eliminates noise to deliver sharp and detailed echo presentation, achieving detection of fishing reefs and even individual fish with absolute clarity.

Post Processing Gain Control

With Quick Gain control, changes you make to the gain setting are applied not only to new echoes, but also to all past echoes on the screen. This lets you compare past and current echoes under the same gain setting. Because the changes are applied to both new and existing returns, you can quickly and easily determine the right Gain setting for your conditions.

Gain: 5

Gain: 8

Discern Between Structure and Fish Returns

The top of the seabed is displayed in white to easily discern seabed structure from bottom fish returns. While conventional bottom discrimination function (i.e.: White Line) is applied to the strongest echoes, the White Edge function enhances the discrimination between bottom fish and the seabed.

White edge

White line

Heaving Compensation (FCV-1150 Only)

Even in rough sea conditions the FCV-1150 compensates for heaving, presenting a display without undulations caused by the sea conditions. Furuno SCX-20/21, SC-33, SC-70, or SC-130 Satellite Compass™ required.

Photo: 19" Marine Display
MU-190HD (Optional supply)

With a transmission rate that has been increased by up to 1.4 times (200 m range), the FCV-1900 series ensures excellent target separation and clarity. You will be seeing individual targets and fish reefs like never before.

Model FCV-1900

►►► Spec P115

Black Box Hi-Resolution Dual Frequency Fish Finder

KEY FEATURES:

- Bottom Discrimination display provides estimate of seabed composition*
- Post-processing gain control applies changes to gain setting for all existing returns on the display
- Capture and review videos and screenshots
- Furuno Free Synthesizer (FFS) transceiver design allows use of user-selectable operating frequencies (15kHz to 200Khz)

Various Functions For Improved Efficiency

Display up to four different frequencies together in a compact and easy way by connecting a required network Fish Finder. Since there is no need to install additional displays, this function is especially useful for small vessels. Display two different gain settings simultaneously for increased visibility in changing water conditions and when changing vessel speed. With the press of a button you can activate the scroll back function to instantly review past echoes. Up to two previous screens can be viewed.

- Simultaneous gain setting for increased visibility
- Display up to four different frequencies
- Scroll Back Function to see where you've been

Connect a BBDS1 Network Fish Finder for Bottom Discrimination.

Increased Transmission Rate For More Detail

In low frequency, the fish is displayed in a distinct boomerang shape. In high frequency, you can clearly see the amount of detail displayed. Fish reefs can also be seen in much greater detail.

Individual fish

Fish reef

Model CH-500

►►► Spec P117

12.1" Searchlight Sonar

KEY FEATURES:

- Incredibly fast training speed, your best ally for finding fish 360° around your boat in only 3.1 seconds when set on 24° scanning step and at 20 m range
- 6 tilt angles for training speed adjustment according to user's needs:
 - Lower tilt angles produce more precise scans, while higher tilt angles are faster
- 11 display modes selectable for every situation
- HD LCD with 1024 x 768 XGA* resolution for detailed echo images and clear view
 - * The display is optimized for this resolution
- Quick Gain Control allows instantaneous gain adjustment
- Built-in motion sensor provides a stabilized target presentation in rough sea conditions
- Audible target detection freeing the user from continuous watch of the display (Requires Loudspeaker option)
- Frequency: 60/88/150/180/240 kHz
- Now available in Black Box configurations
- NEW! Display directly to TZtouch2/TZTouch3 MFDs with Video Converter Kit

*Find fish all around
your vessel, not just
underneath it!*

Horizontal and Vertical Scanning Modes

Searchlight Sonar gives you the ability to search both horizontally and vertically. With horizontal search, you can specify the tilt angle to an area around your boat. With vertical search, you can obtain detailed underwater conditions at any bearing. Combine the two to make your cruising safer and your fishing operation more productive.

Horizontal

A full circle scan (360 degree), provided by a rotating transmitter, detects fish schools around the vessel (Horizontal scan zoom mode also available).

Vertical

The Vertical scan paints the bottom profile within a user-specified vertical plane in any direction.

Vertical Full-Circle A-Scope

The A-Scope mode shows the last detected echoes with one single color. The more opaque the color, the stronger the echo.

Echo Sounder

When fully retracted, the transducer tilted to 90 degrees can locate fish schools and seabed straight down at high speeds.

Different Display Combinations

Stabilized Target Presentation In Rough Sea Conditions

The CH Series is the first of its class to have in its core an integrated stabilizer. In rough seas, the ship tends to move in every direction and its inclination can change, creating echo distortions which cause inaccurate data display. The role of the stabilizer is precisely to compensate for those negative effects and provide accurate data to the user. Thanks to the built-in stabilizer's compensation, the CH Series is able to detect fish that didn't appear originally with the non-stabilized echo.

Audible Target Detection*

The CH Series features fish and target audio signals depending on the nature and the size of the detected object. Whether there are air bubbles, big or small fish schools, and seabed, the emitted sound is different. This feature shows its usefulness during long sea trips, as it frees the user from continuously watching the screen. *Requires Loudspeaker

Figure out intuitively what is detected by differentiating their sound with the audible target detection

Model CH-600

►►► Spec P117

12.1" Dual Frequency Searchlight Sonar

KEY FEATURES:

- Two frequencies combined to increase your chances of finding fish (60/153 kHz or 85/215 kHz)
- Incredibly fast training speed, your best ally for finding fish 360° around your boat in only 3.1 seconds when set on 24° scanning step and at 20 m range
- HD LCD with 1024 x 768 XGA* resolution for detailed echo images and clear view
* The display is optimized for this resolution.
- Quick Gain Control allows instantaneous gain adjustment
- Frequency: 60/153, 85/215 kHz
- Audible target detection freeing the user from continuous watch of the display (available with optional Loudspeaker)
- Now available in Black Box configurations
- NEW! Display directly to TZtouch2/TZTouch3 MFDs with Video Converter Kit

*Furuno Sonar technology
delivers a more productive
fishing operation.*

Advanced Signal Processing for High-Resolution Output

Powerful signal and image processing based on a unique interpolation technology provides images in high resolution. Even if the fish are located near the seabed, different echoes are clearly shown and easy to understand. Additionally, the high resolution echo display gives crisp, clear echoes, which reduces stress on the eyes.

Ultra-Fast Scanning Speed

This searchlight sonar provides 6 scanning step variations (6, 12, 15, 18, 21, 24) easily switchable for high precision or high scanning speed that can cover 360° in a couple of seconds, depending on the distance of the echoes. Due to its scanning speed, the CH Series can be used at high speeds and still cover a large zone at the same time.

Dual-Frequencies Reveal Sardines and Other Baitfish

With the Horizontal Dual-Frequency mode, both low and high frequency are used and displayed at the same time in split view. By comparing echo shapes at low and high frequency, it becomes possible to ascertain the actual presence of the fish, even the small ones. Both low and high frequency echoes are overlaid to only show the echoes that matter to the fisherman. It then becomes easy to identify species regardless of their distance to the ship.

Horizontal Dual-Frequency Mode
Pictured: Echoes of Sardine Schools

Horizontal Mix Display Mode
Pictured: Echoes of Baitfish

Horizontal Scan

A full circle scan (360 degree), provided by a rotating transmitter, detects fish schools around the vessel. (Horizontal Scan Zoom mode also available)

Horizontal (Zoomed)

Vertical

The Vertical scan paints the bottom profile within a user-specified vertical plane in any direction.

Echo Sounder

When fully retracted and with the transducer pointed straight down, the sonar can be used as a fish finder for seabed and fish schools

*Scan a full
360 degrees twice
in a second!*

Model CSH-8L MARK-2

Spec P118

Black Box Omni Sonar

KEY FEATURES:

- Full-Circle Omni Sonar detects and instantaneously displays schools of fish and underwater conditions
- Black Box configuration allows for a space-saving, flexible installation
- NEW! Video Converter kits allows video directly to TZtouch2 and TZTouch3 MFDs
- Variety of available monitors built to meet the needs of tournament vessels
- The vivid 16-color display assists in recognition of seabed structure, as well as concentration/distribution of fish schools
- CSH-8L MARK-2 scans a full 360 degrees in half a second

Model CSH-5L MARK-2

Spec P118

Black Box Omni Sonar

- Various fishing and navigation data* keep the operator aware of fishing and navigation conditions * Requires appropriate sensors
- Four user-programmable function keys for quick set up according to fishing conditions or specific functions
- Second display and control unit can be easily connected for a remote second station on the flybridge
- High-power transmitter ensures reliable operation under any conditions
- Narrow beamwidth and enhanced target identification capability
- Transducer frequency:
 - CSH-5L MARK-2: 55 kHz or 68 kHz
 - CSH-8L MARK-2: 85 kHz

Optional remote controller
provides armchair control of
range and gain settings

About Omni Sonar

The transducer arrangement of an Omni Sonar consists of layers of elements, each pointed in a slightly different direction, which allows the Sonar to transmit 360 degrees instantaneously. There is no need to rotate the transducer. On a 1,000 ft range, the CSH-8L MARK-2 Sonar updates the display 360 degrees every 0.54 seconds, while the conventional PPI sonar takes a full 32 seconds to train full circle under the same range/conditions. Because this Sonar scans so quickly, it greatly improves the fishing operation, especially when searching for or following fast swimming fish, and lessens the chance of missing important changes in underwater conditions.

Detection Image of Omni Sonar

Detection Image of Conventional PPI Sonar

Omni Sonar shows the actual situation 360 degrees around your vessel, and gives all the necessary information as needed. No more blind areas to consider, allowing the operator to concentrate on the tilt, range, fishing area, etc.

The Successful Fisherman's Secret Weapon!

The CSH-5L MARK-2/CSH-8L MARK-2 is a Full Circle Omni Sonar that rapidly detects and displays individual gamefish and schools of baitfish, showing your catch in real time before they're in the spread. A game changer for high-end tournament battlewagons, midwater trawlers, purse seiners, or anyone desiring more successful fishing expeditions. Operating at 85 KHz, the CSH-8L MARK-2 is a mid-frequency Sonar. Its narrow beamwidth coupled with its enhanced target identification capabilities make it ideal for searching near the vessel or in shallow waters.

Selectable User-Friendly Operating Modes

Navigation data can be displayed in the text window, with connection of appropriate sensors. This mode is useful for detecting and tracking schools of fish.

The Sonar picture appears on the left and the signal fed from the Fish Finder at the lower right side of the screen. This mode is suitable for judging fish school concentration.

* Interface with Fish Finder required.

Sonar picture appears on the left and the audio display at the lower right side of the screen. This mode is useful for analyzing echoes in a desired area.

Multibeam Sonars

Model DFF-3D

►►► Spec P92

Network Multibeam Sonar

KEY FEATURES:

- v1.05 Software Update refines default and Time Varied Gain settings to improve fish detection at all ranges
- Outer beam detection range is up to 200 m in a 120-degree swath port to starboard direction*
- Deep water, main beam penetration directly under the boat is approx. 300 m*
- Complete set of menus in each display mode
- Easy installation with a variety of transducer options
- Customize the display according to your needs:
 - Depending on the situation and preference, a combination of screen modes can be displayed
- Full control of all features using TZ Professional (Windows OS for PC)

PBG (Personal Bathymetric Generator)

Discover new fishing hot spots as you build your own realistic 3D bathymetric charts of the seafloor. Charts are automatically saved directly to your TZT2BB/TZtouch3 so you can go back to your favorite new spots again and again.

DFF-3D MULTIBEAM SONAR

Frequency	165 kHz
Range Scale	Up to 1,200 m
Detection Range	200 m* (Side beam best performance) 300 m* (Main beam directly under boat)
ACCU-FISH™	N/A
Bottom Discrimination	N/A
Transducer	800 W

* Depending on bottom type and water conditions.

A Transducer Option for EVERY Vessel!

With the DFF-3D, there is a transducer to meet the needs of any installation. Thru-Hull, Transom Mount, and Pocket Mount transducer options are available, so the DFF-3D can be utilized on virtually any vessel, with built-in motion sensors to compensate for pitch/roll/yaw. There are even combo transducers that combine DFF-3D with either CHIRP or dual-frequency 50/200 kHz elements, so your Multibeam Sonar can be used in conjunction with a TruEcho CHIRP™ Fish Finder or the built-in TZtouch Fish Finder, requiring only a single transducer!

Transducer* (with motion/temperature sensor)

B54 Thru-Hull Mount Transducer

TM54 Transom Mount Transducer

* For a complete list of transducers, including combo transducers, see page 117.

Understand Fish Distribution Easily At-A-Glance

You may think you've seen 3D Multibeam Sonar in action, but many of those images begin disappearing as you approach 60 meters (200 feet). Furuno's DFF-3D takes 3D Fish Finding to new depths of over 300 meters (980 feet), with Side Scanning over 200 meters (650 feet). See fish and bottom structure as you've never seen them before, at depths previously unfathomable. The DFF-3D turns your NavNet TZtouch2 or TZtouch3 MFD into a Multibeam Sonar that can see 120-degrees port to starboard, allowing you to view the depth and direction fish schools are moving, while displaying the seabed condition in real time.

An Innovative Tool for Exploring the Water Column and Seabed:

Triple Beam Sounder

A single beam (middle) or triple beam (middle, left and right) Fish Finder image are displayed simultaneously. The Triple Beam display helps to understand the depth of fish targets and seabed condition under the boat and to port and starboard, as well as distribution of fish under the boat and to each side. Each beam angle and beam width are selectable.

Side Scan

Side scan clearly displays the shape of structure as a high-definition image to both port and starboard. It is suitable for searching the seabed and understanding the sea floor structure. Outer beam detection range is 200 meters (over 650 feet) in a 120-degree swath port to starboard, a distance you've never seen before!

Cross Section

Cross section displays the real-time sea column echo in 120 degrees port to starboard. This mode aids in instantly understanding the distribution of bait fish and the water column condition, with a detection range of over 650 feet, depending on bottom, water, and installation conditions.

3D History

The 3D sounder history provides an intuitive and easy to understand 3D image of the seafloor, along with fish school icons. This mode is useful in a variety of situations, such as selecting a fishing hot spot and assessing the seabed condition.

Multibeam Sonars

Model WMB-1320F/1320S/4340/6340

►►► Spec P119

S3, F3 and F3X Series Multibeam Sonar

KEY FEATURES:

- Cost-effective solution for multiple applications
 - Choose your own functions with new license options
 - TimeZero compatible with optional license
 - The 3rd generation WASSP WMB-1320F is designed for fishing and mapping operations, allowing you to maximize your catch while minimizing your time at sea
 - The entry-level WASSP WMB-1320S for mapping and survey is now more sensitive, with a higher dynamic range and lower noise level
 - Built for fishing and mapping, the WASSP WMB-4340 delivers mapping at over 500 meters, and sounding at over 550 meters depth
 - Built for fishing operations, the WASSP WMB-6340 shows fish targets at over 850 meters, with bottom detection at over 1,000 meters depth
 - Save bathymetric recording data directly into standard CDX user interface software
- Visit www.wassp.com for complete details

WASSP S/F3/F3X

Frequency	68-92 kHz (WASSP S) or 136-184 kHz (WASSP F)
Range Scale	Up to 1,000 m
Detection Range	Up to 850 m

* Depending on bottom type and water conditions.

wassp
MULTIBEAM

SEE IT ALL

- 136-184 kHz for WMB-1320F, WMB-1320S, and WMB-4340
- 68-92 kHz for WMB-6340

New Easy-to-Use Interface

The F3 Series introduced the new simplified software “WASSP CDX” for control, visualization, and data management while still providing a comprehensive set of functions to meet the most demanding fishing requirements.

Various Presentation Modes

3D Fish Density Overlay

Fish Finder

2D Mapping to 500m

Backscatter
(Bottom Hardness) at 200m

New Software Seamlessly Blends Data

Through pulse compression and advanced signal processing, WASSP delivers accurate, high-quality data in even the most demanding marine environments. Utilizing the new Version 4 CDX software, all of the new data gathered is seamlessly blended with previously recorded seabed information, resulting in beautiful, accurate mapping with no missing details or misaligned edges from multiple passes. Using the new CDX software algorithm, old and new data can be used to create an enhanced picture of current conditions.

Generate Your Own Personal Multibeam Chart

The WASSP F3/S3 and F3X series is set to revolutionize inshore fisheries and survey/mapping operations. With Wideband CHIRP technology scanning a 120-degree swath port to starboard using either 112 or 224 beams, WASSP delivers even in the most demanding marine environments, each and every time.

All-in-One Versatile DRX Transceiver Is Ready for Future Advancements

This innovative all-in-one “Black Box” is not just a robust hardware platform but also introduces cutting-edge technical innovations and incredible versatility for finding your catch, opening up countless new possibilities for your fishing operations.

Wireless Link to Tender Provides Safe Passage In Poorly Charted Areas

WASSP's next generation DRX based Multibeam Sonar has taken the important step of going wireless. This wireless link technology allows RHIB's or tenders to be deployed from larger surface vessels to map seafloor topography, assimilate sub-surface data, and provide a rapid area assessment that is wirelessly transmitted back to the “mothership” in a 3D animation. The result is real-time delivery of unparalleled underwater situational awareness to the ship's bridge and its decision makers.

Self-Learning Autopilot with Gesture Controller

KEY FEATURES:

- Self-Learning and adaptive software; each time the boat goes to sea, the software learns about sea conditions and calculates the best adjustment for smooth steering
- Fantum Feedback™ offers simplified installation (no need for physical rudder feedback unit) while delivering enhanced steering control)
- Volvo Penta IPS, Yamaha Helm Master™, Yanmar, and Seastar VCS compatible
- Easy installation and smart network-based system configuration
- Waterproof Processing Unit (IP55) and Control Unit (IP56)
- NEW optional revolutionary SAFEHELM2 and POWER ASSIST brings unrivaled steering control and comfort at the helm
- Selectable “Economy” and “Precision” Navigation Modes combine adaptive technology, providing fuel and power savings of 2.5% or more*
- “Precision” provides for tighter course keeping, within 0.01 NM of the set course
- Perfect for inboard/outboard power boats (NAVpilot-300/711C) and sail boats (NAVpilot-711C only)
- Autopilot control available from NavNet TZtouch3/TZtouch2/GP-1871F/1971F

*Based on Furuno testing and “Scenarios for a Clean Energy Future 2000” - U.S. Department of Energy (<https://www.nrel.gov/docs/ty01osti/29379.pdf>)

Model NAVpilot-711C

►►► Spec P122

Self-Learning Autopilot

Just PUSH, POINT and SHOOT (NAVpilot-300 only)

The Gesture Controller is a revolutionary and unique way to steer your boat remotely. By using Bluetooth signals, it is possible to control the Autopilot from anywhere on the boat within 10 meters. Just push, hold the button, point to the desired heading and release to let the Autopilot redirect the boat!

*Bluetooth communication between Processor Unit and Gesture Controller only.

Several Types of Graphic Displays Available

Customize the data to suit your own preferences with either digital or analog graphics. The NAVpilot-300 and NAVpilot-711C feature a color day/night graphic display, giving you much better sunlight visibility during the day, while not affecting your night vision when the sun goes down.

SABIKI™ Mode For NAVpilot-300 and NAVpilot-711C

With SABIKI™ mode your NAVpilot-300 or NAVpilot-711C have become even more capable than before. And the best thing is, there is no need to install additional hardware or sensors. SABIKI™ mode is only available on vessels with outboard engines.

SABIKI™ mode is only user selectable if the current speed is below 5 knots. Once SABIKI™ mode is selected, the course can be set with the course knob and the arrow keys.

SABIKI™ mode lets the Autopilot take control while you are drifting astern, so you can focus on fishing instead of steering. Moving astern at a slow pace SABIKI™ mode is uniquely tailored for SABIKI fishing, jigging and bottom fishing. SABIKI fishing requires a bit of technique and whether you just started or have considerable experience, the SABIKI™ mode will help you catch the bait fish needed for the big catch.

Model FI-70

►►► Spec P123

4.1" Color LCD Instrument/Data Organizer

KEY FEATURES:

- Designed to perfectly match NavNet TZtouch2/TZtouch3 and NAVpilot-300/NAVpilot-711C
- Clear 4.1" screen that is viewable even under direct sunlight
- Simple and intuitive interface allows full customization
- Bonded color LCD ensuring condensation free operation, as well as great visibility
- Use legacy wind sensors (FI-5001/FI-5001L) with the analog IF-NMEAUI Converter
- Low power consumption (0.15 A max)
- Simple AIS display through connected CAN bus devices
- Share language and brilliance settings between FI-70s when grouping them together

For Powerboats and Sailboats Alike!

The FI-70 Instrument/Data Organizer sports a vibrant 4.1" bonded color display that is visible even in the harshest sunlight conditions. Utilizing NMEA2000, external sensors can easily be connected for simple and reliable operation. The FI-70 features an easy to operate user interface. You can customize almost every display property, allowing you to choose the information you want to be displayed, in the way you want to see it!

Whether you own a powerboat or sailboat, the FI-70 will be equally useful with the proper sensors connected. For maximum performance and simple setup, the FI-70 automatically asks you which type of vessel you have, helping to customize operation of the unit.

Various Display Options Are Available

Day and Night modes are also available for less eye strain. With Day and Night mode, losing your night vision is no longer an issue. Simply change between the two modes with a menu setting.

Sensors and Accessory Options

Model FI-5001/5001L

Wind Transducer (L: Long Shaft)

Angle Accuracy: $\pm 10^\circ$
Speed Accuracy: $\pm 5\%$ (20 kt)
PSU: 12 VDC, < 40 mA
Transducer cable (option): 30/50 m
Short Shaft Length: 51.81 cm
Long Shaft Length: 86.61 cm

Wind transducer comes with a snap-lock fitting that holds the shaft securely, preventing the sensor from being damaged from excessive vibrations aboard the craft.

Model FI-5002

Junction Box

CAN bus backbone x 2 ports
CAN bus x 6 ports
PSU: 12 VDC, < 2 A

Model DST-810

Depth/Speed/Temp Sensor

Frequency: 235 kHz
Cable: 6 m

Model IF-NMEAFI

Analog NMEA Data Converter

CAN bus x 1 port
PSU: 15 VDC, < 200 mA

Picture in Picture (PIP)

(MU-150HD/152/190HD/190/231/270W)

Composite video (NTSC/PAL) input is available for displaying video images from an onboard TV/DVD player. For MU-150HD/190HD with more than two composite video inputs, the images in the PIP window automatically switch alternately.

Slim, Lightweight and Compact

(MU-150HD/190HD/190/231/270W)

The MU Display Series is slim in depth, light weight and is so compact that it fits right into virtually any console. Its space-saving design makes optimum use of your dashboard.

MU-190HD

MU-150HD

Waterproof

(MU-150HD/190HD)

The MU-150HD/190HD has a waterproof display and is built to stand up to tough marine conditions when mounted at fly bridge console. The display can be rinsed in water for easy, worry-free cleaning.

Low Power Consumption

(MU-150HD/190HD/190/231)

Utilizing the latest LED backlight, the MU Display Series delivers sharp, high quality images with bright colors and all at very low power consumption.

With the introduction of a variety of Black Box products, Marine Displays are becoming more of a necessity than a luxury.

For crystal clear presentation for your Radar, Chart Plotter, NavNet, or other electronics, turn to the unmatched quality and reliability that you depend on from Furuno.

Remote Displays

Model RD-33

►►► Spec P127

4.3" Remote Display

KEY FEATURES:

- 4.3" Sunlight Viewable color LCD
- Maximum visibility under various ambient conditions, at night, and under direct sunlight (brightness of LCD is 700 cd/m2)
- Enhanced data legibility thanks to large characters and high-resolution display
- Full-screen single box presentation down to six-way split screen presentation available
- Supports both CAN bus and NMEA0183 interfaces
- Two independent CAN bus input and output ports incorporated for daisy chain networking
- Internal NMEA0183/CAN bus conversion capability available
- Straightforward operation compatible with NavNet Series

See All Your Data - The Way YOU Want It

The RD-33 is a navigational data organizer that allows the operator to select the perfect way to display data from interfaced equipment, such as GPS, Chart Plotter, Radar, Fish Finder, Autopilot, Instruments, and other sensors, including engine information. The high-contrast, color 4.3" LCD may be installed in a compact space, remote from its data sources. The screen is impressively bright, remarkably crisp, and easy to read. Various display modes are available, including Speedometer, Highway, and Text. The Text mode presents up to six of the most necessary types of data. The display layout can be customized for your specific needs. This versatile product can also be added to a NavNet system, displaying a variety of navigation data from the CAN bus network.

New and Improved Look and Feel

The RD-33 features a visually appealing fresh new look, combining easy access with user functionality. Thanks to the bright, high-resolution LCD, the RD-33 provides an easy-to-read display to monitor information from remote equipment, through an intuitive graphical user interface.

Display Options In Two Different Styles

Wind A

Wind B

SOG A

SOG B

Customizable Split-Screen Presentation

You can customize the view to display the information in the format that works best for you. The RD-33 allows you to split the screen in up to six separate segments and provides graphical or numerical representations of environmental changes to facilitate navigation.

Full Screen

6-Way Split

Model RD-50

>>> Spec P127

8.4" Remote Display

KEY FEATURES:

- 8.4" Sunlight Viewable color LCD, viewable under direct sunlight at wing console
- Digital/graph/analog displays available
- Display orientation of up to 4-way split screen
- Adjustable background color for both day and nighttime use
- Up to 10 displays can be connected with a daisy chain cable, with display brilliance able to be tuned from one dimmer controller

Versatile and Bright Data Display

The RD-50 is an 8.4" Color LCD remote display unit that displays a wide variety of data from onboard sensors. The RD-50 has 3 display modes: digital, analog, and graph. Up to 10 displays can be connected with a daisy chain cable. The display brilliance of all units connected in this way can be centrally controlled from 1 dimmer controller.

Satellite Compasses

*The perfect heading solution
for any vessel installation, even
where the view of satellites may
sometimes be obstructed!*

Model SCX-20

▶▶▶ Spec P129

NMEA2000 Satellite Compass™

Model SCX-21

▶▶▶ Spec P129

NMEA0183 Satellite Compass™

KEY FEATURES:

- Perfect for NavNet TZtouch2/TZtouch3, NAVpilot-300/711C, Sonar and WASSP installations
- Outputs accurate Time, Position, Heading, COG/SOG, ROT, Roll/Pitch/Heave, 3-Axis Speed, Air Temperature, and Air Pressure data
- Unprecedented heading accuracy for Radars, Sonars, and Navigation
- Utilizes four Multi GNSS (GPS, QZSS, GLONASS, Galileo) antennas
- 1.0 degree heading accuracy, 0.02 knot speed accuracy
- Lightweight antenna - only 1 kg!

MODEL	SCX-20/SCX-21
Heading Accuracy	1.0° rms (static), 0.5° rms (dynamic)
GPS Fix	5 m approx. (2 drms, HDOP < 4)
MSAS Fix	4 m approx. (2 drms, HDOP < 4)
WAAS Fix	3 m approx. (2 drms, HDOP < 4)
Follow-up Rate	45°/sec
Setting Time	60 secs approx.

Revolutionary Baseline Architecture!

Utilizing four separate GNSS Antennas for the ultimate in responsiveness, the SCX-20 and SCX-21 set a new standard for reliable and accurate heading for all of your marine electronics. Traditionally, a Satellite Compass™ uses one baseline between two antennas to calculate heading, while the SCX-20/21's four antennas can calculate heading information using any one of the six baselines drawn between the four antennas. The unprecedented quad-antenna design of the SCX-20 and SCX-21 makes them capable of calculating extremely accurate heading, pitch, roll, and heave information. They are the perfect heading solution for complex vessel installations where the view of satellites may sometimes be obstructed.

True Motion Echo Trails for Radar/Chart Plotters

True echo trails are available when the SCX-20 or SCX-21 is connected to a capable Furuno Radar, helping to determine own ship's movement as well as the movement of other vessels. Accurate speed and heading data ensures that target trails are displayed smoothly and accurately, without the jagged, zig-zag appearance common to a Satellite Compass™ with a higher degree of deviation.

Radar Echo Trail Zig-Zag Domination

When connected to the SCX-20/21, the Radar's echo trails hold steady and clearly depict an accurate echo trail thanks to the SCX-20/21's amazing accuracy. Company A's Satellite Compass™ fails to uphold a steady heading, making echo trails virtually unintelligible. Company B's heading accuracy fluctuates by +/- 3° with a slower update, causing an echo trail that has a wide zig-zag pattern. Company C's heading accuracy fluctuates by +/- 5° with a faster update, causing an echo trail that is indistinguishable and confusing.

MORE ACCURATE

SCX-20/21 < COMPANY B < COMPANY C < COMPANY A

LESS ACCURATE

Model SC-33

▶▶▶Spec P128

NMEA2000 Dome Satellite Compass™

KEY FEATURES:

- Heading accuracy of 0.4°
- 3-Axis speed monitoring
- NMEA2000 Certified
- NavNet TZtouch2/TZtouch3 Series compatibility
- Multi-GNSS with GPS, Galileo, GLONASS, QZSS satellite network
- Strong against multipath, high-reliability
- Works perfectly with TIMEZERO software
- Free from regular maintenance due to solid-state design

MODEL	SC-33
Heading Accuracy	0.4°
GPS Fix	10 m (95%)
GNSS Fix	3 m (95%)
Follow-up Rate	45°/sec
Setting Time	1 min
Antenna Unit	Dome

Sleek, Fast, and Accurate!

The SC-33 Satellite Compass™ provides highly accurate heading information for navigation equipment such as Radar, Plotter, Autopilot, Fish Finder, and Sonar. With its compact GNSS antenna and built-in processor, it can be used for a wide variety of applications on any type of vessel. This all-in-one system delivers incredibly accurate heading, roll/pitch/heave, GPS position, SOG (Speed Over Ground), COG (Course Over Ground), and ROT (Rate Of Turn) data.

Revolutionary 2-Antenna and Rate Sensor System

In order to calculate roll & pitch data, a Satellite Compass™ requires two vectors. The SC-33 employs a dual GNSS antenna system that calculates a single vector while a 3-axis rate gyro and acceleration sensors add the second vector. This configuration enables the SC-33 to calculate highly-accurate roll and pitch data without using a third sensor.

BEFORE Stabilization

AFTER Stabilization

Heaving Compensation for Fish Finders

Even in heavy seas, accurate heave compensation from the SC-33 enables Fish Finders, such as the FCV-1150 or NavNet TZtouch2/TZtouch3, to show you an unwavering presentation of the seabed, without the undulations caused by sea conditions.

Satellite Compasses

SC-703 for SC-70

SC-1303 for SC-130

Model SC-70

►►► Spec P128

Satellite Compass™

KEY FEATURES:

- Tri-sensor antenna that provides highly-accurate heading for all your vessel's navigation electronics: Autopilot, Radar, ARPA, Scanning Sonar, Current Indicator, Chart Plotter, ECDIS, Autopilot, and more
- Utilizes GNSS such as GPS, Galileo, and GLONASS for high precision
 - SBAS (Satellite Based Augmentation System) compatible (EGNOS, WAAS, MSAS)
- Provides precise data for SOG, COG, ROT, and L/L
- Speed on 3-axis (bow, stern, and longitudinal) for safe navigation and berthing
- IMO type-approved as THD, GPS, and ROTI compliant with the IEC and ISO standards
- Rapid follow-up rate 40°/s (twice the IMO high speed craft requirement, 20°/s)
- Maintenance free and no recurring costs, as there are no mechanical parts
- Super short attitude fixing time - 90 sec (dependent on equipment location)
- Easy to retrofit when using existing antenna cabling¹ (For SC-50/55/60/110/120)
- Precision Pitch/Roll data in Analog² and Digital formats for Vessel Stabilization, Sonar, etc.

¹: Requires the LAN_CNV kit, available as an optional extra.

²: Requires the IF-NMEASC, available as an optional extra

Model SC-130

Model PG-700

►►► Spec P127

Integrated Heading Sensor

KEY FEATURES:

- Provides highly-accurate heading data
- Black Box type fluxgate magnetic sensor
- CAN bus interface incorporated
- Can be mounted on either the bulkhead or the floor, thanks to the standard L-bracket

Easy Mounting with L-Bracket

PG-700 can be mounted on either a bulkhead or the deck using the standard L-bracket. Thanks to the versatility in design, facing the PG-700 towards the bow is a breeze.

Model PG-500

►►► Spec P127

Integrated Heading Sensor

KEY FEATURES:

- Inexpensive heading sensor with the highest accuracy and stability in this class of equipment
- Automatic correction for local magnetic variation with an appropriate GPS Navigator or manual correction with an optional Remote Display RD-33
- High stability for a solid-state rate gyroscope
- Compact waterproof housing with visible status indicators for simple installation
- Three heading data output ports: two IEC/NMEA0183 ports, one AD-10 port incorporated

Maintenance-Free Heading Solution

Furuno's PG-500 is a rate compensated heading sensor that incorporates innovative electromagnetic compass technology for highly-accurate and stable readouts of your ship's heading. The sensor detects terrestrial magnetism and produces compass data that can be utilized in NMEA0183 and Furuno AD-10 formats. Typical applications include true Radar echo trail and true motion, Autopilots, Chart Plotters, scanning Sonars and more. These sophisticated components are contained within a rugged, compact case. Unique design elements make the PG-500 virtually maintenance-free and easy to install.

Model FA-40

►►► Spec P130

AIS Receiver

KEY FEATURES:

- Enhances safe navigation by receiving critical navigation information from local AIS-equipped vessels
- NMEA2000 output to NavNet TZtouch MFDs and compatible devices
- Serial output for integration with various Radar, Chart Plotter systems, and PCs for added redundancy and installation flexibility
- Compatible with NavNet Vx2/TZtouch2/TZtouch3

All-Condition Collision Avoidance

The FA-40 Automatic Identification System (AIS) Receiver provides real-time information about AIS-equipped vessels to your NavNet, AIS-ready Chart Plotter, navigation software or Radar. The information is graphically presented allowing you to monitor and avoid AIS-equipped vessels in your area. The information that the FA-40 receives includes the vessel name and call sign, position, course, speed over ground, and other useful information. Since AIS targets can be received even if they are not within line of sight, the FA-40 enhances situational awareness in congested waterways, limited visibility, or heavy sea conditions, and gives the navigator much more information about AIS equipped vessels.

The FA-40 has one NMEA2000 and one NMEA0183 port. This provides simple and easy connection to NavNet systems, AIS-capable Radar, Chart Plotters, and TimeZero. The FA-40 will work with virtually any marine VHF antenna. An optional VHF signal splitter is offered to allow the FA-40 to work with an existing VHF radio antenna installation.

Model FA-70

►►► Spec P130

Class B+ AIS Transceiver

KEY FEATURES:

- Fully satisfies the technical standards for Class-B AIS, IEC 62287-1
- Receives both Class-A and Class-B AIS information
- Outputs data to NavNet TZtouch2/TZtouch3
- Flexible integration with various AIS-compatible Radar and Chart Plotters
- Switchable, high-speed SO-TDMA and CS-TDMA
- Internal Antenna Splitter

Accurate Information Exchange

The FA-70 is a Class-B+ AIS that transmits your vessel information at higher power & faster rates than typical Class B units for added awareness. SO-TDMA and CS-TDMA guarantees an AIS time slot allocation, making you visible in congested waters. It complies with IMO MSC.140(76) Annex 3, A.694, ITU-R M.1371-2 and DSC ITU-R M.825-3. It also complies with IEC 60945 (EMC and environmental conditions). The FA-70 consists of a transponder unit with GPS antenna. A VHF antenna is required and should be supplied separately. The transponder contains a VHF transmitter, two TDMA receivers on two parallel VHF channels, interface, communication processor, and internal GPS receiver. The internal GPS is a 12-channel all-in-view receiver with differential capability. It also gives position, COG, and SOG.

Model FA-170

►►► Spec P130

Class A AIS Transponder

KEY FEATURES:

- Complies with IMO MSC.74(69) Annex 3, IMO MSC.302(87), A694, ITU-R M. 1371-5 and DSC ITU-R M.825; It also complies with IEC 61993-2 (Type testing standard) and IEC 60945 Ed. 4 (EMC and environmental conditions)
- Displays information about AIS-equipped ships, as well as coastal stations and Aids to Navigations within VHF coverage
- Outputs AIS data to NavNet TZtouch/TZtouch2/TZtouch3, Radar, and other navigational equipment for collision avoidance support

2018-2019

Collision Avoidance Made Easy!

Displays symbols for AIS-equipped ships, base stations, AIS-SART's and more. When you select a specific target, the information about the ship (MMSI [or name, when available], heading, SOG, COG, etc.) is displayed.

MF/HF Radiotelephone

KEY FEATURES:

- FS-1575 150 W MF/HF Radio
- FS-2575 250 W MF/HF Radio
- MF/HF Radiotelephone with DSC facility
- Fully meets GMDSS carriage requirements for SOLAS ships operating in A3 and A4 sea areas
- Meets the new ITU recommendation on digital selective calling system for use in the Maritime Mobile Service, ITU-R M.493-14
- High-contrast 4.3" bright color LCD (480 x 272 pixels)
- Capable of distress, safety, and routine communication
- Instant selection of 256 user-specified channels with a rotary knob or direct keypad input
- Quick access to DSC message composition using dedicated keys on the control unit
- Quick access to dedicated functions in the menu operation using numeric keypad

Optional Intercom

Model LH-5000

►►► Spec P134

Loud Hailer

KEY FEATURES:

- Two powerful 30 W hailer outputs (1 forward/1 aft)
- Listen Back feature for two-way communication
- Eight automatic fog/warning signals
- Up to 6 intercoms for onboard communication and PA (5 W each)
- Built-in high quality speaker
- Bright LCD for easy operation
- Flush mount capability
- Water protected main unit, microphone and intercoms speakers

8 Channel Public Announcement

With 2 hailers and 6 intercoms providing a total of 8 possible channels, you can now coordinate any action even on a big ship or facility.

Model NX-300

►►► Spec P134

NAVTEX Receiver

KEY FEATURES:

- Paper-free Navtex Receiver
- Selectable frequency for both international and domestic/local Navtex messages
- Uninterrupted reception of Navtex messages
- Memory for up to 28,000 characters
- High contrast 4.5" Silver Bright LCD
- Nav data display when connected to external GPS
- Automatic selection of the Navtex station according to position when connected to external GPS
- Low power consumption
- Memory backup with long-life lithium battery

Maintain Situational Awareness

Monitor navigational warnings, meteorological warnings, search and rescue information and other data for ships sailing within 200-400 N.M. of shore.

Black Box Weather Facsimile Receiver

KEY FEATURES:

- Cost effective paperless weather fax and Navtex Receiver
- Connect directly to a NavNet display or through an Ethernet hub
- Connect to a PC equipped with Ethernet
- Selectable display colors: 8 gray tones, monochrome, blue shades, pink and black, red and blue
- Web browser navigation on PC, no proprietary software required
- Print images and messages from PC and printer
- Store a maximum of 12 weather fax images (depending on file size)
- Navtex messages can be retrieved in a table listing of up to 130 stored files
- Stored images/messages can be shown at any time
- 320 user programmed channels
- Noise rejection for clear image
- Thumbnail view for easy selection of stored images

Connect via PC or NavNet Display

Furuno's FAX-30 is a Black Box unit that connects directly to a NavNet display or an Ethernet hub with a single Ethernet cable. If it is connected to an Ethernet hub that has multiple NavNet displays attached, each of those displays will have access to the FAX-30. On a PC, the images and information are displayed by simply using your Web Browser. There is no complicated proprietary software to install or learn. Combine the new FAX-30 with NavNet's true color Radar and you have the ultimate in weather tracking.

PC not supplied

Model FELCOM501

▶▶▶ Spec P136

INMARSAT FleetBroadband

KEY FEATURES:

- IP handsets and Incoming Bell (FB-3001 option) can be integrated through Ethernet; Multiple IP handsets can be incorporated into the network using the switching hub
- IP-PBX incorporated; Comprehensive selection of telephone exchange functions available, i.e., internal communication lines, incoming call routing, group call function, etc.
- Built-in NAT router facilitates smooth network integration to the Internet
- Wide variety of security settings available, i.e., firewall, IP filter, etc.
- No dedicated software required for configuration setup (web server function incorporated); Configuration setup can be done using a web browser
- Supports PPPoE to facilitate automatic dial-up connection/disconnection via applications

Model FELCOM251

▶▶▶ Spec P136

INMARSAT FleetBroadband

Equipment List:

MODEL	FELCOM251	FELCOM501
Standard		
1. Antenna Unit	FB-1251	FB-1501
2. Communication Unit	FB-2001	
3. IP Handset	FB-8001	
Option		
Incoming Bell	FB-3001	
Analog Telephone	GEMINI 9333B4	
G3 FAX	FAX2840JP/2840	
AC/DC Power Supply Unit	406080A-FUR-001	

Fleet Broadband System Configuration

A vessel needs to notify Inmarsat Satellite of which spot beam area the vessel is located in. This way, the Inmarsat Satellite can transmit the spot beam to the vessel's location.

INMARSAT FleetBroadband	
Max. Communication Speed	up to 432 kbps (FELCOM501) up to 284 kbps (FELCOM251)
Voice	available
FAX	available (3.1 k audio)
SMS	available
Service area	Global coverage (with exception of extreme polar regions)
Billing	pay-as-you-go

Ku-Band	
Max. Communication Speed	Up to 4 Mbps*
Voice	Available (VoIP)
Service area	Regional coverage provided by multiple service providers (seamless roaming possible without any roaming surcharge)
Billing	Fixed Flat Fee

* For faster service, consult with your nearest distributors.

*Stay connected through SafeComNet™
Seamless broadband communications for ocean-going fleets*

LCR (Least Cost Routing)

LCR is the process of selecting the path of communications traffic based on cost, allowing for automatic selection of the most cost-efficient communication line available. It is possible to set VSAT, which is charged by monthly fixed flat rate, as the default communication means, and switch over to "pay-as-you-go" FleetBroadband whenever the VSAT line is out. This way, total cost for communication can be reduced.

Traffic Control

Traffic control is the control of onboard network traffic to optimize performance of communication. This can be achieved by setting order of priority for data to be handled (Quality of Service: QoS), and restricting the volume of communication at a time, and applications to be used, as well as access to certain content.

Firewall

A firewall is designed to permit or deny network transmissions to protect networks against unauthorized access by malware from the public Internet, i.e., computer viruses and keyloggers, while permitting legitimate communications to pass.

Onboard LAN Network

IP Routing

IP routing is a set of protocols to facilitate IP connection between onboard network and the public Internet.

VPN

VPN (Virtual Private Network) is a secure way of connecting to onshore office network from a remote location, using the Internet. Since encryption is applied to the communication, the network data packets can be transported privately, preventing unauthorized users from reading the private network packets. This way, the same network environment as onshore offices can be constructed onboard vessels. Compared with using exclusive circuit services to construct secure network between vessels and onshore offices, VPN has the advantage of reducing communication cost.

IP PBX

IP PBX is a PBX for IP telephones utilizing IP network, unlike PABX commonly used for analog telephone network. The system is designed to interoperate with the conventional PABX, onboard public addresser system as well as VoIP of Inmarsat and VSAT.

DISPLAY UNIT					
Type	Color TFT multi touch IPS LCD				
Screen Size	9" Wide	12.1" Wide		15.6" Wide	18.5" Wide
Screen Resolution	WXGA 1280 x 720	WXGA 1280 x 800		FHD 1920 x 1080	FHD 1920 x 1080
Screen Brightness	1000 cd/m2 (typical)	900 cd/m2 (typical)		1000 cd/m2 (typical)	900 cd/m2 (typical)
Display Colors	16,770,000 colors (Chart Plotter), 64 colors (Radar/Fish Finder)				
Language	Bulgarian, Chinese, Danish, English (USA/UK), Finnish, French, German, Greek, Italian, Japanese, Norwegian, Portuguese, Russian, Spanish, Swedish				
GPS/WAAS					
Receiver Type	GPS: 72 channels, SBAS: 1 channel (C/A mode, WAAS)				-
Receiving Frequency	L1 (1575.42 MHz)				-
Time to First Fix	100 s (cold start)				-
Accuracy	10 m (GPS), 7 m (MSAS), 3 m (WAAS)				-
Position Update Interval	100 ms or 10 Hz				-
CHART PLOTTER					
Cartography	MapMedia mm3d chart (C-MAP/Navionics/NOAA) and CMOR capable (U.S. only)				
Memory Capacity	30,000 user points, 30,000 points for ship's tracks, 200 planned routes (500 points per route)				
Alarms	Anchor Watch, XTE, Depth*, Speed, Sea Surface Temperature*, Trip Distance, Fuel Gauge* (*external data required)				
RADAR					
Display Modes	Head-up*, North-up *Heading input required.				
Echo Trails	Interval: 15 s, 30 s, 1 min, 3 mins, 6 mins, 15 mins, 30 mins and continuous (Heading input required)				
Target Tracking	100 ARPA Targets (Radar dependent) with fully automatic target acquisition (Heading input required)				
Radar Alarms	Guard Zone, CPA/TCPA, Trigger, Video, Azimuth, Heading Line				
FISH FINDER					
Transmit Frequency*	CW: 50/200 kHz, CHIRP: 40 kHz to 225 kHz *TZT9F Single-Channel CHIRP only				
Transducer	300/600 W or 1 kW* *Matching box MB1100 required for some transducers.				
Display Range	2 to 1,200 m; shift 0 to 1,200 m				
Extension Mode	ACCU-FISH™, A-Scope, Auto (Fishing/Cruising), RezBoost™, Bottom Discrimination, TruEcho CHIRP™ with compatible transducer				
Picture Advance	8 steps: x4, x2, x1, 1/2, 1/4, 1/8, 1/16, stop				
Fish Finder Alarms	School of fish, School of fish for bottom lock				
INTERFACE					
NMEA2000	1 Port				
Input	065280, 126992/993/996, 127237/245/251/257/488/489/505, 128259/267, 129025/026/029/330/038/039/040/041/291/538/540, 129793/794/798/801/802/808/809/810, 130306/310/311/312/313/314/316/577/578, 130817/818/820/822/823/826/827/828/880				
Output	126992/993/996, 127250/251/257/258, 128259/267/275, 129025/026/029/033/283/284/285, 130306/310/311/312/313/314/316

GPS/WAAS Receiver Antennas	
MODEL	GP-330B
RECEIVER CHARACTERISTICS	
Receiver Type	65 channels, C/A code, all-in-view, WAAS, 10 Hz
Receiving Frequency	L1 (1575.42 MHz)
Time to First Fix	90 s (cold start)
Tracking Velocity	999.9 kn
Geodetic Systems	WGS-84, NAD-27 and others
Accuracy	10 m (GPS), 7 m (MSAS), 3 m (WAAS)
ENVIRONMENT (IEC 60945 test method)	
Temperature	-25° C to +55° C
Waterproofing	IEC 60529 IP56
POWER SUPPLY	
	12-24 VDC, LEN2
	1.4 W, 90-45 mA max.

GP-330B

GPS/WAAS Receiver Antenna 0.22 kg 0.49 lb

1st Watch Wireless Radar		
MODEL		DRS4W
ANTENNA		
Type		ø488 mm Radome (19")
Beam Width	Horizontal	7.2°
	Vertical	25°
Antenna Rotation Speed		24 rpm
RF TRANSCEIVER		
Frequency		9410 ±30 MHz
Pulselength & PRR		0.125 to 0.5: 0.08 µs/360 Hz 0.75 to 2: 0.3 µs/360 Hz 3 to 24: 0.8 µs/360 Hz
Peak Output Power		4 kW
Range Scales		0.125 to 24 NM
WIRELESS LAN		
Number of connectable devices		2 units
Transmit frequency		2.4 GHz band
APPLICATION		
Name		"Marine Radar" from Apple App Store (Free of charge)
Display (customer supply)		iPad/iPad mini/iPhone, iOS 6.1 or later
Screen Orientation		Portrait/Landscape (iPad, iPad mini only)
Language		English
Mode		Full screen, Day/Night, Gain (auto), STC (auto), Rain, Auto Noise rejector, Guard Zone Off center, Cursor position* * iPad, iPad mini
ENVIRONMENT		
		Temperature: -25° C to +55° C, Waterproofing: IP26
POWER SUPPLY		
		12-24 VDC, 2.1-1.0 A max.

4.2" GPS Navigator		
MODEL		GP-39
GPS/WAAS		
Receive Type	GPS	Twelve discrete channels, C/A code, all-in-view
	WAAS/SBAS	Two channels
Receive Frequency		L1 (1575.42 MHz)
Time to First FIX		90 s approx. (cold start)
Tracking Velocity		1,000 kn
Geodetic Systems		WGS-84 (and others)
ACCURACY		
GPS		10 m (2 drms)
WAAS		3 m (2 drms)
MSAS		7 m (2 drms)
DISPLAY		
Type		4.2" Color LCD
Effective Display Area		92 (W) x 52 (H) mm
Screen Resolution		480 x 272
Display Modes		Plotter, Steering, Highway, NAV data, User display, Satellite monitor (Digital, Speedometer, COG)
Memory Capacity		3,000 ship's track points; 10,000 waypoints with comments; 100 routes, 30 waypoints/route
Alarms		Arrival, Anchor watch, Cross track error, Speed, WAAS (SBAS), Time, Trip
INTERFACE		
Ports		NMEA0183: 1, USB: 1
Interface	Output	(NMEA0183) AAM, APB, BOD, BWC, BWR, DTM, GGA, GLL, GSA, GSV, RMB, RMC, VTG, XTE, ZDA
	Input	(NMEA0183) RTE, TLL
ENVIRONMENT		
Temperature	Display Unit	-15° C to +55° C
	Antenna Unit	-25° C to +70° C
Waterproofing	Display Unit	IP55
	Antenna Unit	IP56
POWER SUPPLY		
	Non NMEA2000	12-24 VDC: 0.7-0.3 A
	NMEA2000	-

5.7" GPS DGPS Navigator

MODEL		GP-170
GPS/WAAS		
Receive Type	GPS	Twelve discrete channels, C/A code, all-in-view
	WAAS	Two channels
Receive Frequency		L1 (1575.42 MHz)
Time to First FIX		90 s approx. (cold start)
Tracking Velocity		1,000 kn
Geodetic Systems		WGS-84 (and others)
ACCURACY		
	GPS	10 m (2 drms, HDOP<4)
	DGPS	5 m (2 drms, HDOP<4)

Stabilizer		Built-in motion sensor			
ENVIRONMENT					
Temperature	Display/Control/Transceiver unit	-15° C to +55° C			
	Hull unit	0° C to +55° C (Transducer: 0° C to +35° C)			
Waterproofing	Display/Control unit	IP55			
	Transceiver/Hull unit	IP22 (Raise/lower control unit: IP55)			
POWER SUPPLY					
Display/Control/Transceiver Unit		12-24 VDC: 4.5-2.2 A			
Hull Unit		12/24 VDC: 2.2/1.1 A (7.2/3.6 A: during raising)			

Full-Circle Scanning Sonar

MODEL		CSH-5L MARK-2		CSH-8L MARK-2	
GENERAL					
Frequency		55 kHz or 68 kHz		85 kHz	
DISPLAY					
Display Mode		Single scan, Fish Finder combination* (single and Fish Finder), Audio combination (single and audio pictures) * Fish Finder or Echo sounder required			
Colors		Scan/Echo: 16 colors, Mark: 1 color			
Mark		Own ship's track, Heading line, Direction/distance, Fish school, Event, Target lock			
Range Scale		50, 85, 100, 150, 200, 250, 300, 350, 400, 450, 500, 600, 800, 1000, 1200, 1600 m			
Pulselength		0.5 to 20 ms (depending on range scales)			
Ship Speed		18 kn max (raise/lower operation up to 16 kn)			
Tilt		Manual control: 0° to 55° in 1° steps Automatic tilt scan: 4° to 52°			
Audio Search (By external loudspeaker)	Frequency	800 Hz		1 kHz	
	Sector	20°, 40°, 80°, and 120° selectable			
Language		English, Spanish, Danish, Dutch, French, Italian, Norwegian, Thai, Vietnamese, Burmese, Indonesian, Japanese			
INTERFACE					
NMEA0183 (Ver1.5/2.0/2.2)		2 ports			
Interface	Input	CUR, DBS, DBT, DPT, GGA*, GLC, GLL*, GTD, HDG, HDM, HDT, MTW, RMA, RMC, VDR, VHW, VTG * disabled for NMEA0183 Ver.1.5			
	Output	TLL (external data required)			
Log, E/S, KP		Speed log pulse (contact signal): 200/400 pulse/NM Sonde, E/S signal: VI-1100A applicable External KP: Current loop, 0 to 12 V			
Video Signal Output	Method	RGB analog, separated synchronization, XGA (VESA)			
	Resolution	1024 x 768 pixels, 65 MHz clock			
CIF data input		Location, Ship's speed, Bearing, Current data (1 layer), Water depth, Water temperature, Multiple layer current data			
HULL UNIT					
Transducer travel		400 mm or 600 mm			
Raising/lowering Time		400 mm: 14 s, 600 mm: 20 s			
Allowable Ship's Speed		18 kn max. (16 kn during raise/lower operation)			
Driving system		Remote electric control			
ENVIRONMENT					
Temperature		0° C to +55° C			
Waterproofing		IPX2 (w/o connector panel of processor unit)			
POWER SUPPLY					
Processor unit		100-240 VAC: 4.0-2.0 A, 1 phase, 50-60 Hz		100-240 VAC: 4.5-2.2 A, 1 phase, 50-60 Hz	

WASSP Multibeam Sonar	
MODEL	F3/F3i/F3L/F3Li (WMB-1320F/1320Fi/1320FL/1320FLi/4340/6340)
GENERAL	
Transmission Frequency	Wide band; F3/ F3i: 160 kHz, F3L/F3Li: 80 kHz
Effective Beam Width	F3/F3i: 200 m, F3L/F3Li: 450 m
Beam Spacing	FA: 3.2°
Beam Width	120° x 4° (Athwartships x Fore-aft), PS: 4.4°
Maximum Depth* (best performance)	F3/F3i: 200 m (Side Beam), 400 m (Main Beam directly under boat) F3L/F3Li: 450 m (Side Beam), 900 m (Main Beam directly under boat) * Depth capability subject to a variety of external factors
Max Range Resolution	2 cm
Tide Correction	Fully Geo Referenced
DISPLAY	
Display Mode	Bathymetry, Sonar polar view, Sounder (single, triple & quint beam) (Licensing options) Backscatter, Open Client Support, Water Column Targets, Uncorrected Data, XYZ export, Sidescan, RTK tides, other export formats
MINIMUM PC SPECS	
OS	Windows 8.1, 10
CPU	2 Ghz, 4 Cores/4 Threads
Memory	8 GB (Min. 4 GB)
Graphics	Direct X11
Screen Resolution	Full HD 1920 x 1080 (Min. XGA 1024 x 768)
SSD	2 TB (Min. 250 GB)
Network	Ethernet - GbE, WiFi802.11ac
Dual Screen Support	YES
INTERFACE (Transceiver Unit)	
NMEA0183/RS422/RS232	GGA, GPK, GLL, HDG, HDM, HDT, HVE, PASHR, PTNL PFEC, RMC, RCD, TSS1, ZDA
Ethernet	GbE
Other Interfaces	PPS, KP, Remote Power
ENVIRONMENT	
Temperature	0° C to +50° C (storage: -200° C to +85° C)
Waterproofing	IP56, Bulkhead mounted (IP67 option available)
POWER SUPPLY	
	9-32 VDC

Marine VHF Radiotelephone	
FM-4800/4850	
MODEL	
GENERAL CHARACTERISTICS	
Frequency Range	TX: 156.025 to 162.000 MHz, RX: 155.500 to 163.275 MHz
Communication System	Simplex/Semi-duplex
Modulation	16K0G3E (F3E) Voice, 16K0G2B (F2B) DSC
TRANSMITTER	
Output Power	25 W max, 1 W at power reduction
Max. Frequency Deviation	±5 kHz max
Spurious Emission Standby/Transmit	less than 2 nW / less than 0.25 uW
RECEIVER	
Sensitivity	+6 dBuV (e.m.f) or less (SINAD 20 dB)
Adjacent Channel Selectivity	70 dB or more
Spurious Response	70 dB or more
DSC RECEIVER	
Protocol	Class D DSC
Sensitivity	0 dBuV (e.m.f) or less (BER < 1%)
Adjacent Channel Selectivity	70 dB or more
Spurious Response	70 dB or more
AIS RECEIVER	
Receiving Frequency (CH)	161.975 MHZ (AIS1), 162.025 MHZ (AIS2)
Sensitivity	-107 dBm or less (PER < 20%)
Adjacent Channel Selectivity	70 dB or more
Spurious Response	70 dB or more
GPS RECEIVER (FM-4800 only)	
Receiving Frequency	1575.42 MHz
Number of Channel	72 channels
Horizontal Accuracy	10 m
Position Fixing Time	Cold start: 120 sec typical
Position Update Interval	1 sec
LOUD Hailer/FOG HORN	
Output Power	30 W Max. (4 ohm)
INTERFACE

VHF Radiotelephone	
FM-8900S	
MODEL	
GENERAL CHARACTERISTICS	
Class of Emission	G3E (Radiotelephone), G2B (DSC)
Communication System	Simplex/Semi-duplex
Channels	All VHF channels according to ITU-R Radio Regulations Appendix 18, All channels in FCC Part 80, Max 20 Private channels where permitted by Administrations (preset by the service agent), 10 weather channels (USA and Canada, receive only)
Rules and Regulations	VHF Radiotelephone: EN 301 925 V1.4.1 (2013.5) VHF ATIS: EN 300 698-1 V1.4.1 (2009.12), EN 301 925 V1.5.1(2017) DSC: Rec. ITU-R M.541-10, M.493-14 (class A), M.689-2, M.821-1
Display	4.3 inches WQVGA (480 x 272 dots), color dot matrix LCD
TRANSMITTER	
Frequency Range	155.00 - 161.600 MHz
RF Output Power	High: Max 25 W, Low: Not exceed 1 W US version: Manual override for 25 W available on CH13, CH67 and CH77 (usually not exceed 1 W)
Frequency Stability	less than ± 1.5 kHz
RECEIVER	
Frequency Range	Simplex 155.000 - 161.600 MHz Semi-duplex 159.600 - 164.200 MHz
Receiving System	Double-conversion super-heterodyne 1st IF : 51.1375 MHz, 2nd IF: 62.5 kHz
AF Output Power	3 W (4 Ω loud speaker), 2 mW (150 Ω handset)
Audio Response	De-emphasis of 6 dB/oct +1/-3 dB
Sensitivity	less than 6 dB μ V at SINAD 20 dB
Adjacent Channel Selectivity	70 dB or more
DSC SECTION	
Message Log	Receive 50 distress messages plus 50 non-distress messages Transmit 50 messages
Interface	Nav data IEC61162-1 Ed.4 Printer Centronics-compatible
Alarm	Audible and visual on receipt of a DSC call
Receiver Characteristics	DSC frequency 156.525 MHz (CH70) Calling sensitivity Symbol error rate: less than 1% (at 0 dB μ V)
ENVIRONMENT	
Temperature	-15° C to +55° C
Waterproofing	FM8900S: IP20 (IP22 with option), HS-2003: IP24, RB-8900: IP22

Furuno's Global Network

HISTORY:

Founded in 1938 as FURUNO ELECTRIC SHOKAI LTD., FURUNO ELECTRIC CO., LTD. is recognized as the world leader in Marine Electronics. Our founder's principle goal of modernizing fisheries led to the world's first practical commercial Fish Finder in 1948.

In 1972, Furuno was awarded the NMEA (National Marine Electronics Association) Best Product Award in the Fish Finder category in the US. Since then, Furuno has won 230 NMEA Awards, more than any other two manufacturers combined.

Furuno established its first overseas subsidiary in Norway in 1974, which was followed by the establishment of subsidiaries in the US (1978) and the UK (1979), foreshadowing its full-scale entry into the international business arena.
